

# Day-Ahead Demand Response Program Bid Slot Reallocation

## ➤ Purpose

- *Intended to maximize usage of limited number of slots available to be modeled in NYISO systems*
- *Summer of 2001: Reallocation will probably not be an issue as there are approx. 20 slots still available*

# **Reallocation Process**

- **Market Monitoring will report on bus utilization on a monthly basis**
- **Fewer than 10 bids in a calendar month is defined as low utilization**
- **Two consecutive months of low utilization is cause for reallocation**

# **Reallocation Process Continued**

- After the first month there are fewer than 10 bids for a particular slot, the bidder will be contacted
- Market Services and Operations will be notified of low bus utilization
- After second consecutive month of low utilization, recommendation for reallocation will be made
- This will take place only if bid slots are in short supply

# **Reallocation Process Continued**

- If the recommendation for reallocation is accepted, bidder will be notified
- Slot will be reassigned to new registrant according to the present bid slot allocation procedures
