

Stephen Lynch, Cofounder and Principal at Energy Curtailment Specialists, Inc.

After graduating from Northeastern University, Stephen joined General Dynamics as a Power Systems Engineer relative to nuclear power systems.

Following that, he accepted a position as a Plant Manager for a large manufacturer in Western NY. In the more than ten years that he held that position, Stephen gained vast experience in regard to energy markets.

Stephen also served on the Board of Directors for the Greater Niagara Manufacturers Association and became instrumental in promoting and addressing issues directly affecting the manufacturing community.

Currently, serving his second term as the Chairperson of the PRL WG for the New York ISO. The Price Responsive Load Working Group Committee is responsible for attending to issues that deal with the sensitive nature of wholesale electrical pricing throughout the New York State Power Grid.

In the wake of the California Black out crisis, several years ago, it became apparent that there was a need for a company like ECS. With his partner, Glen Smith, Stephen planted the seeds for what has become one of the most influential companies in the Demand Response and Energy Conservation Fields.
