

# **FERC Interconnection Order Process for NYISO Compliance Filing**

**NYISO BIC/OC Meetings**

**August 13/14, 2003**

**Albany**

# Key Issues for Compliance Filing

- Framework of the Final Rule is inconsistent with existing NYISO procedures in several significant areas
- FERC indicates it will grant ISOs and RTOs “considerable flexibility to customize the interconnection process” during the compliance phase
- Need to determine whether to adopt provisions of the Final Rule or to request retention of existing NYISO practices under the “independent entity variation” standard

# Proposed NYISO Process

- NYISO staff to summarize the Final Rule and compare/contrast with existing NYISO procedures
- Stakeholders will provide input on their views regarding these differences
- NYISO will develop a proposed position, considering stakeholder input received, on each issue for presentation to market participants
- NYISO will draft the compliance filing and circulate for stakeholder comment
- NYISO will strive to achieve consensus

# Proposed Schedule

- **August 5 Discussion with TPAS**
- **Aug 13/14 BIC/OC Meetings**
  - » NYISO to present proposed process/schedule
- **Aug 20? Special TPAS/IITF Meeting (Date TBD)**
