Proposed Changes To Tie & Generator Metering Management Protocols

♦ Generator & Tie-line metering data remains locked down unless written request received from Meter Authority to change metering data, inclusive of list of all data that is to be changed

♦ Prior to unlocking sub-zone for metering updates

- ♦ *Meter Authority must provide an itemization of all data that will be changed*

- ♦ *NYISO must "snap-shot" database content to archive a pre-change status*

- ♦ *NYISO parse meter data changes, submitted by Meter Authority, by Billing Org*

♦ NYISO emails metering changes proposed by Meter Authority to respective Billing Org contact

♦ After unlocking sub-zone for metering updates

- ♦ *NYISO notifies Meter Authority of four-hour opportunity to update metering*

- ♦ *NYISO re-locks sub-zone after expiration of four-hour window*

- ♦ *NYISO "snap-shots" database content to archive post-change status*

- ♦ *NYISO compares observed changes to proposed changes communicated by Meter Authority*

- ♦ *NYISO immediately follows up with Meter Authority & resolves all discrepancies*
