August 13, 2013

NYISO, Rensselaer, NY

Topics

- ◆ **Overview of ICAP Manual Revisions**
- ◆ **Next Steps**

OVERVIEW OF ICAP MANUAL REVISIONS

Definitions

- ◆ **Remove references in the manual to definitions that are now explicit in the tariff**
 - ***Example: Average Coincident Load***
 - **In April 2011, Average Coincident Load was fully described in the ICAP Manual. FERC's acceptance of ACL required that the NYISO incorporate the section for Average Coincident Load into its tariff, which it filed in May 2011.**
 - **The language in the ICAP Manual that defines the Average Coincident Load is redundant with the tariff**
 - **Any ICAP Manual language relevant to procedures of ACL will be retained or updated as necessary to incorporate the proposed changes**

ACL, Provisional ACL, and Incremental ACL - ICAP Manual Sections 4.4 and 4.12

- ◆ **In addition to removing references that will become explicit in the tariff, updates to the ICAP Manual will make the references to ACL and Provisional ACL consistent with the proposed tariff language**
- ◆ **A new section will be added to describe the procedures for Incremental ACL**
- ◆ **Updates will be made to incorporate the add-back procedures for DADRP and DSASP**

SCR Change of Load and SCR Change of Status - ICAP Manual Sections 4.3 and 4.12

- ◆ **In addition to removing references that will become explicit in the tariff, updates to the ICAP Manual will make the references to SCR Change of Load and SCR Change of Status consistent with the proposed tariff language**
- ◆ **A new section will be added to describe the new testing requirements for SCR Change of Status**
- ◆ **Updates will be made to reporting procedures as presented for each Qualified Change of Load Condition or Qualified Change of Status Condition**

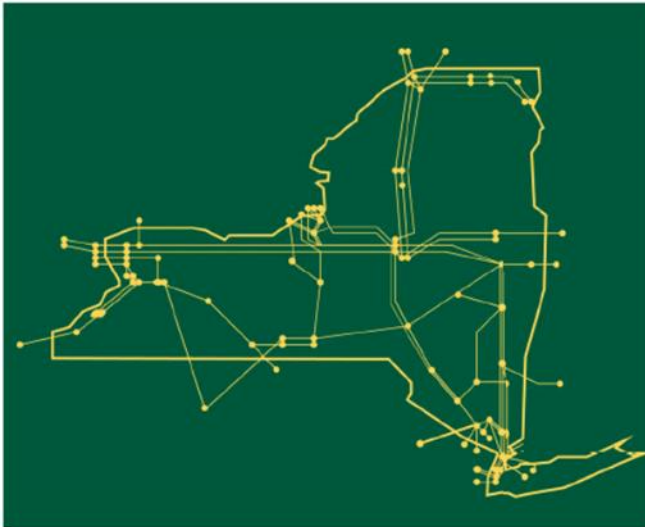

Shortfalls, Deficiencies, and Failure to Report Penalties - ICAP Manual Sections 4.3, 4.4, and 4.12

- ◆ **Updates in the corresponding sections of the ICAP Manual will be made to reference the proposed changes to sections 5.12.12.2 and 5.14.2 of the tariff**

Next Steps

- ◆ **August 14: Business Issues Committee**
- ◆ **August 20: Management Committee**
- ◆ **September: Board of Directors**
- ◆ **September: Tariff filing**

The New York Independent System Operator (NYISO) is a not-for-profit corporation responsible for operating the state's bulk electricity grid, administering New York's competitive wholesale electricity markets, conducting comprehensive long-term planning for the state's electric power system, and advancing the technological infrastructure of the electric system serving the Empire State.
