Market Performance Highlights for February 2011

- **LBMP for February is \$55.60/MWh, down from \$74.90/MWh in January 2011.**
 - Average monthly cost is \$68.59/MWh, down from \$78.25/MWh in January 2011.
 - Day Ahead and Real Time LBMPs have decreased from January 2011.
- **Average daily sendout is 447GWh/day in February; lower than 457GWh/day in January 2011 and slightly higher than 444GWh/day in February 2010.**
- **Fuel Prices are up compared to last month except Natural Gas.**
 - Kerosene is \$21.31/MMBtu, up from \$20.16/MMBtu in January.
 - No. 2 Fuel Oil is \$19.63/MMBtu, up from \$18.51/MMBtu in January.
 - No. 6 Fuel Oil is \$17.44/MMBtu, up from \$15.35/MMBtu in January.
 - Natural Gas is \$6.41/MMBtu, down from \$9.43/MMBtu in January.
- **Uplift per MWh is lower than the previous month.**
 - Uplift (not including NYISO cost of operations) is \$0.37/MWh, down from \$1.03/MWh in January:
 - The TSA Share is \$0.00/MWh
 - The Local Reliability Share is \$0.20/MWh
 - The Other Share is \$0.17/MWh
 - Total uplift (Schedule 1 components including NYISO Cost of Operations) is lower than in January.

Daily NYISO Average Cost/MWh (Energy & Ancillary Services)*
 2010 Annual Average \$58.92/MWh
 February 2010YTD Average \$62.03/MWh
 February 2011YTD Average \$68.59/MWh

* Excludes ICAP payments.

NYISO Dollar Flows - Uplift- OATT Schedule 1 components - Data through February 28, 2011

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.
 DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.
 DAM residuals consist of both energy and loss revenue collections and payments. By design, there is a net over collection of revenues due to the difference between the marginal losses paid to generation and the average losses charged to loads.

NYISO In City Energy Mitigation - AMP (NYC Zone) 2010 - 2011

Percentage of committed unit-hours mitigated

This chart shows energy mitigation of the generating units in the NYC zone. Only hours during which a generating unit is scheduled are counted toward the 100%. If a unit's bid is mitigated at any point during an hour, that entire hour is counted as mitigated.

NYISO In City Energy Mitigation (NYC Zone) 2010 - 2011 Monthly megawatt hours mitigated

Project	Status and Milestone Deliverables
---------	-----------------------------------

Business Intelligence Products	
--------------------------------	--

E-Planning Enhancements	<p>Status: E-Planning is a comprehensive collaboration system for NYISO System Resource Planning. The 2010 deployment was specific for Interconnection Studies.</p> <p>Deliverables: The focus of the 2011 project will be extending functionality to include other types of studies conducted by System Resource Planning, such as Transmission Studies.</p>
-------------------------	---

Web Posting Enhancements: Operational Events	<p>Status: "Web Postings" refers to a series of processes that generate and publish various CSV, PDF, and HTML files to NYISO's OASIS site (http://mis.nyiso.com/public). These files include zonal and generator pricing data for the Real-Time, Hour-Ahead, and Day-Ahead markets, outage data, interface limits & flows, PAR schedules & flows, actual load and load forecasts, various reports, and other publicly available data used by Market Participants.</p> <p>Deliverables: The focus of the 2011 project is to enable the real time posting of operational events, such as Major Emergency, Thunder Storm Alert, Reserve Pickup and Area Control Error (ACE), to nyiso.com. Implementation is scheduled for 4th Q 2011.</p>
--	---

Capacity Market Products	
--------------------------	--

Additional Capacity Zones	<p>Status: The NYISO and stakeholders developed the rationale in 2010 for creating additional capacity zones, identified as a recommendation in the 2009 State of the Market report. NYISO submitted a FERC compliance filing in January 2011 to define the criteria for creating new capacity zones. A Lower Hudson Valley capacity zone is under consideration to reduce the impact of deliverability and better reflect the cost of new entry.</p> <p>Deliverables: The 2011 project will focus on the functional design of the logic to generalize the addition, and possibly subtraction, of capacity zones within the ICAP Automated Market System.</p>
---------------------------	---

Buyer Side Mitigation Rules	<p>Status: In February 2011 FERC accepted NYISO's compliance filing, which was submitted based on 2010 stakeholder discussions.</p> <p>Deliverables: Implement the necessary rule changes within the ICAP Automated Market System, including floor price adjustment, duration of mitigation, and exemption tests. Implementation is scheduled for 3rd Q 2011 to be effective for the Winter Capability Period.</p>
-----------------------------	--

Project	Status and Milestone Deliverables
---------	-----------------------------------

Demand Response Products	
--------------------------	--

Demand Response Aggregations in DSASP	<p>Status: Based on the NYISO's response to FERC Order 719, in 2010 NYISO and stakeholders discussed the changes needed to accommodate aggregated small demand response resources providing ancillary services (DSASP). The Market Design Concept to treat aggregations in the same manner as individual DSASP resources was proposed and approved by Market Participants at the December 2010 BIC</p> <p>Deliverables: Implement the required rule changes and software changes in 2011. Implementation is planned for 3rd Q 2011.</p>
Demand Side Ancillary Services Program (DSASP) Direct Metering	<p>Status: In 2010 NYISO and stakeholders discussed the stakeholder need to enable direct communications from the NYISO to the DSASP provider/aggregator.</p> <p>Deliverables: The 2011 project will address the required market rule, software, and hardware changes needed to enable direct communications from the NYISO to the DSASP provider/aggregator. Completion of the functional requirements is scheduled for the 3rd Q 2011.</p>
Demand Response – Real Time Energy Market	<p>Status: NYISO and Market Participants are awaiting further direction from FERC on the concepts for permitting demand response entities to participate in the NYISO's real time energy market.</p> <p>Deliverables: The focus of this project in 2011 is the development of the architectural design specification for the software changes required to enable this functionality. Completion of the architectural design is scheduled for the 4th Q 2011.</p>
SCR Baseline/Aggregation Rules	<p>Status: Stakeholders approved market rule changes at the February 2011 Management Committee. These changes will result in improved estimates of the demand reduction capabilities (and Installed Capacity) of SCRs, better alignment with operational expectations during an SCR event, and greater clarity in applying performance deficiency penalties to the entities that represent SCRs in the NYISO market: Responsible Interface Parties. At the request of the Market Participants, NYISO will be seeking expedited treatment from FERC.</p> <p>Deliverables: The focus of the 2011 project is implementation of the required software changes within the Demand Response Information System (DRIS) to implement the market rules approved by stakeholders. Implementation is scheduled for 2nd Q 2011.</p>

Project	Status and Milestone Deliverables
---------	-----------------------------------

Energy Markets Products	
--------------------------------	--

Ancillary Services Mitigation	<p>Status: Per recommendation of NYISO's Market Advisor, NYISO should modify two mitigation provisions that may limit competitive 10-minute reserves offers in the day-ahead market.</p> <p>Deliverables: This project will focus on an evaluation of these two mitigation provisions and identification of appropriate modifications, if necessary. A market design concept proposal is scheduled for 3rd Q 2011.</p>
Buy-through of Congestion	<p>Status: Buy-Through of Congestion is a Broader Regional Markets initiative that addresses congestion costs created by loop flow from external transactions. Parties scheduling transactions with any of the ISOs surrounding Lake Erie would be billed for real-time congestion costs incurred by neighboring systems supporting the loop flow created by the transaction to maintain the schedule. Parties scheduling transactions would specify if they are, or are not, willing to pay for off-contract path congestion. This project will implement this functionality.</p> <p>Deliverables: Given FERC's reprioritization of this BRM initiative in the December 30, 2010 FERC Order, there are no planned deliverables for 2011.</p>
Enhanced Shortage Pricing Phase I	<p>Status: The NYISO implemented reserve demand curves as part of the SMD2 implementation to accurately and consistently capture shortage conditions directly into the market clearing prices. During the development of the market rules, set points (or set point/ MW pairs) were established for the Ancillary Service products. The demand curve will be modified to better reflect the value of reserves during shortage conditions, consistent with operational practices and reserve scheduling requirements.</p> <p>Deliverables: The focus of this project for 2011 is to implement the required software changes. Implementation is scheduled for 1st Q 2011.</p>
Interregional Transaction Coordination Phases I and III	<p>Status: Interregional Transaction Coordination is a Broader Regional Markets initiative that provides more frequent scheduling of external energy transactions with the interfaces. Currently, energy transactions between NY and other control areas are evaluated economically once for the hour. The 2008 and 2009 State of the Market recommendation #2 is, "NYISO continue its work with neighboring control areas to better utilize the transfer capability between regions." Phase I of this project will enable more frequent scheduling with Hydro Quebec (HQ). Phase III will enable more frequent scheduling with PJM.</p> <p>Deliverables: The focus of this project in 2011 is to deliver the necessary software enhancements and tools to implement Intra-hour energy transaction scheduling capabilities with HQ in March 2011 and PJM in September 2011.</p>

Project	Status and Milestone Deliverables
Interregional Transaction Coordination Phase IV – ISO-NE Intra-hour Transaction Scheduling	<p>Status: This project expands upon the work completed in Phases 1 and 3 by implementing Intra-hour energy transaction scheduling capabilities with ISO-NE. The 2008 and 2009 State of the Market recommendation #2 is, “NYISO continue its work with neighboring control areas to better utilize the transfer capability between regions.”</p> <p>Deliverables: The focus of this project in 2011 is to develop the functional requirements and complete the tariff filing in 4th Q 2011.</p>
Market to Market Coordination - PJM	<p>Status: In late-2006, PJM approached NYISO, interested in developing a program to allow inter-control area dispatch to help manage congestion. PJM has implemented a program with MISO. In 2007, NYISO initiated discussions with PJM to further understand the MISO program and begin to outline a conceptual straw proposal for a similar program between PJM and NY. NYISO has continued to define the details of a Market to Market (formerly known as Congestion Management) protocol between NYISO and PJM. In 2009, NYISO worked with PJM and NYISO stakeholders to develop a Market to Market protocol. Protocol development was not completed in 2009. The question of entitlement rights on coordinated flowgates could not be addressed until the NYISO had developed or procured a market flow calculator. The December 30, 2010 FERC Order regarding the NYISO’s Lake Erie Loop Flow response directs the NYISO to implement market to market with PJM faster than originally planned.</p> <p>Deliverables: In 2011 the NYISO will implement the market flow calculator necessary for this project. The deployment of this project is scheduled for 4th Q 2012.</p>
Interface Pricing (PAR Modeling Upgrades)	<p>Status: PAR Modeling Upgrades is a Broader Regional Markets initiative that modifies how power flows are represented on the SCUC, RTC and RTD models. This requires changes to the current PAR modeling techniques used by SCUC, RTC and RTD, where PARs will need to be modeled as free flow devices for the purposes of pricing and dispatch, but also provide the ability to offset the PAR schedules with an injection or withdrawal to represent extrinsic power flow effects like Lake Erie Loop Flow.</p> <p>Deliverables: This project is scheduled to be software ready in December 2011 with a planned deployment of January 2012.</p>
Scheduling and Pricing: Regulation Ramp	<p>Status: Today, some generators have a physical limitation on the regulation that can be provided within certain unit operating ranges. This project will allow generators to specify different regulation response rates for different energy output levels, similarly to the three energy response rates allowed today. With these additional regulation response rates, SCUC, RTC, RTD and AGC will know how best to co-optimize the output of a generating unit while meeting the physical operating characteristics of that unit. Additionally, these responses rates will still need to be maintained at a rate that is equal to or lower than the energy response rate. An alternative solution may be to create a distinct regulation upper limit.</p> <p>Deliverables: The focus of this project in 2011 is to develop a market design concept in 4th Q 2011.</p>

Project	Status and Milestone Deliverables
---------	-----------------------------------

Enterprise Technology Products	
---------------------------------------	--

Enterprise Data Storage Migration	<p>Status: This project focuses on migrating from leased storage hardware onto purchased storage hardware with a longer lifespan that can be upgraded with minimal disruptions to the organization. This new storage hardware supports increased performance and storage requirements, which are required for upcoming market design and Smart Grid initiatives.</p> <p>Deliverables: The hardware migration is scheduled for completion in 3rd Q 2011.</p>
-----------------------------------	--

Identity and Access Management	<p>Status: This project continues the roadmap initiated in 2010. This project will help address NERC Critical Infrastructure Protection (CIP) compliance requirements and deliver a foundation for enterprise-wide identity and access management. Technical controls and workflows will manage employee user identities and access rights to widely used critical cyber assets defined by NERC CIP. The solution will provide reporting and visibility to current access entitlements and immediate revocation of rights on employee exit.</p> <p>Deliverables: The focus of this project in 2011 is the implementation of the functionality to automate the controls and management of employer user identities and access rights. Implementation is scheduled for 3rd Q 2011.</p>
--------------------------------	---

Ranger Hardware Migration	<p>Status: This project focuses on migrating from leased servers onto purchased servers for the benefits of a scalable solution that can be upgraded with minimal disruptions to the organization, extends the lifespan of the Ranger platform, and enables software performance tuning to support data volumes anticipated with future market initiatives.</p> <p>Deliverables: The hardware migration is scheduled for completion in 2nd Q 2011.</p>
---------------------------	---

Finance Products	
-------------------------	--

Bid Production Cost Guarantee Enhancements	<p>Status: These changes were requested as part of the Strategic Tariff review and specifically impact the Day Ahead and Real Time Bid Production Cost Guarantee (BPCG) calculations with respect to Bilateral transactions and RT BPCG for regulation providers. Modifications are needed to the DA and RT BPCG calculations for generators with bilateral transactions to use implied revenues based on LBMPs and actual bid costs; and, start up costs need to be included in the calculation of BPCG regardless of the existence of bilateral transactions. Modification needed to the RT BPCG calculations for generators providing RT regulation that do not have a DA schedule for energy to include both the cost and revenue components associated with Incremental energy from the units Min Gen to Min Gen plus scheduled regulation MW's. The incremental energy costs are currently not included in the calculation.</p> <p>Deliverables: The focus of this project is the implementation of the software changes needed to support the market rule changes to be approved by Stakeholders, the Board, and FERC. Implementation is scheduled for 2nd Q 2011.</p>
--	--

Project	Status and Milestone Deliverables
Consolidated Invoice Redesign	<p>Status: This is a multi-year project focused on implementing weekly invoicing in compliance with FERC Order 741 and replacing old technology. This project will include modifications to Consolidated Invoice, Credit Management System, Oracle Financials and Finance Department processes, and the Customer Settlements Data Mart to support flexible invoicing.</p> <p>Deliverables: This project will implement the software needed to support a shortened settlement cycle and other credit reforms included in FERC Order #741. Implementation is scheduled for 3rd Q 2011 to support production of the first weekly invoice October 12, 2011.</p>
Operations & Reliability Products	
Dynamic Pricing	<p>Status: This project will make available LBMP data directly to the Transmission Owners in support of on-going Smart Grid efforts. Today TOs must gather LBMP data from the NYISO web.</p> <p>Deliverables: The focus of this project in 2011 is the development of an architectural design specification in 4th Q 2011.</p>
Operational Tools and Enhancements	<p>Status: The focus of this project is to provide the tools necessary to improve NYISO Operations' analytical capabilities for purposes of improving reliability. There are several initiatives, including support for continuing to provide NERC IDC mandated data exchanges to meet NERC and NASB standards. Existing manual processes used by Security Constrained Unit Commitment (SCUC) Engineers in determining Day Ahead Market (DAM) Unit Commitment will be reviewed and automated where possible.</p> <p>Deliverables: Two deployments are scheduled, one for June and one for September, to implement the prioritized functionality</p>
Ranger Enhancements for Optimization and Performance	<p>Status: Over the next few years, projects like Disaggregated Virtual Trading and the Broader Regional Market initiatives are expected to significantly increase data and transaction volumes processed in the Ranger system. This project aims to analyze and deploy optimization requirements from ABB that are appropriate to improve processing. The primary focus will be on optimization of processing time.</p> <p>Deliverables: The focus of this project for 2011 is the completion of an architectural design specification in 4th Q 2011.</p>
Reference Level Software Enhancements	<p>Status: This project will focus on enhancing the Reference Level Software (RLS) application that was implemented in November 2010. The enhancements to the RLS application will focus on automating manual processes and providing long term monitoring tools to Market Mitigation and Analysis.</p> <p>Deliverables: The implementation of these prioritized enhancements is scheduled for 2nd Q 2011.</p>

Project	Status and Milestone Deliverables
Reliability Commitment Transparency	<p>Status: This project will provide Dispatchers with a drop down list of available Application of Reliability Rules (ARR) to select the ARR in effect when TOs call to inform dispatchers of a Day Ahead Reliability Unit (DARU).</p> <p>Deliverables: Implementation of this functionality is scheduled for 1st Q 2011.</p>
Planning and TCC Market Products	
TCC Multi-Duration and Balance of Period Centralized Auction	<p>Status: This project continues the 2010 efforts to provide for TCC Auction 'End State' functionality; in 2010 NYISO implemented functionality for MPs to sell TCCs in any round. Continuing efforts will focus on the implementation of Non-Historic Long Term Fixed Price TCCs, multi-duration capability period auctions, and balance of period TCCs. Consistent with NYISO's response to a FERC Order, NYISO is planning a June 2012 implementation to support offering Non-Historic Long Term Fixed Price TCCs beginning with the Autumn 2012 Capability Period Auction.</p> <p>Deliverables: The focus of this project is the completion of the functional requirements specifications for all of the functionality in 2nd Q 2011.</p>
High Performance Computing for Planning Studies	<p>Status: This is a project to put in place the infrastructure required to enable System Resource Planning to conduct large, data intensive planning studies. NYISO is in the process of evaluating and selecting the appropriate hardware solution.</p> <p>Deliverables: The focus of this project in 2011 is the implementation of the solution in 4th Q 2011.</p>
Siemens PTI Model-on-Demand Phase II	<p>Status: The second phase of this project will focus on maintenance and consulting for implementation of the Siemens PTI Model-on-Demand (MOD) web portal, which will allow TOs and MPs to review and approve data in a structured, interactive manor.</p> <p>Deliverables: The focus of this project in 2011 is the completion of the architectural design specification in 3rd Q 2011.</p>

Summary Description of FERC Regulatory Filings, Investigations and Rulemakings and Related Orders in NYISO Matters February 2011

Filing Date	Filing Summary	Docket	Order Date	Order Summary	Outcome
12/07/2010	NYISO refiling of Compliance response to FERC's November 26, 2010 Order on Proposed Revisions to In-City Buyer Side Mitigation Measures to revise the filing code and correct a date in the filing letter.	ER10-3043-001	02/02/2011	FERC order accepting compliance revisions with nontariff related conditions	Accepted
12/21/2010	NYISO 205 filing tariff re: Bidding and Scheduling of Energy, Ancillary Services and Transmission Service in the NYCA	ER11-2459-000	02/10/2011	FERC letter order accepting revisions effective 3/12/11	Accepted
12/21/2010	NYISO 205 filing re: MST RS 3 and 4 to enhance shortage pricing for Regulation Service and Operating Reserves	ER11-2454-000	02/04/2011	FERC letter order accepting revisions effective 03/15/2011	Accepted
12/22/2010	Amended and Restated LGIA among the NYISO, National Grid and Atlantic Wind.	ER11-2499-000.	02/10/2011	FERC letter order accepting amended LGIA effective 12/13/10, as requested	Accepted
12/28/2010	NYISO 205 Joint Filing of Steel Winds II SGIA among the NYISO, NMPC, NWP and Erie Wind, Service Agreement No. 1676.	ER11-2533-000	02/22/2011	FERC letter order accepting SGIA effective 11/1/10	Accepted
12/28/2010	NYISO 205 Filing Re: Proposed Tariff Clarifications Regarding the Market Power Mitigation Measures and Market Monitoring Plan and Request for Limited Waiver of Notice Requirements (MST Attachments H and O)	ER11-2544-000	02/10/2011	FERC letter order accepting some revisions effective 2/28/11 as requested and directing a compliance filing to set the effective date for revisions listed with a June 2011 flexible date	Accepted - Compliance Rqrd
1/5/2011	205 Filing of SGIA among the NYISO, NYSEG, and AES ES Westover	ER11-2631-000	02/03/2011	FERC letter order accepting SGIA	Accepted
1/7/2011	NYISO 205 filing of LGIA among NYISO, NYPA, and Astoria Energy II	ER11-2654-000	02/09/2011	FERC letter order accepting LGIA effective 12/20/10	Accepted
1/14/2011	NYISO filing of revised LGIA between NYISO, LIPA and LI Solar Farm to correct administrative revisions	ER11-1975-001	02/18/2011	FERC letter order accepting revised LGIA	Accepted
2/7/2011	NYISO 205 Filing of revisions to its Standard Large Interconnection Procedures	ER11-2842-000			

Filing Date	Filing Summary	Docket	Order Date	Order Summary	Outcome
2/9/2011	NYISO request for clarification and expedited action re: use of escalation factor referenced in the 1/28/11 demand curve reset order	ER11-2224-000			
2/9/2011	NYISO Request for Leave to Submit Limited Answer and Limited Answer Regarding New Locational Capacity Zones.	ER04-449-023			
2/17/2011	NYISO Compliance filing of Interim Demand Curve values	ER11-2224-002			
2/17/2011	NYISO 205 filing of revisions to the Special Case Resource Installed Capacity Program provisions in the Services Tariff	ER11-2906-000			
2/17/2011	NYISO Withdrawal filing of Interim Demand Curve Values filing	ER11-2224-002			
2/18/2011	NYISO answer to the TC Ravenswood answer re: NYISO's request for clarification of the 1/28/11 demand curve reset order	ER11-2224-000		No order anticipated	
2/18/2011	NYISO Motion to Withdraw compliance filing of interim demand curve values and subsequent withdrawal filing of	ER11-2224-002			
2/18/2011	NYISO Motion to Rescind Notice	ER11-2224-000			
2/24/2011	NYISO 205 filing joint LGIA among NYISO, National Grid and Roaring Brook	ER11-2946-002			
2/25/2011	NYISO 205 filing joint LGIA among NYISO, NYSEG and Howard Wind	ER11-2953-000			
2/28/2011	NYISO Request for rehearing, alternative request for clarification, and partial request for expedited action re: Demand Curve reset (ER11-2224-00_)(Murphy)	ER11-2224-001			
2/28/2011	NYISO Compliance filing of additional loop flow-related analysis and data supporting studies	ER08-1281-005 and ER08-1281--006
