

Attachment Y Clean Up

John Buechler

*Executive Regulatory Policy Advisor
New York Independent System Operator*

Joint OC/BIC

*June 20, 2012
10 Krey Boulevard
Rensselaer, NY*

Scope of Clean Up Project

- ◆ Improve clarity and consistency of Attachment Y, Sections 31.1 through 31.6 of the OATT
- ◆ Avoid substantive changes
- ◆ Facilitate the NYISO's Order 1000 compliance filing

Stakeholder Process

- ◆ Staff presented proposed changes to tariff sections at ESPWG meetings in February, March, April, and May 2012
- ◆ Stakeholders provided comments, which have been addressed
- ◆ Staff also presented clean up changes to Rate Schedule 10 and draft of Rate Schedule 13
 - *Commenters raised concerns*
- ◆ NYISO will propose Rate Schedules 10 and 13 in a future stakeholder process and FERC Section 205 filing
- ◆ Final clean ups to Sections 31.2, 31.5, and 31.6 presented to ESPWG on June 18

Types of Modifications Proposed

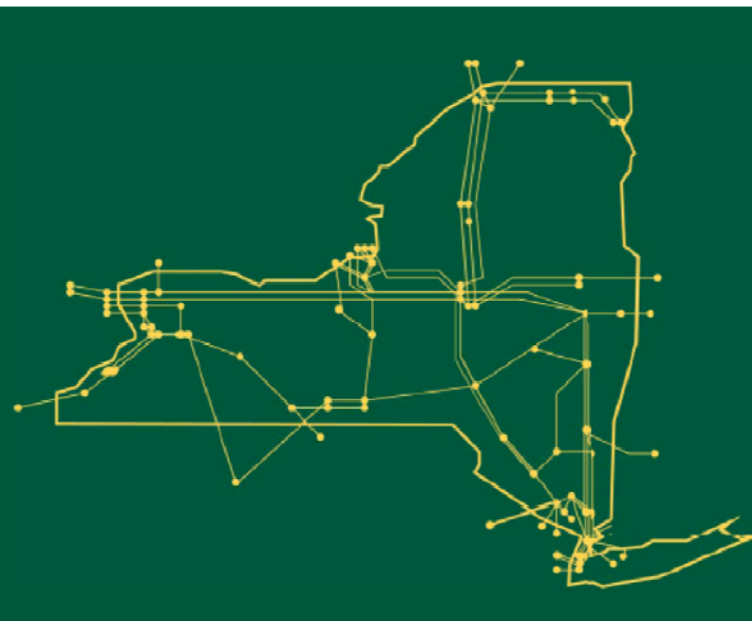

- ◆ Changes to improve consistency of terminology: substitute defined terms wherever applicable, such as “the ISO” instead of “the NYISO” and “the Commission” for “FERC.”
- ◆ Organizational changes: Re-order some subsections as appropriate and remove redundant language; renumber paragraphs and internal section references accordingly.
- ◆ Clarifying changes: Modify language to clarify the intent or to conform the tariff to actual practice.
- ◆ Examples:
 - *Section 31.2 (CRP) – several changes clarify NYISO responsibilities and timing of actions related to a backstop regulated solution*
 - *Section 31.3 (CARIS)– a clarification removes TPAS from a joint role with ESPWG for consulting on scenarios*
 - *Section 31.6 (congestion reporting) – clarify that NYISO may use an alternative to PROBE to model the unconstrained system*

Filing Schedule

- ◆ NYISO now seeks approvals to file Sections 31.1 through 31.6
- ◆ June 20 BIC/OC
- ◆ June 28 Special MC
- ◆ July 17 NYISO Board
- ◆ FERC filing in July
- ◆ FERC order in September (expected)
- ◆ October 11 NYISO Order 1000 filing

Questions?

The New York Independent System Operator (NYISO) is a not-for-profit corporation that began operations in 1999. The NYISO operates New York's bulk electricity grid, administers the state's wholesale electricity markets, and conducts comprehensive planning for the state's bulk electricity system.
