Market Performance Highlights for September 2005

- NYISO Average LBMP and Average Cost have increased this month relative to August.
 - LBMP for September is \$122.44/MWh, up from \$115.20/MWh in August.
 - Average cost is \$126.16/MWh, up from \$119.56/MWh in August.
 - Day Ahead LBMPs have increased while Real Time LBMPs have decreased this month.
- Fuel have continued to increase this month
 - Kerosene is \$15.79/mmBTU, up from \$14.17/mmBTU in August
 - No. 2 Fuel Oil is \$13.90/mmBTU, up from \$12.82/mmBTU in August
 - Natural Gas is \$13.41/mmBTU, up from \$10.32/mmBTU in August
 - No. 6 Fuel Oil is \$9.97/mmBTU, up from \$9.07/mmBTU in August
- Uplift per MWh has decreased this month relative to both August 2005 and September 2004.
 - Uplift (not including NYISO cost of operations) is \$1.71/MWh, down from \$2.86/MWh in August 2005 and down from \$1.77/MWh in September 2004.
- Volatility in Real Time prices has decreased
 - The standard deviation of real time prices is \$42.92 down from \$103.00 in August 2005
- Regulation Prices are up this month in all markets.

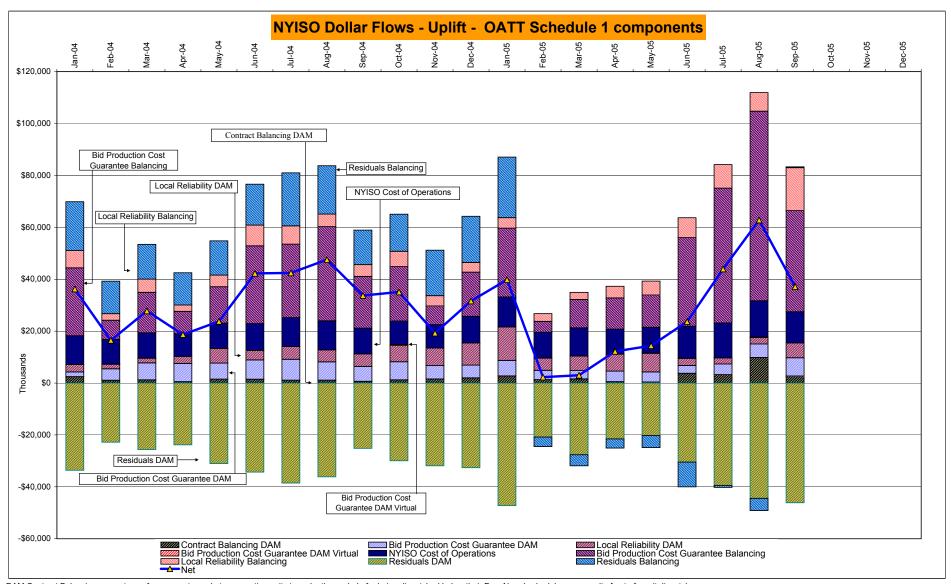

^{*} Excludes ICAP payments

^{*} Excludes ICAP payments

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.

DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.

DAM residuals are revenue charged or returned to customers due to the under or over collection of funds. On this chart, negative values represent funds returned to Transmission Customers (through Transmission Owners' Transmission Service Charges).

⁺ Balancing Energy: Load(MW) purchased at Real Time LBMP.

Notes: Percent totals may not equal 100% due to rounding.

Virtual Transactions are not reflected in this chart.

^{*} The signs for the detail section intuitively reflect the direction of power flow eliminating the use of double negatives when Balancing Energy is negative.

Project Status Updates

October 11, 2005

Release Content - October

15 Minute Scheduling

- Functionality: Enhance SMD2 functionality to permit economic energy scheduling for units incapable of responding to five minute dispatch signals in the real-time market. This change will perform 15 minute economic dispatch for nominally off-dispatch units during the Real Time Commitment execution and reflect those schedules into the Real-Time dispatch process.
- Scheduled to deploy October 11, 2005

Enhancements

- Pricing enhancement Islanded Bus
- Scheduled to deploy October 11, 2005

Release Content - October

NTAC / TSC

- Functionality: Modification of BAS software to eliminate TSC charges to TO's and NTAC charges by NYPA between NYISO and ISO-NE. Delivery of interface, consolidated invoice, and adjustment tool.
- Scheduled to deploy October 11, 2005

Rate Schedule 1

- Functionality: Implementation of Billing and Accounting System (BAS) software changes to facilitate the automatic calculation and allocation of LSE and Power supplier Rate Schedule #1 charges in BAS.
- Scheduled to deploy October 11, 2005

Release Content - October

Start Up / Shut Down

- Functionality: The creation of a manual NYISO process, which will allow generators to designate when they are in start up/shut-down mode. This would allow the unit from being subject to performance penalties and would be paid the real time LBMP for all energy produced during the start up / shut down period.
- New Process to be implemented mid October

Release Content - December

Intranet

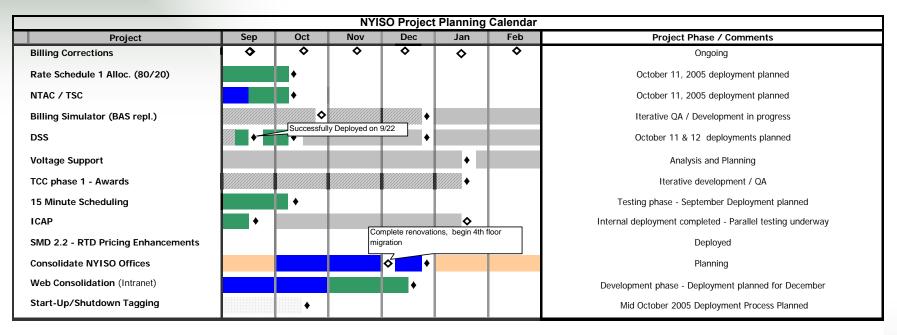

- Functionality: Standardization of the NYISO intranet site. The Documentum application will be utilized to address publishing content management. This project will also eliminate legacy technology currently in place.
- Deployment scheduled for December 2005

Project Status

ICAP

- Application was deployed to production in September for internal access only. Application go live has been postponed to allow for parallel testing of the manual and automated process.
- New go live date to be determined.

Release Planning Calendar

	Кеу
Analysis	Market Testing
Development	Planning
Iterative Dev/QA	◆ Target Milestone
QA	 Scheduled Deployment Date

P	roject Description	Status and Milestone Deliverables
	Billing System Corrections (Baseline)	Status: Billing system problem resolution continues on a regular basis by a dedicated team of development staff. Once identified, billing issues are reviewed, solutions are designed, and fixes are applied at the first feasible deployment opportunity. Deliverables: The NYISO has allocated a team of development and analyst staff to investigate all reported billing problems, design solutions to correct known issues, and implement fixes in order to provide the most accurate
A636	Billing Rate Schedule 1 Allocation 80/20	Status: Functional Requirement Specification completed on March 15 th . Design and Development have been completed, testing in progress. Scheduled to deploy October 11, 2005. Deliverables: Implementation of Billing and Accounting System (BAS), software changes to facilitate the automatic calculation and allocation of LSE and Power supplier Rate Schedule #1 charges in BAS.
A716	Billing: NTAC & TSC Rate Management	Status: Functional Requirement Specification completed April 30, 2005. Design specification completed August 1 st . The deployment schedule has been changed. Scheduled to deploy October 11, 2005. Deliverables: Modification of BAS software to eliminate fees (TSC charges to TO's and NTAC charges by NYPA) between NYISO and ISO-NE, which are due to be billed beginning of December 2004. Develop interface for MP's to enter TSC and NTAC Rates. Automation of manual processes within settlements. Delivery includes a BAS – NTAC interface, consolidated invoice, allocation adjustment tool, Web interface and distribution factor process. Modify TSC calculator to use newly created summary and detail pages. Modifications for TSC MW reporting to transaction customers on hourly statement.
A799	Billing Simulator - BAS Replacement Strategy	Status: Vendors have been selected and development is in progress to deliver use case functionality. Multiphase deliverables are planned. Functionality is to be deployed to production June through December, 2005. Phase I use case delivery was completed, phase 2 use case includes 36 use cases of which 30 have been delivered. Phase 3 is scheduled to complete in December and includes delivery of an additional 36 use cases. Phase 3 development will complete in November. Deliverables: Continuation of development and enhancements to the current system. Implementation of remaining settlement rules (SMD2 and legacy), and build foundation for potential BAS replacement. Design, develop and implement remaining use cases (approximately 100) into a production environment by December 31, 2005.
A795	DSS - Customer Settlement	Status: Scheduled to deploy enhancements to support October release (October 11 and October 12) Deliverables: DSS has multiple releases planned for this year. March - Phase I FERC EQR (completed). Reporting to help MP's obtain NYISO data to include as part of their filing to FERC. In this release, the NYISO will provide the mechanism to download the report, existing data elements in the DSS. Planned Business Objects upgrade will be deployed at a later date due to vendor bug issues discovered in testing and not yet resolved. April – Business Objects upgrade (completed).

_ P	roject Description	Status and Milestone Deliverables
		May – Provide enhanced reporting capability related to Controllable Tie Lines. (completed) June - Modify sign of data elements in the DSS to be consistent with NYISO sign convention. This will help MP's tie out DSS reporting to invoices. FERC Reporting phase II to provide additional manual adjustment and data elements. Minor application enhancements, bug fixes, and internal process improvement (ETL Production Verification Automation) will also be bundled into this release. August – Provided enhancements related to BIG issues. September release – Custom Automated Data Delivery (CADD) - Provide users with the ability to get specific DSS data elements of interest and have the data delivered via a machine-to-machine process. Users can create custom defined reports that can be refreshed and retrieved on a recurring basis via ADD. Quarter 1 of 2006 release content is in the planning phase.
A541	TCC Online Auction Automation	**note some of the listed functionality is from baseline budget Status: The requirements generation for the TCC Auction Automation project was partially completed in 2004, following the review of the TCC auction processes performed by Bearing Point. The requirements process was revisited in order to ensure that the recommendations that were presented can be fully incorporated in the delivered product. An RFI/Vision document, straw man timelines, and executive summary with detail to determine the 'buy v. build' strategy was completed. Currently developing detailed requirements and planning deliverables for the build solution. The Awards processing is the planned first phase deliverable. Testing is in progress for the phase 1 Awards processing automation and NYISO is planning production delivery in January 2006. The data validation tool effort continues (50 validation tools have been implemented.) Deliverables: This project will take a phased approach to fully automate the TCC auction and data validation processes. Early phases will produce a set of data validation tools that will compliment the current processes. Final delivery will produce user interfaces that can support the online data entry, reporting of TCC auction information, and provide auction data to the auction analysis products. It is anticipated this project will continue into 2006.
A543	ICAP Market Automation	Status: Verification testing by Auxiliary market operations was completed. Schedule was adjusted to address Market Participant sandbox testing, and two (2) market trials. Market Trials started on June 9 and ended on August 12. Technical Conferences were held on March 21, 2005 and May18, 2005. Application was deployed to production for internal access only. Application go-live has been postponed to allow for parallel testing of the manual and automated processes. New go-live date to be determined. Deliverable: An automated application to run the ICAP market, also implementing a security model for single sign-on. Allow Market Participants to place bids and offers via the web or upload templates, execute the monthly and strip auctions, perform certification, run the spot auction and post the results and bills.
A764	15 Minute Scheduling	Status: Deployment scheduled for October 11 th to ensure adequate testing. Testing is in progress with no major issues to report.

Р	roject Description	Status and Milestone Deliverables
		Deliverable: FERC mandated feature required to be implemented within 150 days of SMD go live date. This project will offer Market Participants more flexibility with their Real Time Bid Management, and enhance SMD2 functionality to address the loss of price chasing capability of units incapable of responding to five minute dispatch signals. The new software will perform 15-minute economic dispatch scheduling for nominally off-dispatch units during the Real-Time Commitment (RTC) execution and reflect those schedules into the Real-Time Dispatch (RTD) process.
		Status: This project is in the concept development phase.
A769	Scheduling of Combined Cycle Units	Deliverables: Market Participants have historically expressed concern that NYISO does not model or schedule combined cycle generating units to their most efficient capabilities, thus impacting both real-time operations and market outcomes. This project will deliver a scheduling software solution and network modeling optimization for combined cycle generating units. Software will perform 15-minute economic dispatch scheduling for nominally off dispatch units during the real-time commitment execution and reflect those schedules into the real-time dispatch process.
		Status: Construction documents for all 4 th floor renovations were completed 9/1/05. Construction RFQs were written and sent to potential contractors 9/15/05. Proposals were returned to BBL from all the contractors performing work for the 4 th floor renovation on 9/29/05. A budget review was performed and BBL's recommendations were submitted to NYISO for review and approval. Construction on 4 th floor began on 10/3/05. First leg of the telecommunications cable connecting the PCC to the new building was completed 10/4/04. Second leg due to be completed by 10/30/05. Proposed first move scheduled for 12/2/05. Development of construction documents for entire building is in progress and is due to be completed by 11/2005.
A775	Consolidate NYISO Offices	Milestones: July 8, 2005 Close on the building (completed); November, 2005 Completion of 4th floor renovations (ontrack); December 31, 2005 Migration out of Washington Avenue and onto the 4th floor of the new HQ building (ontrack).
		Deliverables: This project seeks to secure during 2005 ~150,000 square feet of office space to include administrative offices, alternate control center and back-up IT/disaster recovery functionality. During 2006, this facility would replace the current NYISO locations at Washington Avenue, Wolf Road, and Western Turnpike.
	Web Consolidation (Intranet)	Status : Functional Requirement completed July 19 th . Design specification is scheduled for completion August 29 th , and a December deployment is planned.
A823		Deliverables: The next phase of the project addresses development of a standardized NYISO intranet site. The Documentum application will be utilized to address publishing standardized content management for both internal and external documents. This project will also eliminate legacy technology currently in place.
	Documentum	Status: This project is being addressed in phases with the Web Consolidation projects.
A771	Expanded Implementation	Deliverables : NYISO has a growing number of critical business documents, which are information assets and need to be managed as such. Documentum provides the tools to manage these critical documents. In addition, documentum

Р	roject Description	Status and Milestone Deliverables
		can satisfy the demand for increased efficiency, quality and control in the document life cycle process through an enterprise-wide repository for all documents, automation of life cycle processes, document retention/archival, and SAS 70 compliance requirements. Documentum will provide a number of key functionality including: version control, workflow, check-in/out, document level security, full text search, and e-mail integration and tracking. Status: The project is currently being tested and 'go live' process start is scheduled for mid October.
A824	Start-Up/Shut-Down Tagging	Deliverables: The creation of a manual process, which would allow generators to designate when they are in start-up/shut-down mode. This would allow the unit from being subject to performance penalties and would be paid the rea time LBMP for all energy produced during the start-up/shut down period.
		Completed
	RTD Pricing	Status: Project was successfully deployed into production on Tuesday, August 16, 2005 after several attempts were cancelled due to system compromising weather conditions.
A821	Enhancements / SMD 2.2	Deliverables: Deliverables include remaining critical and high System Problem Reports (SPRs) as well as an enhancement to software for RTD pricing.
A658	Facilitated 3 Transaction Check Out	Status: The deployment was rescheduled from June 29, 2005 to July 5, 2005 due to system conditions. Software was successfully deployed on July 5, 2005. Post deployment verification process is underway.
AUJU		Deliverables: Further implementation of the Facilitated Transaction Check Out Web Service. This will allow NYISO Operations to view transaction data from other control areas during the check out process.
		Status: Deployed May 31, 2005.
A774	SMD 2.1	Deliverables: Following the implementation of SMD2 and its suite of applications, it is expected that a subset of planned functionality will fail to make the initial release. Included in this feature set is the original project Phase2b and Phase 3 features; these items are SMD2 post-live requirements as defined.
A780	e-Tagging 2.0	Status: The deployment was rescheduled from June 28, 2005 to July 5, 2005 due to system conditions. Software was successfully deployed on July 5, 2005. Post deployment verification process is complete.
71700	o ragging 2.0	Deliverables: Provide more flexibility in approval / denial of E-Tag requests. Prevent MIS bids with "Phantom" TagID's from flowing if not created by T-20.
		Status: Deployed May 31, 2005.
A619	Controllable Tie Lines Scheduling & Pricing	Deliverables: This project will provide an external proxy bus representation for controllable tie lines (HVDC and/or PAR) which span two control areas. The project addresses both the external node pricing calculations as well as scheduling of primary and secondary party transactions. It also includes additional changes necessary for NY/NE coordination for the Cross Sound Cable project.

Pi	roject Description	Status and Milestone Deliverables
4/00	Web Consolidation /	Status: Technical components deployed on <i>April 26, 2005</i> . Site cut over completed May 24, 2005.
A699	Market Data Exchange (Portal)	Deliverables: Primary deliverable is to combine the existing two NYISO web sites. (MDEX.com and NYISO.com) Also enhancing Web publishing functionality and migrating to standardized security. Additional Portal release will be scheduled in 2005.
A E 7 2		Status: SMD2 was deployed on 02/01/2005
A573 A574 A577	SMD 2.0	Delivery: SMD2's EAI monitoring solution is supporting SMD parallel operations, allowing proactive management of EAI processes in the SMD2 production environments. The second phase of the monitoring solution (enhanced reporting for computer operators).
		Status: Completed. November 2004
A757	Billing: TCC Settlement	Deliverables: This project provides for changes to the BAS to allow for calculation and billing of settlements associated with TCC surcharges and tracking of working capital accounts as required in the TCC Settlement Agreement approved by FERC in July 2004.
		To be Scheduled
A767	MIS Enhancements: Comprehensive Bid Management System	Status: This project has not yet started. Deliverables: This project will upgrade the web-based application structure to replace overlapping applications by
	- Wanagement System	allowing common components to support current application functionality and future application functional growth. Status: This project has not yet started.
		Status. This project has not yet started.
A770	Outage Schedule Reporting	Deliverables: The Outage Scheduling software was moved entirely to the Ranger system for both Scheduling and Operations to provide consistency. Due to the timeframe for the SMD2 project, the processes of creating the Outage Schedule reports on the primary database was left on a secondary database. The creation of the required reports needs to be ported to the RANGER system as intended.
A766	Self Supply of Reserves	Status: This project has not yet started.
		Deliverables: FERC has ordered that the NYISO markets be expanded to provide a mechanism for Market Participants to self-supply for reserves. Project will need to be readdressed later in the year.

-	Project Description	Status and Milestone Deliverables
A706	Intra-Hour Transaction Scheduling (a.k.a. VRD)	Status: This project has not yet started. Deliverables: In 2005, NYISO will conduct a pilot project to assess the ability to evaluate and schedule intra-hour transactions and to identify any operational issues with scheduling. Additional work in 2005 will be based on the outcome of the pilot program, however, it is not expected that any significant software development will be completed in 2005.

NYISO REGULATORY FILINGS – SEPTEMBER 2005

Sept. 1, 2005	NYISO tariff filing to eliminate the sunset provisions of the Day-Ahead Demand Response Program and the Emergency Demand Response Program (ER05-1437-000)
Sept. 2, 2005	NYISO tariff filing to allow Market Participants the option of electing to invest their cash collateral deposits in a choice of two bond funds (ER05-1433-000)
Sept. 6, 2005	NYISO filing of an answer to PSEG's reply to NYISO's 6/2/05 refund report (EL01-19-006, EL02-16-006)
Sept. 8, 2005	NYISO filing of initial comments with the NYSDPS regarding their motion to establish policies and procedures concerning generation unit retirements (Case 05-E-0889)
Sept. 12, 2005	NYISO compliance filing of its ninth biweekly informational report addressing price and software corrections (ER04-230-009)
Sept. 12, 2005	Third party filing of an answer to NYISO's answer to a protest filing regarding NYISO's 7/21/05 report on settlement and customer credit policies (ER03-552-011, ER03-984-009)
Sept. 13, 2005	NYISO compliance filing of a report on the feasibility of enhanced generating unit bidding flexibility (ER04-230-016
Sept. 16, 2005	NYISO filing of an answer to a third party comment regarding NYISO's filing involving transmission facilities related to interconnection projects following completion of cost allocation studies (ER05-1290-000)
Sept. 16, 2005	NYISO filing of a request for extension of time to implement fifteen-minute scheduling and for expedited commission action (ER04-230-002)
Sept. 20, 2005	NYISO compliance tariff filing of fifteen-minute generator scheduling in the real time market (ER04-230-017)
Sept. 21, 2005	NYISO filing of a response to questions from stakeholders in connection with the economic dispatch study required by Section 1234 of the Energy Policy Act of 2005
Sept. 22, 2005	NYISO filing of a motion to intervene regarding the Connecticut Representatives complaint v ISO-NE regarding compensation of generators in Connecticut (EL05-150-000)
Sept. 23, 2005	NYISO Section 205 Services Tariff filing regarding sales tax issues (ER05-1507-000)
Sept. 23, 2005	Third party filing of a motion to intervene regarding the NYISO tariff filing to allow Market Participants the option of electing to invest their cash collateral deposits in a choice of two bond funds (ER05-1433-000)

Sept. 26, 2005	NYISO filing of its tenth biweekly SMD2 price corrections report (ER04-230-004)
Sept. 28, 2005	NYISO filing of a request for extension of time to submit its self supply compliance filing and request for expedited action (ER03-836-004)
Sept. 30, 2005	NYISO filing of its second status report regarding a deliverability analysis and stakeholder discussions (ER04-449-003/007/008)
Sept. 30, 2005	NYISO filing of a request to change the name of NYISO counsel on the service list of docket involving the deliverability analysis (ER04-449-004/007/008)
Sept. 30, 2005	Joint NYISO, PJM and PSEG filing of a compliance status report regarding implementation of the Operating Protocol between PSEG and Con Ed for two transmission service contracts (EL02-23-004, et al.)

This list is current as of 1:00 P.M. October 3, 2005.

FERC ORDERS – SEPTEMBER 2005

- Sept. 1, 2005 FERC notice granting NYISO's request for an extension of time to submit a compliance filing regarding implementation of the 15-minute scheduling option (ER04-230-002)
- Sept. 12, 2005 FERC letter order accepting the joint NYISO and NMPC compliance filing of a revised transmission service charge rate (ER97-1523-084/085)
- Sept. 14, 2005 FERC letter order accepting NYISO's compliance filing on rules for the release of unused capacity on the Cross-Sound Cable (ER05-727-001)
- Sept. 15, 2005 FERC order denying NYISO's 7/25/05 request for rehearing and grants motion for clarification regarding its automated mitigation procedures (ER04-230-012, ER01-3155-010, ER01-1385-019, EL01-45-018)
- Sept. 15, 2005 FERC order denying two third party requests for rehearing of the 4/21/05 ICAP Demand Curve Order (ER05-428-003)
- Sept. 19, 2005 FERC notice granting NYISO an extension of the effective date to implement the 15-minute scheduling option required by the 8/10/04 order in the RTS docket (ER04-230-002)
- Sept. 28, 2005 FERC letter order accepting for informational purposes the NYISO's 6/1/05 demand response compliance report (ER01-3001-012)
- Sept. 30, 2005 FERC letter order granting NYISO authorization to recalculate certain past persistent undergeneration charges (EL05-144-000)
- Sept. 30, 2005 FERC letter order accepting tariff revisions to prospectively exempt generators that are not providing Regulation Service from paying persistent undergeneration charges and to make overgeneration compensable during Start-Up and Shutdown Periods (ER05-1291-000)
- Sept. 30, 2005 FERC notice granting NYISO a 14-day extension of time so that it can evaluate reserves pricing and availability under the new real time system market design prior to making its compliance filing (ER03-836-004)

This list is current as of 10:05 A.M. October 3, 2005.
