

## Additional 115 kV Facilities Secured in the Autumn 2018 Centralized TCC Auction

The NYISO will begin securing in all rounds of the Autumn 2018 Centralized TCC Auction the 115 kV facilities shown in the table below.

The secured ratings of the facilities shown in the table below will be reduced by a 20 MW constraint reliability margin (CRM) in all rounds of the Autumn 2018 Centralized TCC Auction.

For additional background on this topic, please see the presentation entitled "[Securing 100+kV Transmission Facilities in the Market Model - TCC Auction Update](#)" from the August 7, 2018 Joint Installed Capacity Working Group and Market Issues Working Group meeting.
