

**STATE OF NEW YORK
DEPARTMENT OF PUBLIC SERVICE**

July 9, 2001

TO: David Lawrence, NY ISO

FROM: Joseph Lochner, NYDPS

SUBJECT: Information needed to monitor the NY ISO Day Ahead Demand Response Program (DADRP) and the Emergency Demand Response Program (EDRP).

Introduction

The NYISO demand response programs have been implemented to improve reliability and moderate market prices. It would be useful for NYISO to make available to market participants information about the operation of these programs. This would help parties to evaluate the effectiveness of the programs and highlight areas for improvement. The information should be aggregated to avoid release of confidential information and the development of the reports should not put significant added burden upon the NYISO to provide.

DADRP

Monthly Reports Submitted

Participation Levels

End of month amounts provided for each of the four super zones:

- Number of registered Demand Reduction Providers
- Number of registered Demand Side Resource customers
- Amount of curtailable MW's of registered Demand Side Resource customers
- Number of bidding points assigned to the zone

Bidding and Performance Activity

Daily amounts provided for each of the four super zones:

- Number of DADRP bids and their MW's submitted by hour
- Number of DADRP bids and their MW's accepted by hour
- LBMP in hours where DADRP bids are accepted.
- Number of MW's of performance and non performance (this information will be lagged by one month)
- Dollar amounts of demand reduction payments, incentive credits and non performance penalties (this information will be lagged by one month)

EDRP

Monthly Report Submitted

Participation Levels

End of month amounts provided for each of the four super zones:

- Number of registered Curtailment Service Providers
- Number of registered customers participating in the EDRP
- Amount of potential curtailment MW's of registered customers participating in the EDRP

- Amount of potential curtailment MW's provided by on site generation of registered customers participating in the EDRP

EDRP Event Report submitted each time an event occurs

For each event provide by each of the four super zones (first 3 items should be included in operational section of NYISO website when the event occurs):

- When CSP's were notified of need to curtail
- Description of conditions causing the need for EDRP curtailment
- Time period of the EDRP event
- Number of customers contacted for EDRP curtailment and amount MW's of curtailment requested
- Amount of MW's of on site generation provided curtailment requested
- Actual EDRP curtailment performance in MW's for each hour of the event (this information will be lagged by one month)
- Dollar amount of payment made for curtailment performance
