

Unforced Capacity Deliverability Rights for External Ties

ICAP WG Meeting 8/29/2005

UDRs – Current Process

- NYISO will award UDRs for “new” transmission facilities
 - Based on an estimate of performance
 - Amount may be revised based on actual performance
- UDR award is made for the life of the facility
- Assumption reflected in NYSRC IRM study
 - Until awarded, the transmission capability associated with the “new” facility is included as emergency transfer capacity
 - Once awarded, the transmission capability associated with the “new” facility is considered capacity located in the Locality of the terminus of the facility in the NYCA

UDRs - Proposal

- Revise NYISO Market Service Tariff to reflect UDRs as awards for non-regulated transmission facilities
- UDRs may be requested by submitting a formal request to the NYISO's Manager of Auxillary Market Operations
- A maximum amount of UDRs will be awarded for the non-regulated transmission facility
 - Based on an estimate of performance
 - This initial amount may be revised based on actual performance
 - The UDRs will be awarded for the life of the facility

UDRs - Proposal

- Annually, the developer of the transmission facility shall declare to the NYISO the amount of UDRs to be claimed for the next Capability Year by August 1 of the year prior to that Capability Year
- The NYSRC can reflect this value in the IRM study for the upcoming Capability Year
 - The claimed UDRs would be modeled as capacity in the Locality of the terminus of the facility in the NYCA
 - Any remaining transmission capability not claimed as UDRs would be modeled as emergency transfer capacity
