

### **Motion Agenda Item No. 7**

The MC agrees to extend the guiding principles and terms and conditions of “The Con Edison program” for local black start and system restoration services to the two localities which have local black start plans on file with the NYISO as of October 11, 2005. The MC directs the NYISO staff to draft tariff language that will accomplish this objective. The draft tariff language should be consistent with the draft tariff document that addressed “The Con Edison program” and which was reviewed and approved by the MC at its September 7, 2005 meeting. The MC further directs the NYISO staff to submit the draft tariff language which addresses all local black start and restoration plans to the chairs and vice-chairs of the MC, OC and BIC for final approval prior to filing with FERC.
