
Business Intelligence project update

Pricing Data Mart

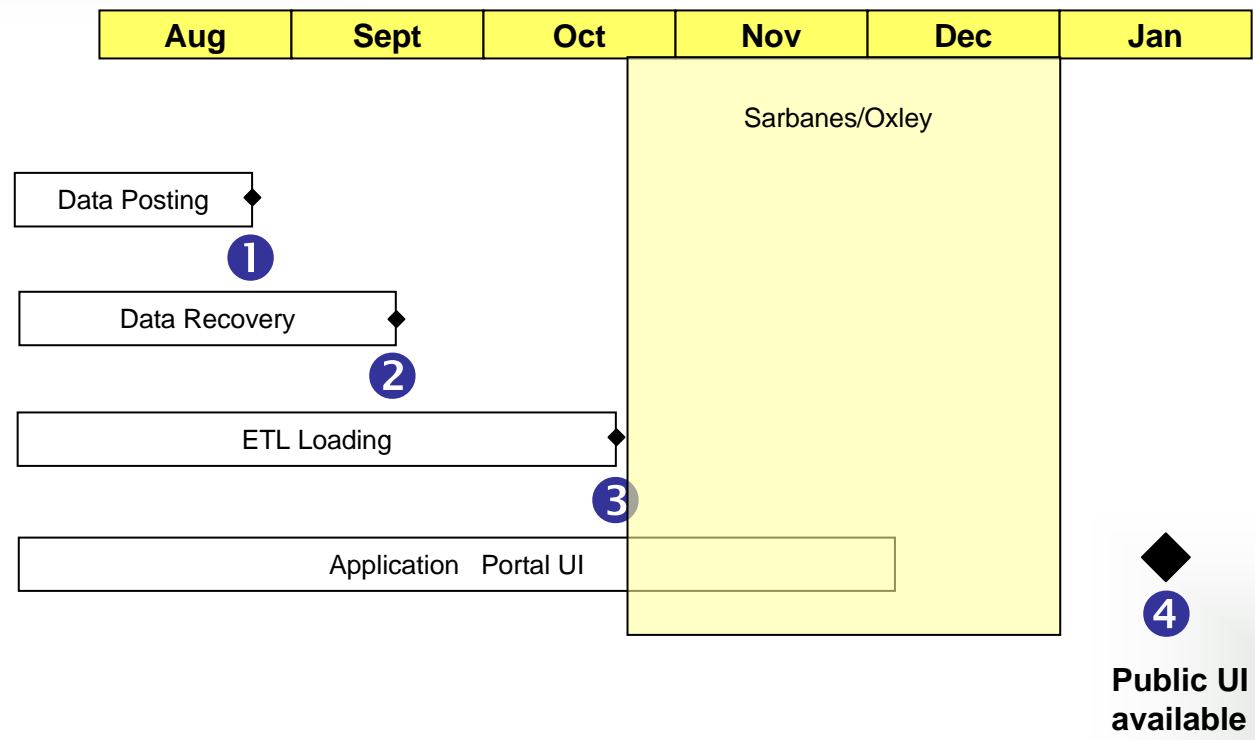

BITF September 14, 2006

Deliverable Summary

- ◆ New Pricing data mart in the Decision Support System (DSS) environment
- ◆ It will contain a versioned history of posted OASIS prices
 - *Including DAM / HAM / RT - Energy / Ancillary Services ***
- ◆ It will also contain history of additional price related OASIS information
 - *Including Loads / Flows / Forecasts ***
 - *** length of time for data retention will be subject to cost/benefit analysis*
- ◆ Will build on existing DSS foundation allowing access to analysis, trending and reporting tools currently available with the Customer Settlements data mart by registered users
- ◆ Will have an easily accessed User Interface directly from the portal for use by anyone
- ◆ Is readily expandable to add additional sets of data in the future.
- ◆ There will be limits on size of data sets requested per user query.
- ◆ Data will be available next day (in this initial version)

Updated Deployment Schedule

- ◆ 4 Phased deployment of new system

User Access to data

- ◆ Public access through www.nyiso.com
 - *Filtering capability*
 - *Choice of output format*

- ◆ Signed users access through Business Objects
 - *Additional 'slicing and dicing' capability through BO*
 - *Creation of custom reports*

Enhanced Portal UI

- ◆ The Business Intelligence Task Force has held two Webex product walkthroughs to date.
- ◆ Based on input from those calls, an easier to access UI has been designed.
- ◆ Access will be directly from OASIS and will not require a login or certificate.

- ◆ Note: The following screens are preliminary and may not reflect the final look and feel.

- Pricing Data
- Power Grid Data
- Load Data
- Reports & Info
- Zone Maps
- Graphs
- Market Access
