Market Performance Highlights for November 2009

- LBMP for November is \$37.88/MWh, down from \$39.73/MWh in October 2009.
 - Average monthly cost is \$41.40/MWh, slightly down from \$42.86/MWh in October 2009.
 - Day Ahead and Real Time LBMPs have decreased from October 2009.
- Average daily sendout is 401GWh/day in November, slightly up from 400GWh/day in October 2009 and lower than the November 2008 sendout of 424GWh/day.
- Gas prices are down this month while other fuel prices are up compared to last month.
 - Kerosene is \$15.15/MMBtu, up from \$14.94/MMBtu in October.
 - No. 2 Fuel Oil is \$14.06MMBtu, up from \$13.69/MMBtu in October.
 - No. 6 Fuel Oil is \$12.12/MMBtu, up from \$11.42/MMBtu in October.
 - Natural Gas is \$3.97MMBtu, down from \$4.37/MMBtu in October.
- Uplift per MWh is up from the previous month.
 - Uplift (not including NYISO cost of operations) is \$1.10/MWh, up from \$0.75/MWh in October.
 - No Thunderstorms Alerts were called in October (\$0.00/MWh)
 - The Local Reliability Share is \$0.73/MWh
 - The Other Share is \$0.37/MWh
 - Total uplift (Schedule 1 components including NYISO Cost of Operations) is higher than October 2009.

* Excludes ICAP payments.

* Excludes ICAP payments.

These numbers reflect the true-ups through June 2009.

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches. DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart. DAM residuals consist of both energy and loss revenue collections and payments. By design, there is a net over collection of revenues due to the difference between the marginal losses paid to generation and the average losses charged to loads.

Alert State Declarations:

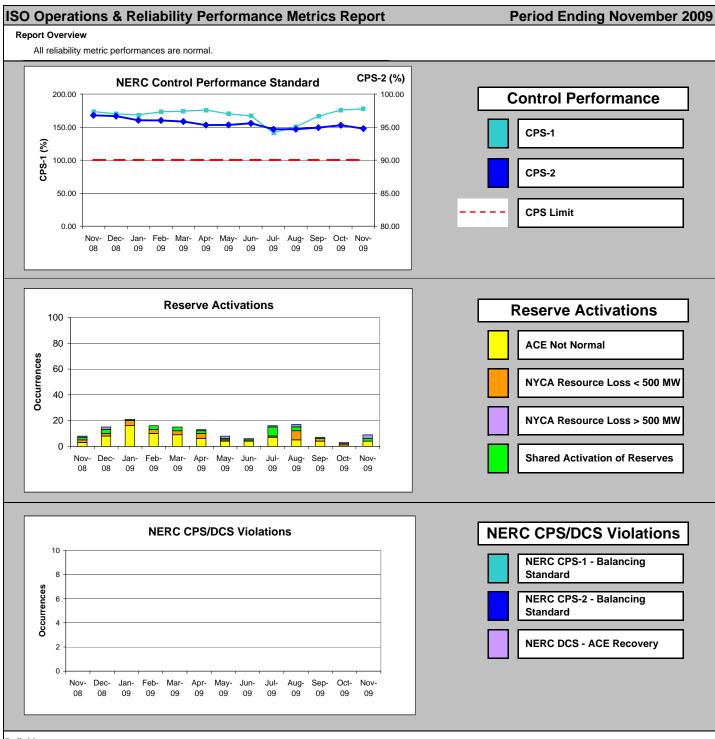

The number and causes of Alert State declarations reflect system operating conditions beyond thresholds associated with Normal and Warning States. Declaration of the Alert State allows the NYISO to take corrective actions not available in the Normal and Warning States.

Major Emergency State Declarations:

The number and causes of Major Emergency State declarations reflect system operating conditions beyond thresholds associated with the Alert State. Declaration of the Major Emergency State allows the NYISO to take aggressive corrective actions not available in the Alert State.

NERC IROL Time Over Limit:

For IROL violations leading to Major Emergency State declaration, the average time for which the limit is exceeded. NERC requires IROL violation reporting for individual event durations of thirty minutes or greater.

Definitions

Control Performance Standards:

The values of NERC Control Performance Standards (CPS-1 and CPS-2) are indicators of the NYISO Area resource and demand balancing performance. Reserve Activations:

The number and causes of NYISO Reserve Activations are indicators of the need to respond to unexpected operational conditions within the NYISO Area or to assist a neighboring Area (Shared Activation of Reserves) by activating an immediate resource and demand balancing operation.

NERC Control Performance Standard/Disturbance Control Standard (CPS/DCS) Violations:

The number and causes of NERC CPS/DCS violations reflect system operating conditions beyond thresholds associated with applicable NERC reliability standards.

Definitions

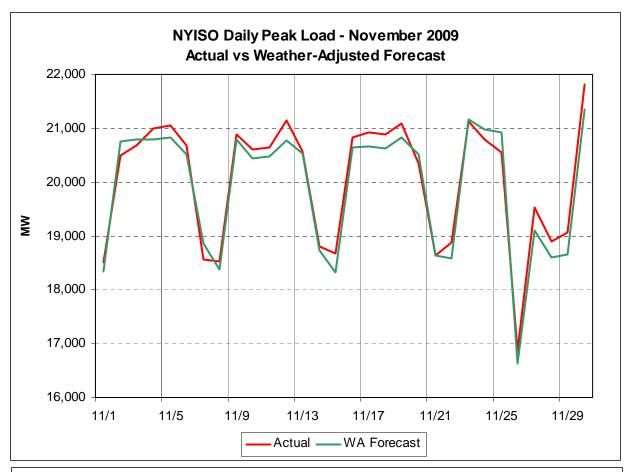

Load Forecast Error

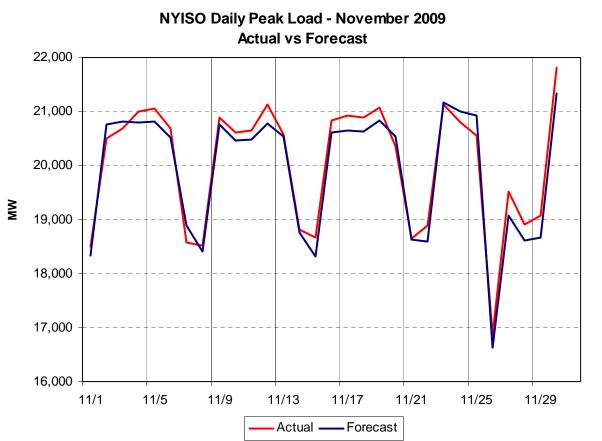

Absolute value of the difference between the hourly average actual load demand and the average 60-minute forecast load demand.

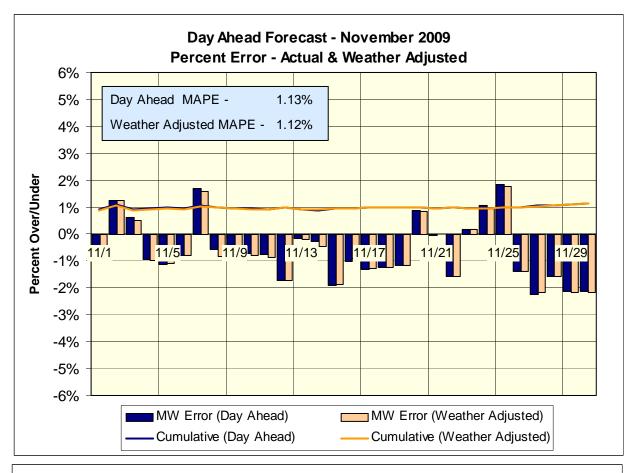

Average Hourly Error % - Average value of the ratio of hourly average error magnitude to hourly average actual load demand.

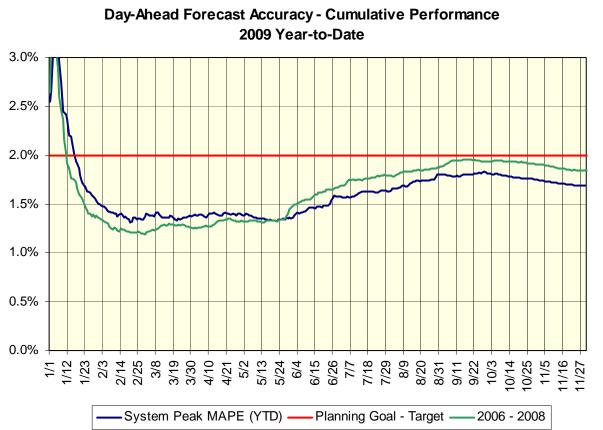

Wind Forecast Error:

Absolute value of the difference between the hourly average actual wind generation and the average 60-minute forecast wind generation. Wind Nameplate Capacity - Maximum value of installed NYCA wind generator capacity.

Description

Status and Milestone Deliverables

	Energy Marketplace	Product Enhancements
A767 Compre	MIS Enhancements: Comprehensive Bid Management System	Status: The first phase of this multi-phase project was successfully deployed into production in January 2007; the second phase was deployed on schedule in October 2007. The features that were deployed include the replacement of the load bidding and virtual bidding forms and upload / download templates. Phase 3 was implemented in two deployments during 2008, resulting in the successful migration of the generation bidding pages and templates onto the new architecture. The project is scheduled to conclude in 2009 with two deployments planned to complete work on MIS Administrative functions (Phase 4) as well as data model improvements (Phase 5). Phase 4 was successfully deployed in March. This project is complete.
	Wanagement of stern	Deliverables: This project will upgrade the web-based application structure to replace overlapping applications by allowing common components to support current application functionality and future application functional growth. One of the deliverables will be the implementation of a more flexible and reliable application infrastructure for the market applications. This project is part of a multi-year effort that is a necessary precursor for an eventual replacement of the Market Information System (MIS) and related bidding and scheduling applications.
A905	Trading Hubs (F.K.A. Netting of Bi- Laterals)	 Status: Using the NYISO bidding and scheduling system, a market participant will be able to establish transactions to purchase power from a portfolio of generators and deliver that power to a zonal trading hub. Using the same set of tools, the market participant can also establish separate transactions to sell that power, or portions thereof, from the trading hub to a portfolio of load serving entities. This project was successfully deployed in September. This project is complete. Deliverables: This project will establish zonal trading hubs in the NYISO market systems that provide more flexibility in scheduling of bilateral power transactions. Integration of the MIS with the Credit Management System (CMS) is required in order to successfully implement this market design and manage the credit risk associated with scheduling
B115	New Technologies into Regulation Markets	 these transactions. Status: This project will address the need to evaluate and develop market rules that consider the unique characteristics of the emerging technologies. Potential modifications to the bidding, scheduling, monitoring and settlement processes may be required in order to realize the full potential of these new technologies. The objective of the analysis is to evaluate the new technologies, merge these features into the market comparable with existing product suppliers while maintaining the reliability and market efficiency objectives of the NYISO. This project was successfully deployed in May. This project is complete. Deliverables: This project will introduce the market design necessary for Limited Energy Storage Resources to provide
B116	Wind Resource Management Provisions	 regulation. Fly wheels and batteries are the targeted resources for this design. Status: As more generation from wind turbines is added to the system, it becomes increasingly important for NYISO to have the strong tools at our disposal to manage these resources in a reliable way. During 2008, the NYISO began achieving that goal by implementing an intelligent wind power forecasting program. Additionally, NYISO has embarked on a new study assessing the implications of large wind integration in New York, including the impacts on market rules, grid reliability, system cost, and ancillary services. Functionality for dispatching wind was successfully deployed in May.

[Description	Status and Milestone Deliverables
		Deliverables: This project will continue expanding our ability to effectively and reliably manage wind power integration into the NY Bulk Power Grid by addressing recommendations from the 2008 Wind Integration study work, including the ability to direct wind plants to reduce output in response to observed or anticipated reliability limitations.
B108	Scheduling and Pricing Improvements	 Status: This first phase of the project has dealt with assessments of each of the penalties assessed to generators to determine the effectiveness and fairness of each. A number of changes have been completed, including the elimination of certain performance penalties for generators and grouped units during Start-up and Shut-down periods. The second phase of the project has dealt with establishing a market design that will capture the impact of units not following their schedules into the real-time pricing outcomes. Design of the necessary market rules, including new physical withholding provisions, has been completed and approved by the Market Participants. Implementation of the changes is scheduled for 1st quarter and 4th quarter of 2009. The second phase of the project was successfully deployed in March. The third phase of the project was successfully addressed in the third quarter of 2009. Additional improvements are planned for 2010. Deliverables: Implementation of a series of market efficiency enhancements that have been requested by Market Participants. Each of the requested enhancements requires detailed analysis and study to determine the potential for market impact.
	Auxiliary Market Pro	oduct Enhancements
B119	Demand Response Information System	 Status: The NYISO currently uses a series of manual procedures to collect and process EDRP and SCR registrations and SCR monthly ICAP data. This multi-year effort will identify products available to automate current procedures and expand the capabilities of demand response program management, including implementation of new demand response programs. The initial phase will include the development of requirements, evaluation of system products, a make-or-buy decision, and implementation of prioritized requirements. Efforts necessary to support integration with a SmartGrid network will be explored and incorporated into the planning requirements. Phase IA was successfully delivered in November. Multiple phases are scheduled for deployment in 2010. Deliverables: Phase 1 implementation will include replacement of the existing Access database and Excel worksheets
		for demand response program registration. Subsequent phases will include monthly processing of SCR data, automation of the demand response event payment calculations, on-line registration for market participants, enhanced event data submission functions and automation of CBL and performance calculations using hourly interval meter data.

Description

Status and Milestone Deliverables

A911	ICAP Market Changes - Deliverability	 Status: On January 15, 2009, FERC ruled on the NYISO's Aug. 5 Deliverability filing. NYISO will need to implement software changes to include the following: Existing generators will be capped at a Summer Capability Period ICAP level via a one-time process based on the highest summer DMNC test over the past five years. New generators will be assigned an ICAP equivalent cap for the Summer Capability Period based on the results of the Deliverability Test performed in conjunction with the annual Class Year assessment. For all generators, Winter Capability Period ICAP caps will be set to the ratio of CRIS to ERIS levels for each unit, multiplied by the then applicable Winter DMNC level. Software changes were successfully deployed in March. Additional changes to support deliverability will be needed in 2010.
		Deliverables: NYISO will need to implement changes to the existing ICAP Market System to support the results of Deliverability tests.
	ICAP Buyer-Side In-City Mitigation	 Status: This project will implement the rules set forth in the NYISO's May 7, 2008 FERC filing, pending FERC approval The effort consists of: For new generators deemed to be Uneconomic, flagging the unit Uneconomic and establish an Effective Start/End Date when the unit is subject to Buyer-Side Mitigation. Calculating and entering a Unit Specific Buyer-Side Mitigation Reference Floor Price. Prohibiting Offers to Sell for Uneconomic Unit as Bilateral Sale, Strip or Monthly Auction. Implementing rules to handle overlap between Supply-Side and Buyer-Side Mitigation for units deemed Uneconomic. Deliverables: The software changes necessary to support these rules were implemented in June. This project is complete.
A907	Forward Capacity Market Design	Status: With the implementation of long-term forward capacity markets in PJM and ISO-NE, the NYISO and its stakeholders are considering the addition of a forward market and modifications to the existing capacity market as necessary. Top-level designs for both a mandatory and voluntary market design were vetted with stakeholders during 2008. Stakeholder discussions are ongoing with recent emphasis on credit implications and potential credit requirements. By majority vote, at the June BIC stakeholders advised the NYISO to suspend work on developing detail and functional requirements for a forward capacity market.
		Deliverables: Design of a forward capacity market to supplement existing capacity market instruments; stakeholder advisory vote to determine stakeholder support for moving forward with implementation of the design.

Description

Status and Milestone Deliverables

	TCC Marketplace Pr	oduct Enhancement
A993	TCC Auction Automation – Phase 3	Status: Following the implementation of the first phase of the TCC Auction Automation software project (Automation of the Awards Process), following phases will deliver the Database / Inventory Automation (Phase 2) and Bidding (Phase 3) functionality required to fully automate the TCC markets. Phase 2 successfully deployed in October 2008. Phase 3 deliverables will allow Market Participants to submit their bids and offers into an auction via a web interface and through an upload process. Error detection will be performed on these submitted bids and offers. Screens will be developed to allow Market Participants to review and modify their submitted bids and offers. Phase 3 was successfully deployed to production on February 10 prior to the Spring 2009 Capability Period Auction. This project is complete.
		Deliverables: Following the implementation of the first phase of the TCC Auction Automation software project (Automation of the Awards Process), following phases will deliver the Database / Inventory Automation (Phase 2) and Bidding (Phase 3) functionality required to fully automate the TCC markets.
B125	TCC Enhancement Features – Phase 1	 Status: NYISO has engaged stakeholders in discussions regarding desired functionality in the end state. Specifically, the following functionality will be addressed as part of Phase 1: Seasonal Auction Changes (An important feature of the end state auction engine is that it can simultaneously evaluate bids and offers for TCCs of multiple durations, permitting the NYISO to sell six-month and annual TCCs within the same auction round, and add auctions of TCCs additional durations, without extending the length of the auction). Monthly Auction Changes (The ability of the end-state auction to simultaneous sell or reconfigure TCCs of multiple durations would enable the NYISO to expand its monthly auctions to reconfiguration auctions not only covering the next month, but the remainder of the capability period or the remainder of the year). Expanding the availability of LTFTRs (per FERC's Order) to LSEs that seek to use non-historic points of injection and withdrawal as well as making LTFTRs available to non-LSEs. Deliverables: This project will provide for TCC Auction 'End State' functionality to include the ability to offer Multi-Period Auctions with possible Balance-of-Period Auction, On Peak - vs- Off Peak, etc.
	Operations and Relia	ability Product Enhancements
B122	Reference Price Software Replacement	Status: In 2008 the NYISO initiated the scoping, requirement definition and project plan development, which is currently scheduled for completion in 1 st quarter 2009. These activities will include deciding on internal/vendor provision as well as process improvements. A software/implementation design is targeted for 3 rd quarter 2009. NYISO selected LTI and Potomac through a competitive bidding process; requirements review and design are currently underway. Software design was successfully completed in September.
		Deliverables: This is a multi-phased project focusing on the next generation of the Reference Price Software.

Description		Status and Milestone Deliverables				
B118	Linden VFT	Status: The Linden VFT Project's 300 MW of incremental Transmission Transfer Capability was auctioned in twelve - 2 MW blocks. Four customers were awarded transmission scheduling rights ("TSRs") in the open season auction for term of either three, five or seven years from commercial operation. Nine 25 MW blocks were subscribed for a three year term. Three 25 MW blocks were subscribed for five years. Implementation initially requested by the customer for Jun 2009 (100 MW) has been delayed at the request of the customer until August 2009 and the remaining capacity in November (300 MW). Commercial operation commenced on November 1. This project is now complete.				
		Deliverables: This project will implement the controllable tie line for Linden VFT. The Linden VFT will be a 300 MW VFT bidirectional, controlled line from NJ to the Goethals 345 station. Linden VFT will use incremental transmission capacity on the existing 345 kV radial line that connects the Linden Cogeneration Facility to Con Ed's Goethals substation. This project will also incur cost of additional metering equipment, telephone lines at the PCC & KCC (Phase 1 data signal).				
В128 р	Outage Scheduler Automation – Phase 2	Status: Transmission and generator outage information is submitted to the NYISO by telephone, email, and/or fax. NYISO scheduling staff then approves or disapproves the outage request and manually enters the information into a proprietary database that exists outside of the Ranger operating environment. This proprietary database is used to produce required operating and market facing outage schedule reports. Phase 1 was successfully deployed in January 2009. Phase 2 includes integration with Ranger and automation of external interfaces. Phase 2 was deployed in October. Phase 3 is planned for 2010.				
		Deliverables: This multi-phased project includes the replacement of the proprietary database, as well as automation of the manual processes to enter, manage and track outage information. This project also includes the automation an integration with Ranger, and the implementation of user-friendly web interfaces for TOs and Generators to submit outage requests and forced outage data.				
	Finance Systems Pro					
A949	Credit Management System	Status: The multi-phase project will provide credit automation capabilities for each of the NYISO markets in a phased delivery fashion. The project was officially launched in April 2008 with discovery and detailed planning activities. Som internal credit functionality was deployed to production in November 2008. The integration of the Credit Management System and the TCC Automated System was successfully deployed on schedule in February. Virtual Transactions was successfully deployed in September and Credit Policy Enhancements were deployed in October. The remaining phases and the Market Participant User Interface are scheduled for 2010.				
		Deliverables: Implementation of a rules-based system to integrate with the various NYISO market platforms for the purposes of providing a comprehensive Credit Management System for the NYISO enterprise. This multi-phase project will provide the tools necessary for the Credit Department to manage MP credit and collateral limits, provide Market Participants with tools and reports to manage their own credit, and provide integration to all NYISO market functions such that customer credit obligations are met. 2009 deliverables include Virtual Transactions (Phase 2), Energy and Ancillary Services (Phase 3) and ICAP – Software Ready (Phase 4).				

Description	Status and Milestone Deliverables				
Billing Process	Status: This project is in the discovery and requirements phase. This settlement process will ultimately require integration with the new Demand Response Program Management System.				
B129 Automation – EDRP Settlements	Deliverables: The NYISO is continuing to dedicate resources to identify automated solutions to the most prevalent manual billing adjustments; this program has been identified as critical and valuable by settlements stakeholders. This project will provide an automated data processing solution for EDRP settlements. The 2009 deliverable is a software design with implementation planned for 2010.				
Consolidated Invoice Enhancements	Status: This is a multi-year project with the ultimate objective of redesigning or replacing Consolidated Invoice to provide a cleaner interface for MPs to receive settlement data and to provide greater flexibility and supportability for NYISO staff on the basis of a more robust architecture. Con Invoice has been identified for redesign or replacement t support the goals of the Settlement System Replacement (SSR) strategy. Redesign would entail leveraging the new rules engine platform to the greatest extent possible for the timely delivery of settlement invoices.				
	Deliverables: 2009 project objectives will deliver targeted functionality to support any changes to market rules or the settlement cycle per stakeholder discussions and approval, as well as design deliverables to support the eventual rearchitecture of the platform.				
Business Intelligence	e Product Enhancements				
MMP Data Mart – Phase 2 and 3	Status: This project continues the multi-year effort to build a new data mart designed around the needs of the Mark Monitoring and Performance (MMP) team. Since the data needs for this team are extensive and require much of the data that is produced by the NYISO, an initial investigation provided a prioritization for providing needed capabilities i phased approach. The Physical and Economic Withholding area of responsibility within MMP emerged as the area to provide the most value with a reasonably moderate set of data. This project leverages the significant investment NYI has made in the Decision Support System (DSS). As this data is introduced into a new data mart for MMP it will also made available in the existing Customer Settlements and the Pricing Data Marts where appropriate. The first phase v deployed to production in October 2008. Phase 2 delivered data access to Physical Withholding in June. Phase 3, transactions data access, was successfully deployed in October.				
	Deliverables: Process and system reviews performed for the Market Monitoring and Performance unit during 2007 highlighted deficiencies in the tool-set available to the MMP team for performing certain monitoring and analysis functions. This project is a multi-phase, multi-year effort to provide an integrated and robust set of tools to augment existing processes and manual tools in place. Additional analysis capabilities beyond compliance requirements will be identified and provided.				
B126 NYISO Public Website Redesign	Status: This is a significant project to update the NYISO public website with an emphasis on replacing old technolog and moving to a more current, navigational design. The requirements for this project will incorporate input from discussions with internal stakeholders (External Affairs) and external stakeholders (Market Participants). This project was successfully deployed in December.				
	Page 6				

Description

Status and Milestone Deliverables

Deliverables: This project is a redesign of the public website, including the overall look and feel (moving to a navigational design); and the content and organization of the site.

	Infrastructure Produ	uct Enhancements
B114	HRIS/ERP System – HR Automation	Status: The NYISO Human Resources process is currently carried out by a team of HR Generalists who use a set of spreadsheet-based tools, manual data capture, and storage processes. While the manual processes are well-documented and consistently followed, they can be cumbersome and inefficient. Deliverables in 2009 are concentrated on four modules for implementation: Human Resources Information, Self Service for Employees, Advanced Benefits and Time and Labor. This project was submitted for reprioritization in the 2010 budgeting process due to the schedule delay created by the Oracle Licensing dispute resolution process. This project did not receive a high priority and therefore, has been cancelled.
		Deliverables: The end-state vision is an application with the following: supports bidirectional data flow between NYISO applications; robustness to support future expansions; easily configurable to support calculation changes; and standard and customized reporting capabilities to support analysis and business processes.
A928	Oracle Forms Replacement	Status: The project has been defined to multiple phases according to the individual business owner / functional area impacted. The first phase was completed in 2007 and involved the usage analysis and elimination of unnecessary forms. The second phase is directed at the Operations department functions and was successfully deployed in mid September. Parallel tracks of work are already addressing the other functional areas of the platform. Finance forms were successfully deployed in February. Another group of forms was deployed to production in July. The remaining forms were successfully deployed in October. This project is complete.
		Deliverables: A number of the internal use applications are developed on the Oracle Forms development platform. This technology is no longer supported by the vendor, and the replacement of this platform represents a gating factor for the upgrade of the Oracle database version. Oracle Forms applications are in use by almost every internal NYISO department for managing market data and supporting various NYISO business processes.
B138	Lotus Notes Retirement	Status: As a result of the MS Exchange Project there has been preliminary analysis performed regarding the impact to the Lotus Notes Applications and databases. Work is underway to complete the roadmap for the retirement of the application and database being utilized in Lotus Notes as the NYISO transitions to MS Exchange for E-Mail and calendaring. There needs to be a roadmap put together for the retirement of the application and databases being utilized in Lotus Notes to Exchange has been successfully completed. Retiring Lotus Notes is the next milestone to completing this project.
		Deliverables: Implement MS Exchange and retire Lotus Notes.

Summary Description of FERC Regulatory Filings, Investigations and Rulemakings and Related Orders in NYISO Matters - November 2009

November 2009

Filing Date	Filing Summary	Docket	Order Date	Order Summary	Outcome
11/03/09	NYISO filing of a request for an extension of time re: 2 compliance issues in 10/1509 order re: identification of and cost allocation to, the beneficiaries for economic transmission projects	OA08-52-004 and 006	11/25/09	FERC letter order granting extension of time to NYISO to make compliance filing regarding tariff revision related to the TCC and bilateral adjustments. (Second order 890 compliance filing)	
11/06/09	NYISO 205 filing – development of statewide day-ahead reliability unit (DARU)requests	ER10-231-000			
11/12/09	NYISO e-filing of initial comments in Support of the Settlement Agreement of NYSEG, NYMOC and NYMPC and Offer of Partial Settlement.	EL09-26-000, 001			
11/12/09	NYISO filing of an updated status report re: stakeholder discussions on annual ICAP demand curve reports and plan for future reports	ER01-3001-021 and 022; ER03- 647-012 and 013			
11/13/09	NYISO and Transmission Owners made a joint tariff filing to implement a funding mechanism for recovery of that portion of the cost of Highway System Deliverability Upgrades	ER04-449-018, ER04-449-021			
11/16/09	NYISO 205 filing re: credit requirements for energy and ancillary services	ER10-272-000			
11/18/09	NYISO 205 filing re: interconnection study queue process	ER10 -290-000			

Filing Date	Filing Summary	Docket	Order Date	Order Summary	Outcome
11/23/09	NYISO e-filed on behalf of the Eastern Interconnection Planning Collaborative (EIPC), EIPC's comments in response to FERC's October 8, 2009 Notice of Request for comments.	AD09-8-000			
11/23/09	NYISO e-filed its comments in response to FERC's October 8, 2009 Notice of Request for comments.	AD09-8-000			
11/23/09	NYISO filed limited reply comments responding to initial comments filed by the contesting parties and the New York Association of Public Power on the settlement agreement and offer of partial settlement.	EL09-26-000, 001			
11/24/09	NYISO filed a motion to defer effective date of previously accepted tariff revisions and request for waivers.	ER09-1612-002			
11/30/09	NYISO filed a Motion for Extension of Time	EL09-57-000	12/01/09	FERC notice to NYISO for granting an extension of time to and including December 31, 2009, to comply with the Commission's September 3 Order.	
11/30/09	NYISO filed a Motion to Defer Effective Date of Previously Accepted Tariff Revisions and Request for Waivers.	EL09-1142-000			
11/30/09	Initial Brief of NYISO filed under NYSEG case	EL09-26-000 EL09-26-001
