

NYISO Consumer Interest Liaison Weekly Summary

December 14 – December 18, 2020

Notices:

- *The 2021 NYCA ICAP Market Peak Load Forecast has been posted on the NYISO website [here](#).*
- *The [Notice of Initial Decision Period Results to Class Year 2019 Project Developers](#) is posted on the NYISO website. The notice is posted on the NYISO website at the link below under the "Notices to Market Participants" subfolder. [Link to NYISO website](#).*

Meeting Summaries:

Wednesday, December 16, 2020

Management Committee

Motion #1

Motion to approve the draft October 28, 2020 MC Meeting Material.

The motion was approved unanimously.

Motion #2

The Management Committee ("MC") hereby recommends that the Board of Directors approve the revisions to Sections 6.10, 22, 25.5, 25.7, 31.1, 31.2 – 31.2.7, 31.3, 31.5, 31.7, and new Sections 31.13 and 31.14 of the Open Access Transmission Tariff, and revisions to Section 30.4 of the Market Administration and Control Area Services Tariff, as more fully described in the presentation entitled "Economic Planning Process Tariff Revisions" as presented and discussed at the December 16, 2020 MC meeting.

The motion was approved unanimously.

Motion #3

The Management Committee (“MC”) hereby: (i) approves changes to the NYISO’s Market Administration and Control Area Services Tariff with regard to the modifications for the Tailored Availability Metric project as presented to the MC on December 16, 2020; and (ii) recommends that the NYISO Board of Directors authorize NYISO staff to file such revisions under Section 205 of the Federal Power Act.

The motion was approved unanimously

Thursday, December 17, 2020

Joint Installed Capacity/Market Issues/Price Responsive Load Working Group

Informational LCR Results

Ryan Carlson of the NYISO updated the Locational Capacity Requirement values following the determination of the final Net Cost of New Entry (CONE) curves. The preliminary Transmission Security Limits (TSLs) for 2021 were also provided using the October load forecast and Final Base Case EFORd values.

Mr. Carlson provided the final Net CONE curve values for discussion with stakeholders. The preliminary TSL limits are:

- *G-J*
 - 86.6%
- *NYC*
 - 78.7%
- *LI*
 - 102.9%

The preliminary LCRs using the 2021 final base case are:

- **NYCA IRM** **20.7%**
- **G-J** **88.7%**
- **NYC** **80.6%**
- **LI** **102.9%**

The NYISO will calculate Final TSL values in December using the final ICAP Load forecast. Final LCRs will be presented to the Operating Committee for approval in January 2021. To see the complete presentation, please go to:

FERC Order No. 2222

Michael Ferrari of the NYISO reviewed FERC Order No. 2222 (Order) and indicated the parts of the DER Participation Model that the NYISO may need to modify. FERC issued the Order, Participation of Distributed Energy Resource Aggregations in Markets Operated by RTOs and ISOs, on September 17, 2020.¹

The rule requires ISOs and RTOs to permit DER participation alongside traditional resources in the organized wholesale markets through aggregations. DER must be permitted to aggregate in order to satisfy minimum size and performance requirements that each may not be able to meet individually. Mr. Ferrari led a discussion summarizing the requirements of the Order.

¹ Participation of Distributed Energy Resource Aggregations in Market Operated by Regional Transmission Organizations and Independent System Operators, Order No. 2222, 172 FERC ¶ 61,247 (Sept. 17, 2020).

Mr. Ferrari then compared the NYISO participation model to several of the requirements of the Order for stakeholder information and discussion.

The NYISO is still evaluating the Order and how the NYISO intends to comply with the Order. In response to a stakeholder question, Mr. Ferrari noted that the NYISO will return for further stakeholder discussion of the issue in Q1 2021. The NYISO must submit a compliance filing by July 19, 2021. Specific questions or comments can be sent to the NYISO Distributed Resource Integration team at: DER_Feedback@nyiso.com.

Installed Capacity Manual Revisions

Sarah Carkner and Emily Conway of the NYISO presented proposed Installed Capacity Manual (ICAP) revisions for stakeholder discussion. The revisions reflect updates to the Expanding Capacity Eligibility and the Tailored Availability Metric rules.

Ms. Carkner led with discussion on the changes to ICAP Manual sections:

- 2.5
- 4.1.1
- 4.2
- 4.5
- 4.12
- 4.4.10
- 4.5

Ms. Conway next detailed the proposed updates to the ICAP Manual Attachments M and J.

The NYISO is seeking stakeholder feedback on the proposed ICAP Manual and Attachment revisions discussed at the meeting. The NYISO will return to an upcoming ICAPWG as needed to continue discussions on the topics and is aiming to bring the proposed revisions to the ICAP Manual and Attachments to the BIC in early 2021. Salesforce - Knowledge Base

Mark Seibert of the NYISO presented the NYISO Knowledge Base. The Knowledge Base, located on the NYISO web site, provides access to a centralized library of information on current and emerging industry related topics. The benefits of the Knowledge Base portal are:

- Provide access to a centralized library of information on current and emerging industry related topics
- “One Stop Shop”
 - Offers customers help when needed
 - Ease of access to information/educational overview in the form of FAQ’s
 - Self-help automation / Effortless & Relevant
 - Accessible via NYISO website or NYISO Member Community Portal
- Provide ability to Follow Topics
 - Receive automated updates via email
- Provide comments / feedback - recommend new articles
- Stakeholder Services representatives will remain available for customer support

Please note: This summary is provided for informational purposes only. It is not intended to be a substitute for the presentations and other information provided by the NYISO or the discussions that take place at the meetings.

Mr. Seibert provided details to stakeholders on how to access and maneuver the system. The NYISO will deploy Knowledge Base by year-end 2020 and continue to work with respective business owners to develop articles in all business areas. There will also be follow up with Market Participants throughout 2021 to get feedback on the Knowledge Base platform. To see the complete presentation, please go to:

BSM Self Supply Exemption Compliance Filing (Docket ER16-1404)

Shaun Johnson of the NYISO reviewed the NYISO BSM Self Supply Exemption Compliance filing. In April 2016, NYISO filed a compliance plan with FERC that, among other things, proposed to create a Self-Supply Exemption in the BSM Rules. On February 20, 2020, FERC ruled on the NYISO compliance filing. FERC generally accepted the NYISO's compliance filing, however, the order directs the NYISO to submit a compliance filing that limits eligibility for Self Supply LSEs to non-State entities; requires modifications to the Net Long and Net Short Thresholds; and directs the NYISO to include an additional process step prior to the NYISO revoking a previously awarded Self Supply Exemption. The NYISO's response is due December 21, 2020.

Mr. Johnson detailed the compliance filing tariff language to stakeholders for review and discussion. Tariff redline copies were provided with the meeting materials.

NYISO plans to submit the Compliance filing on Monday, December 21, 2020. To see the complete presentation, please go to: https://www.nyiso.com/documents/20142/17760441/NYISO%20-%20SSE%20Compliance_Dec%2017%20icap.pdf/db05309a-4f2a-bd3c-5fe2-9297e48cec22

FERC Filings

There were no filings to FERC by the NYISO for this week

FERC Orders

December 18, 2020

Order accepted agreement effective November 5, 2020, as requested

December 17, 2020

Letter Order accepted SGIA (SA 2562) among NYISO, NYSEG, and Orangeville LLC effective October 6, 2020, as requested

December 14, 2020

Letter Order accepted amended E&P Agreement effective September 17, 2020, as requested
