

Priority of Demand Response Issues

Donna Pratt
Demand Response Market Product Specialist
New York Independent System Operator

ICAP Working Group Meeting
Rensselaer, NY
February 12, 2010

Regulatory Compliance Tasks

- ◆ FERC Order 719 Compliance Order (November 20, 2009)
 - *Due February 18, 2010*
 - Demonstrate the reasonableness of its proposed requirement for demand response resources to use the same telemetry and communications equipment as that used by generators, and to explain why other alternatives are not appropriate (page 33).
 - Modify the tariff to allow technically capable demand response resources to participate in the real-time energy market to provide energy imbalance service (page 34).
 - NYISO to provide a plan of action identifying the necessary changes and anticipated completion dates with the compliance report.
 - *Update due June 1, 2010*
 - Because NYISO is actively engaged in developing market rule changes that will allow aggregators to participate in its ancillary markets, we will not, at this time, direct market rule changes. However, we will direct NYISO to file its market rules governing aggregators bidding directly into the ancillary services market at the conclusion of its stakeholder process currently connected to the “Price Responsive Load Working Group” (page 42).

Project Priorities

◆ Regulatory Compliance

■ *Feb. 18, 2010*

- Telemetry requirement for demand resources providing ancillary services
 - Demonstrate reasonableness of telemetry requirement
 - Explain why other alternatives are not appropriate
- Plan and schedule for allowing demand resources to participate in the real-time energy market

■ *June 1, 2010*

- Update on allowing aggregations for ancillary services

◆ DRIS

■ *2010 project commitment*

Demand Response Issues affected by Regulatory Priorities

- ◆ SCR Baseline Analysis & Aggregation issues
- ◆ DSASP Technical Conference

- ◆ Stakeholders have provided feedback on priority of demand response issues

The New York Independent System Operator (NYISO) is a not-for-profit corporation that began operations in 1999. The NYISO operates New York's bulk electricity grid, administers the state's wholesale electricity markets, and provides comprehensive reliability planning for the state's bulk electricity system.
