

## NYISO Joint Operating / Business Issues Committee Meeting

June 20, 2012

*Final Motions*

Motion #1:

### **BIC Motion**

The Business Issues Committee (“BIC”) recommends that the Management Committee recommend to the NYISO Board that it approve for filing at FERC the modifications to Sections 31.1, 31.2, 31.3, 31.4, 31.5, and 31.6 of the Open Access Transmission Tariff described in the presentation titled “Attachment Y Clean Up” and as presented at the June 20, 2012 BIC meeting.

Motion passed with abstentions.

---

### **OC Motion**

The Operating Committee (OC) recommends that the Management Committee recommend to the NYISO Board that it approve for filing at FERC the modifications to Sections 31.1, 31.2, 31.3, 31.4, 31.5, and 31.6 of the Open Access Transmission Tariff described in the presentation titled “Attachment Y Clean Up” and as presented at the June 20, 2012 OC meeting.

Motion passed unanimously with abstentions.

Motion #2:

### **BIC Motion:**

The Business Issues Committee (BIC) recommends that the Management Committee approve the proposed changes to Con Edison’s black start plan as described in the NYISO presentation made to the joint BIC/Operating Committee meeting on June 20, 2012.

### **Amendment to NYISO Blackstart Motion**

The NYISO blackstart motion is hereby amended as follows:

- Remove tariff language on PSC consent required to withdraw from blackstart
- For new or repowered units, blackstart will be installed if (1) Con Edison study shows need and unless (2) the generator shows that the facility is not suitable to provide black start service.
- After each blackstart test, generator will review performance and if appropriate develop a mitigation plan to address deficiencies observed. The generator would seek FERC approval for costs (and recovery period) in excess of proxy revenues.
- If generator costs exceed appropriate proxy (with the exception of costs related to the performance mitigation plan), generator would seek FERC approval for cost-of-service rate.
- Mothballed generators that return to service within 3 years must honor any remaining outstanding time in their commitment to provide service.

More details on this amendment will be presented to the MC when it considers approval of changes to the blackstart tariff.

Motion passed with 74.9% affirmative votes.

**OC Motion:**

The Operating Committee (OC) recommends that the Management Committee approve the proposed changes to Con Edison's black start plan as described in the NYSIO presentation made to the joint OC/Business Issues Committee meeting on June 20, 2012.

**Amendment to NYISO Blackstart Motion**

The NYISO blackstart motion is hereby amended as follows:

- Remove tariff language on PSC consent required to withdraw from blackstart
- For new or repowered units, blackstart will be installed if (1) Con Edison study shows need and unless (2) the generator shows that the facility is not suitable to provide black start service.
- After each blackstart test, generator will review performance and if appropriate develop a mitigation plan to address deficiencies observed. The generator would seek FERC approval for costs (and recovery period) in excess of proxy revenues.
- If generator costs exceed appropriate proxy (with the exception of costs related to the performance mitigation plan), generator would seek FERC approval for cost-of-service rate.
- Mothballed generators that return to service within 3 years must honor any remaining outstanding time in their commitment to provide service.

More details on this amendment will be presented to the MC when it considers approval of changes to the blackstart tariff.

Motion passed with 92.27% affirmative votes.
