

NYISO Management Committee Meeting

September 17, 2003

Consolidated Edison
New York, NY

MINUTES OF THE MEETING

1. Introduction and Meeting Objectives

Joe Oates, Chairman, called the meeting to order at 10:08 AM and welcomed the members of the Management Committee ("MC"). Mr. Oates noted that agenda item 8 has been withdrawn by the proponent.

In the Chair's report, Mr. Oates noted that there was a proposed reprioritization of projects presented to the Project Prioritization Team ("PPT") and urged MC members to review materials that are posted on the NYISO website. Any comments should be provided to one of the Committee Chairs or Vice-Chairs prior to the October 1st meeting of the PPT.

2. Approval of the Minutes

Motion #1:

Motion to approve the Minutes from the May 14, 2003 MC meeting.
(Motion Passed unanimously by a show of hands)

Motion #2:

Motion to approve the Minutes from the July 24, 2003 MC meeting.
(Motion Passed unanimously by a show of hands)

3. President's Report

Bill Museler introduced Frank Frankowski to the MC. He is the new Chief Financial Officer ("CFO") for the NYISO. Andy Ragogna has become Chief Administrative Officer.

Blackout Report

Mr. Museler stated that he has stressed the importance to the North American Electric Reliability Council ("NERC") that they study the precursors to the separation of the New York system. This event was beyond any contingencies the New York system is designed for. This also raises questions as to events that any electrical system should be designed to withstand.

Jim Scheiderich, of Select Energy New York, stressed the importance of Operators recognizing appropriate times to shed load.

Mr. Museler reported that there is a lot of pressure on the Department of Energy (“DOE”) to issue a preliminary report on what happened and why. The next official report from the International Commission will likely be released in mid to late October. In the mean time, the NYISO and New York transmission operators are doing their own investigation.

Mr. Museler stated that he has been active in advocating for stricter reliability rules in Federal Legislation. The NYISO feels that reliability rules have to become standardized, mandatory and enforceable.

Restoration Lessons Learned

Mr. Museler has asked the Operating Committee (“OC”) to determine the appropriate forum to develop lessons learned from the restoration period. This process will be open to all MPs.

Market Performance Highlights

Mr. Museler reported that the settlement process for the blackout period has been decided and was used for last week’s invoice. The NYISO doesn’t expect that any additional rebilling will be necessary. The price for energy increased in August due to recovery from the system disturbance. Prices for reserves remained stable for August. Price corrections, outside of the blackout period, were at normally low levels.

Mr. Museler stated that KPMG has issued an unqualified SAS 70 report. NYISO is the first ISO to achieve this on the initial evaluation. Though confidential, this report is available to any Market Participant (“MP”) that is interested. Elaine Robinson is looking into posting on a secure website.

Mr. Oates requested, and Mr. Museler agreed to place an overview of the audit process and results on the agenda for the next MC meeting.

Mr. Museler stated that if hurricane Isabel were to radically change course, the NYISO has procedures in place to protect the system.

Web-Based Reconciliation

Mr. Museler reported that with Web Based Reconciliation successfully deployed, the 12-month final bill is ready to go in October.

Mr. Museler stated that the NYISO is in final negotiation with the R.J. Rudden consulting firm on the Schedule 1 allocation study. Contact people on this project are Elaine Robinson and Ray Stalter.

2004 Budget

Jim Parmelee, of Long Island Power Authority (“LIPA”), announced that there would be a meeting of the Budgets, Standards and Performance Subcommittee (BS&PS) Friday Sept 26 to look at the 2004 budget in detail. There will be a follow up meeting on October 10th, during which time the Subcommittee will finalize a report for the Management Committee.

Mr. Museler stated that the blackout would likely have a budget implication in 2004 and in following years.

Wes Yeomans, of National Grid, stated that he is concerned with the large numbers of outside billing adjustments on the invoices and how those fell under the SAS audit. Also, with regards to restoration billing, Mr. Yeomans was concerned with a \$5M charge that was billed through uplift.

Mr. Museler responded that information associated with restoration uplift would be provided to MPs.

Ms. Robinson stated that Mr. Alan Holmes would provide information to MPs regarding the schedule for the Rudden Study at the next MC meeting.

4. Update on Seams and Market Improvement Projects

Chuck King reported on the status of current Seams Projects. The NYISO will deploy OSS software at the end of the month that will include PJM ramp data. A meeting was held last week in Hartford to discuss Virtual Regional Dispatch. Materials for this meeting are posted. ISONE implemented scarcity pricing on August 1st.

Mr. King also reported that there was a Resource Adequacy Market (“RAM”) meeting last week in Hartford. All three ISOs participated in that meeting. A presentation was made by NERA that discussed development of the central resource market design.

Mr. King stated that Multiple Proxy bus discussions are still underway with ISO New England.

In response to a question by Mr. Scheiderich about recent problems with NERC tagging, Mr. King said that the ISO would research the problem and get back to him.

5. Presentation of candidates for position of MC Vice Chair

Mr. Oates opened the floor to discuss potential solutions in the case of vote deadlock.

Motion #4:

Motion to overturn the Chair ruling to call for a vote of the two candidates. A vote “FOR” is a vote in support of voting on Co-Vice-Chair Proposal.

(Motion passed with 62.31 % affirmative votes)

Following a discussion of whether this sharing arrangement was allowed by the By-laws and the ISO Agreement, Mr. Oates summarized that if the co-chair motion is approved, it will be a several month process before it can go into effect.

Motion #5:

Motion Concerning the Election of Management Committee Vice Chair

WHEREAS: The Management Committee failed to elect a candidate with a 58% majority support for Management Committee Vice-Chair despite three separate votes at the last meeting; and

WHEREAS: The purpose of this motion is to reach agreement that the two approved candidates, Chris Wentlent and Larry DeWitt, will share the position of Management Committee Vice-Chair from the time of the election until November 30, 2004, and will share the position of Management Committee Chair from December 1, 2004 until November 30, 2005.

Resolved: That it is the desire of the Management Committee that Mr. Wentlent and Mr. DeWitt serve as Co-Vice-Chairs of the Management Committee through November 30, 2004 and as Co-Chairs of the Management Committee from December 1, 2004 until November 30, 2005 under the following criteria: (a) Mr. Wentlent will have binding, final decision making authority for the first half of, respectively, the Vice-Chair and Chair terms that he and Mr. DeWitt share; and (b) Mr. DeWitt will have binding, final decision making authority for the second half of the Vice-Chair or Chair terms that they share.

The Co-Chairs will collaborate and coordinate on decisions for the entire period. Should either individual resign prior to the expiration of their Vice-Chair or Chair terms, the other would continue as the sole, duly authorized Vice-Chair or Chair.

Resolved, further, that if the current Chair, Mr. Joseph Oates, were to resign from office prior to November 30, 2004, the Co-Chairs shall assume their responsibilities as of the effective date of such resignation and the measurement of the first half and second half of their shared Chairmanship period shall be measured from the date they assume their responsibilities.

Resolved, further that this vote shall have no precedential effect on future votes for officers for the Management Committee, Operating Committee, or Business Issues Committee—which would continue with the expectation of single individuals holding office.

Resolved further that the Management Committee requests that ISO counsel review the By-laws and ISO Agreement to determine whether clarifying changes are required, and, if they are deemed necessary, further requests that ISO counsel draft such changes for discussion and action at the October 17, 2003 Management Committee meeting.

(Motion passed with 58.86 % affirmative votes)

6. Proposed Extension of NYISO Voltage Support Payment Program

Mollie Lampi presented a proposal to extend the voltage support program through August 2004. Ms. Lampi also discussed issues raised at the September 9th BIC meeting.

Mr. Parmelee requested the NYISO consider providing compensation for merchant transmission that has the ability to provide VAR support.

Motion #3:

The Management Committee approves amending the NYISO Tariffs to pay suppliers who provide Voltage Support service during calendar year 2004 under the same rates, terms and conditions as are applicable in 2003.

(Motion passed unanimously by show of hands)

7. Proposal for Revised Procedures for Using Load Forecasts to Calculate Installed Capacity (“ICAP”) Requirements

Mike Cadwallader, of LECG representing the TOs proposal to revise the procedures that use load forecasts to determine ICAP requirements. The goal of this proposal is to ensure that Transmission District’s ICAP requirements are calculated in a consistent manner.

Garry Brown stated that the NYISO feels that this revised proposal provides several improvements over the existing process, most important of which is the consistency that results from moving to a coincident peak.

Mr. Brown confirmed that this proposal does not affect the amount of generation that will be required. Mr. Brown confirmed that changes were made from the presentation made to the BIC to clarify that the authority to set the final forecasts rests solely with the ISO.

Motion #6:

The Management Committee hereby approves the filing of tariff changes necessary to effectuate revision to developing installed capacity requirements as described in the presentation made at the Management Committee meeting on September 17, 2003 and entitled, “Proposal for Revising the Load Forecasts for Determining ICAP Requirements” which was included in the materials distributed for this meeting. The Management Committee also directs the NYISO to prepare the specific tariff changes, with the advice of the ICAP Working Group, and present them to the Chair and Vice Chairs of the MC and BIC for approval prior to filing these changes with the FERC, which should occur no later than October 15, 2003. The Management Committee further requests that the NYISO staff prepare appropriate manual changes consistent with the detailed procedures approved at BIC on September 9, 2003 and modified to clarify the role of the NYISO, and present such manual changes to the BIC for approval no later than December 15, 2003.

(Motion passed unanimously by show of hands with abstentions)

8. Report on Proposal to accept bilateral contracts for Energy Settlements

- Withdrawn.

9. Update on RAM Process

Mr. Charlton presented an update on the Resource Adequacy Market Group (RAM).

Mr. Freilicher, of Hunton & Williams, confirmed that the NYISO would consider recommendations that come out of the RAM Group with regards to alternatives to the Demand Curve.

10. Report on FERC Order on Generation Interconnection

Mr. Brown gave an overview of the key issues associated with the NYISO filing on generation interconnection. On Sept 12th, the NYISO asked for a 90-day extension for the compliance filing (beyond the October 18th deadline).

Mr. Brown reported that the Operating Committee (OC) approved the Phase I System Planning Process.

11. Open Issues in RTS Tariff Discussions

Brad Kranz gave a status update of the RTS Tariff Development. There is another MSWG meeting scheduled on the 26th for additional review.

12. New Business

None

13. Adjourn

The meeting adjourned at approximately 2:41

NYISO Management Committee Meeting
