CRP Next Steps

John Adams
NYISO
RNA Conference
February 9, 2006
Next Steps

- Submittal of market and regulated backstop solutions due to the NYISO on February 15.
- NYISO evaluates market based solutions between February 15 and March 1 to determine if the solutions satisfy the needs
  - Evaluation includes an update of TO Plans and certain planning assumptions such as plant retirement dates
- If required, the NYISO issues a request for alternative regulated solutions
Next Steps Continued

- The request for alternative regulated solutions would be issued on or about March 1
- Responses would be due to the NYISO by April 15
- Between April 15 and May 15 NYISO analyzes solutions and prepares draft CRP
- Between May 15 and July 1 Stakeholder review and committee approvals
- July NYISO BOD Approval of CRP
Criteria for Alternative Solutions

- Data required to assist the NYISO in its review of the proposed alternative solution shall be provided within the schedule provided for in the request for solutions.
- The data should include all information necessary to evaluate whether the solution is viable and meets the needs.
- The data should include at a minimum sufficient information to model the proposed solution in the power flow and resource adequacy assessments.
Criteria for Alternative Solutions

The following additional information shall be submitted as required:

- Evidence of a commercially viable technology
- Major milestone schedule
- Demonstration of site control
- Whether a contract is under negotiation or in place
- Status of NYISO interconnection studies
- Status of NYISO interconnection agreement
- Status of any required permits
- Evidence of equipment procurement
- Evidence of financing
