## **NOTICE OF SDUs REQUIRING ADDITIONAL STUDY**

**RESPONSE REQUIRED ON OR BEFORE MAY 28, 2024**

May 16, 2024

TO: Class Year 2023 Projects<sup>1</sup> Requiring Additional SDU Study:

This serves as notice of the “Notice of SDUs Requiring Additional Study.”

The Class Year 2023 Study formally commenced on February 13, 2023, in accordance with the Attachment S to the NYISO OATT. On May 9, 2024, the “Class Year 2023 Preliminary Deliverability Analysis Draft Report” (Report) was posted for review by the TPAS and the Interconnection Projects Facilities Study Working Group (IPFSWG). The Report was developed in accordance with Attachment S to the NYISO OATT. On May 14, 2024, the TPAS and IPFSWG recommended the Report move forward to the NYISO Operating Committee for approval. On May 16, 2024, the NYISO Operating Committee approved the Report dated May 2024. The Report is available from the NYISO web site at [www.nyiso.com](http://www.nyiso.com), under Operating Committee – May 16, 2024 meeting materials.

The Report identifies new System Deliverability Upgrades (SDUs) in order for projects listed in Attachment A and located in Long Island Capacity Region to be deliverable. These SDUs have not previously been identified and cost allocated in a Class Year Study and are not substantially similar to an SDU previously identified and cost allocated in a Class Year Study. Therefore, pursuant to Section 25.5.10.1 of Attachment S, these SDUs require additional study in order for the respective Developers to obtain an SDU Project Cost Allocation for these SDUs.

The report approved by the NYISO Operating Committee on May 16, 2024 provides a high-level non-binding total estimated costs of \$328 million with +/- 50% for five (5) SDUs in the Long Island Capacity Region requiring additional study.

In accordance with Section 25.5.10.1 of Attachment S to the NYISO OATT, each Class Year project to which this notice is issued must respond to the NYISO by the first Business Day following 10 Calendar Days of this Notice—on or before May 28, 2024—to indicate whether it elects to proceed or not proceed with Additional SDU Study for the identified SDU for its project. Specifically, **by no later than May 28, 2024**, each Developer receiving this notice must notify the NYISO (via email to [InterconnectionSupport@nyiso.com](mailto:InterconnectionSupport@nyiso.com)) to indicate whether the Project elects to proceed or not proceed with an Additional SDU Study for the identified SDUs.

If the NYISO does not receive an election from the Developer by the deadline, the Developer will be deemed to have notified NYISO that it elects to not proceed with Additional SDU Studies.

If the Developer does not elect to pursue an Additional SDU Study for required SDUs, it may only accept or reject its Deliverable MW, if any, in the Class Year 2023 Study.

---

<sup>1</sup> See Attachment A to this notice for the list of Class Year 2023 Projects subject to Additional SDU Studies.

If you have any questions, please send an e-mail to [InterconnectionSupport@nyiso.com](mailto:InterconnectionSupport@nyiso.com).
