

# **FERC Interconnection Order Process for NYISO Compliance Filing**

**NYISO MC Meeting**

**August 28, 2003**

**Albany**

**Agenda #6**

# Key Issues for Compliance Filing

- Framework of the Final Rule is inconsistent with existing NYISO procedures in several significant areas
- FERC indicates it will grant ISOs and RTOs “considerable flexibility to customize the interconnection process” during the compliance phase
- Need to determine whether to adopt provisions of the Final Rule or to request retention of existing NYISO practices under the “independent entity variation” standard

# Proposed NYISO Process

- NYISO staff summarized the Final Rule and compared/contrasted with existing NYISO procedures
- Stakeholders will provide input on their views regarding these differences
- NYISO will develop a proposed position, considering stakeholder input received, on each issue for presentation to market participants
- NYISO will draft the compliance filing and circulate for stakeholder comment
- NYISO will strive to achieve consensus

# Proposed Schedule

- **Aug 28**      **MC Meeting**
  - » NYISO to discuss process/update status
  
- **Sept 2**      **TPAS/IITF Meeting**
  - » Review issues/present NYISO positions/seek MP input
  - » Establish Proposed Schedule for Remaining Process
  
- **Sept**      **OC/BIC Meetings**
  - » Review/discuss NYISO positions
