

The NYISO would assign the costs related to regulated reliability solution on a sub-zonal basis, based on the relative contribution to the loads in those sub-zones to the need for the regulated solution. The transmission owner(s) and the municipal systems in those sub-zones will be responsible for recovering the costs assigned to them by the NYISO. The transmission owner(s) will recover the costs assigned to them ~~from their customers, including the customers of~~ competitive LSEs.

Deleted: on a transmission district basis as part of a delivery charge, or similar charge. The

Deleted: would pay their share of the costs through the transmission owner's delivery (or similar) charge.
