

Reforming the Energy Vision (REV)

- distributed energy resources (DER)
as a primary tool
- outcome-based ratemaking

Why REV now?

- Cost pressures
- DER advances
- Climate change
- Fuel diversity
- Information technology

Benefits of REV

- Load shaping/ system efficiency
- Distribution infrastructure
- Reliability/resilience
- Emission reductions
- Long term strategic

Environmental issues

- Interaction with Clean Energy Fund
- Impact on generation mix
- System efficiency
- Pricing externalities
- DG emission regulations
- EJ communities
