

Changes to EDRP Manual for 2003

Section	Topic
Various	Added language consistent with EDRP/SCR program split
2.0	Removed 25 MW cap on small customer aggregation program
5.2.1	Notes that program participants are responsible for ensuring compliance with the ultra-low sulfur fuel requirements and for the emissions testing requirements for model 1994 and older generators.
5.2.2	Clarifies NYSERDA's rules for program expense reimbursement.

Changes to EDRP Manual for 2003 (cont'd)

Section	Topic
6.1	Clarifies meter installation and reading language.
6.1.1	Clarifies that meter certification data is required only for non-revenue grade meters.
6.2.1	Notes that the CSP is responsible for CBL calculation.
6.6.4	Clarifies that the NYISO provides hourly payment information by customer to CSPs separate from the consolidated invoice.
