

Business Issues Committee

March 17, 2004 Meeting

Motion - Agenda #09

Having reviewed proposed changes to the TCC auction rules and Transmission Services Manual that would permit a Transmission Owners to designate as being “in-service” for TCC auction purposes when that facility has otherwise been posted to the NYISO web-site as being scheduled out-of-service for a majority (>50%) of the effective period of the TCCs being sold in a 6-month sub-auction or monthly reconfiguration auction, the Business Issues Committee approves these changes.
