Operations Performance Metrics Monthly Report

April 2012 Report

Operations & Reliability Department New York Independent System Operator

Prepared by NYISO Operations Analysis and Services, based on settlements initial invoice data collected on or before May 8, 2012.

Table of Contents

- ◆ **Highlights**
 - *Operations Performance*

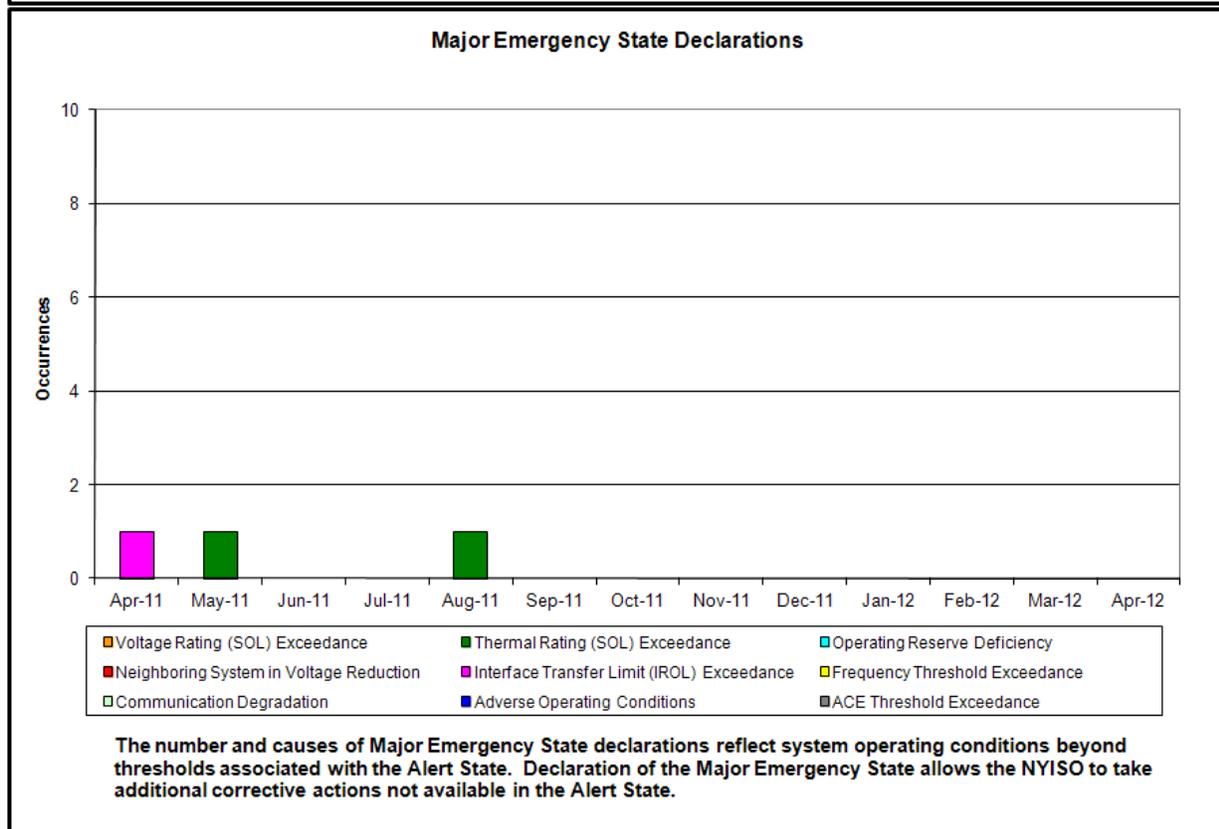

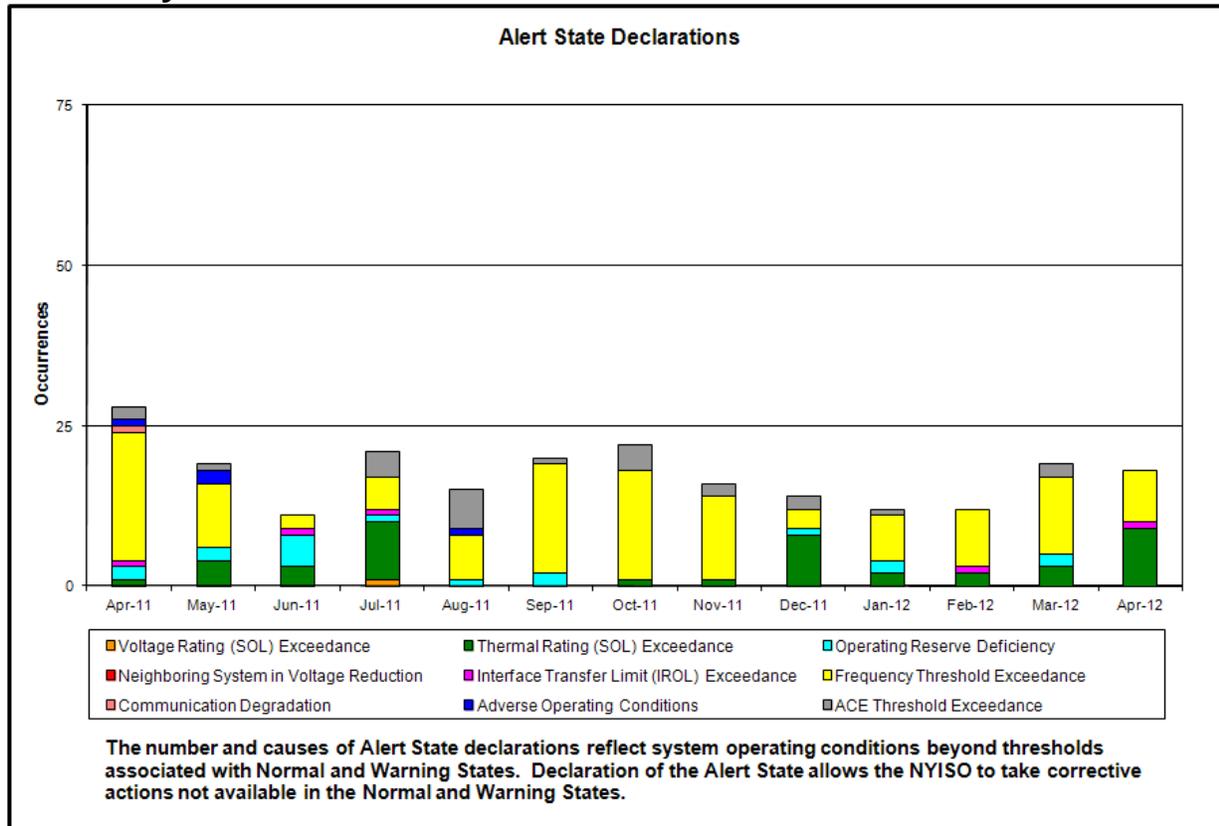

- ◆ **Reliability Performance Metrics**
 - *Alert State Declarations*
 - *Major Emergency State Declarations*
 - *IROL Exceedance Times*
 - *Balancing Area Control Performance*
 - *Reserve Activations*
 - *Disturbance Recovery Times*
 - *Load Forecasting Performance*
 - *Wind Forecasting Performance*
 - *Lake Erie Circulation and ISO Schedules*

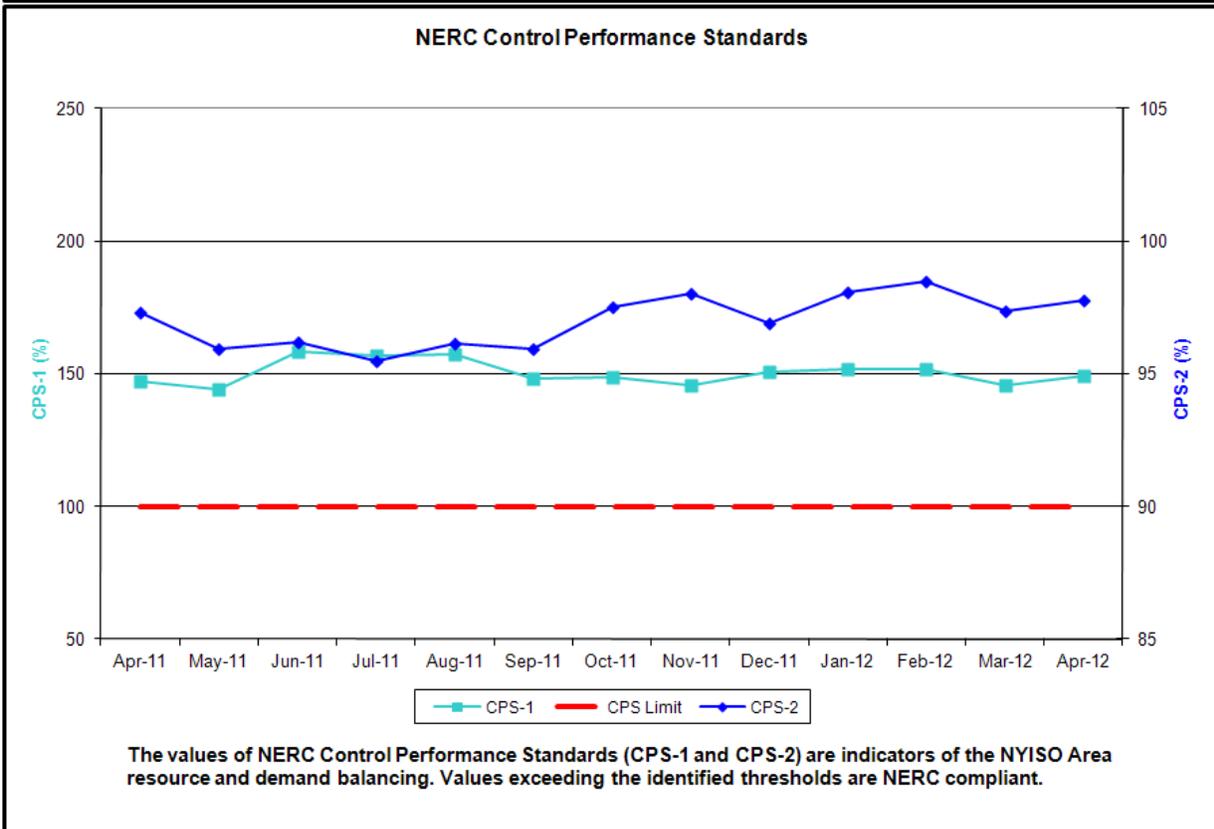

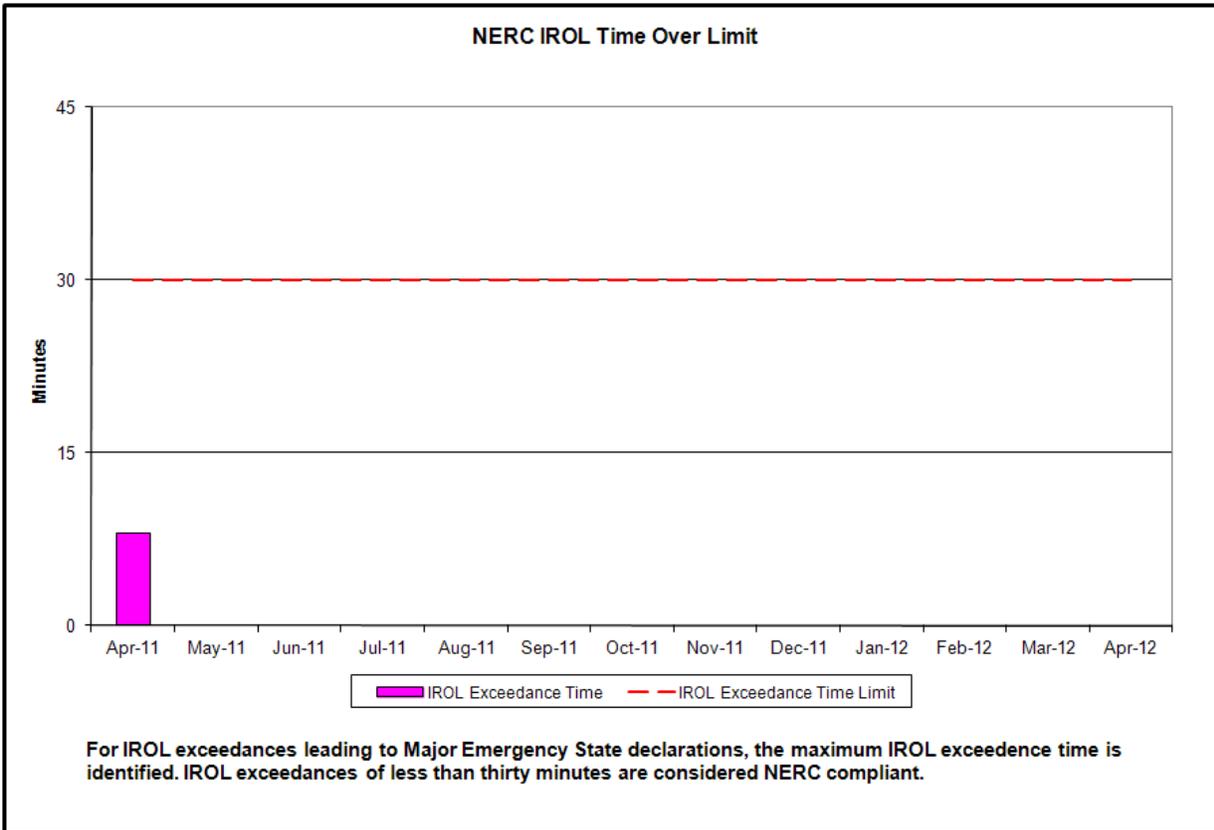

- ◆ **Market Performance Metrics**
 - *RTM Congestion Residuals Monthly Trend*
 - *RTM Congestion Residuals Daily Costs*
 - *RTM Congestion Residuals Event Summary*
 - *RTM Congestion Residuals Cost Categories*
 - *DAM Congestion Residuals Monthly Trend*
 - *DAM Congestion Residuals Daily Costs*
 - *DAM Congestion Residuals Cost Categories*
 - *NYCA Unit Uplift Components Monthly Trend*
 - *NYCA Unit Uplift Components Daily Costs*
 - *Local Reliability Costs Monthly Trend & Commitment Hours*
 - *ICAP Spot Market Clearing Price*
 - *UCAP Awards*

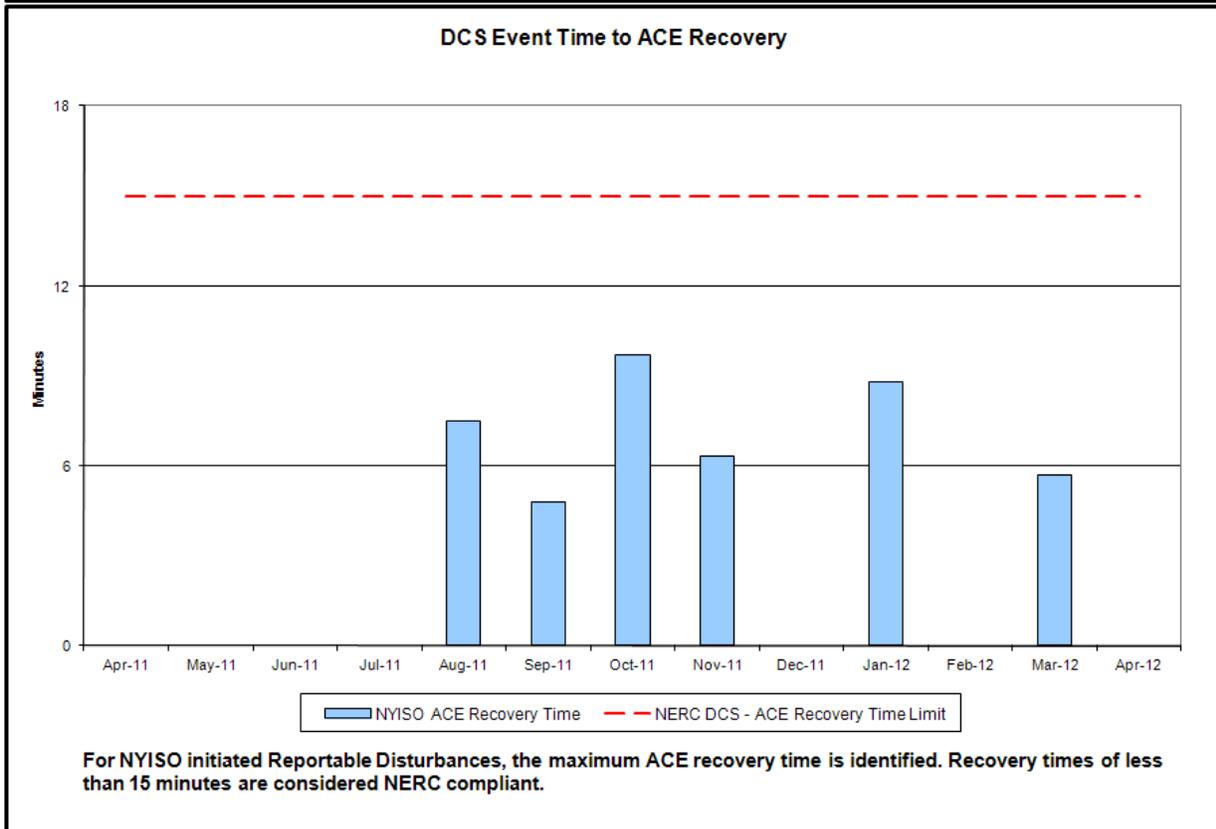

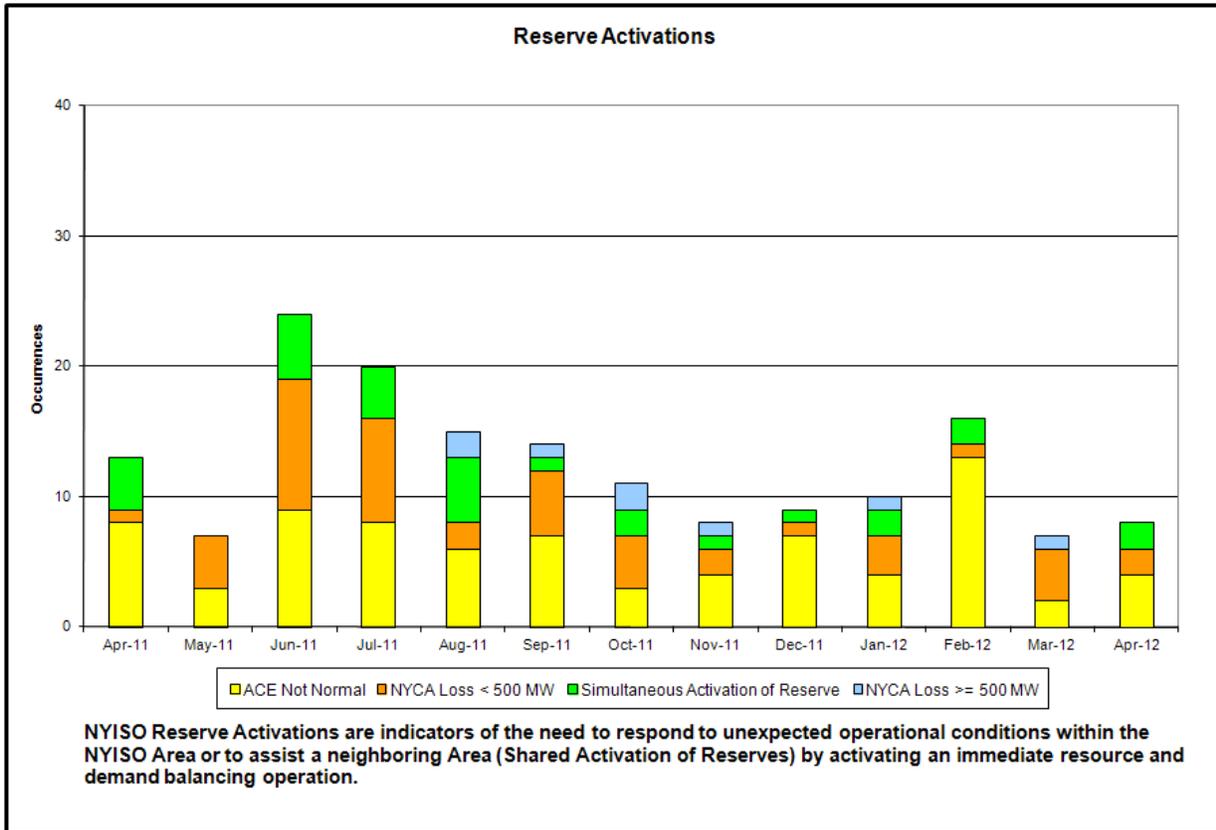

April 2012 Operations Performance Highlights

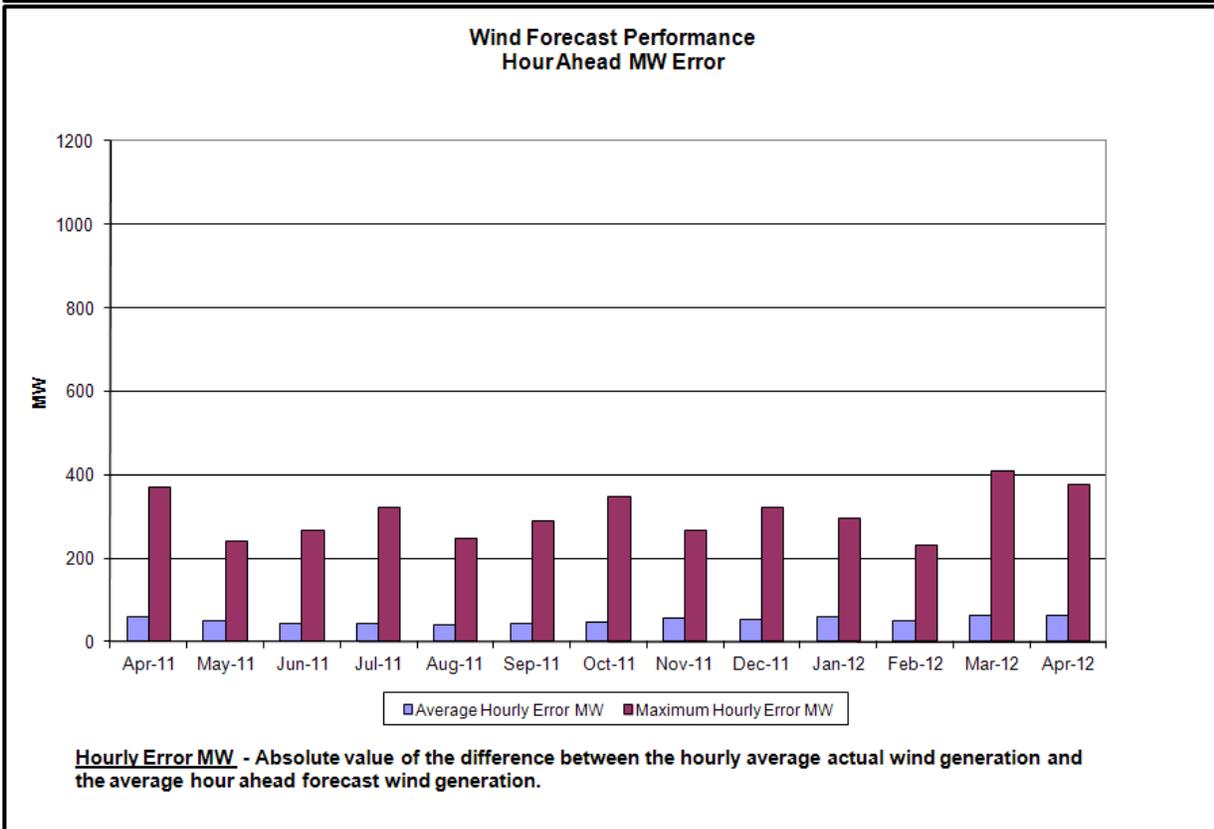

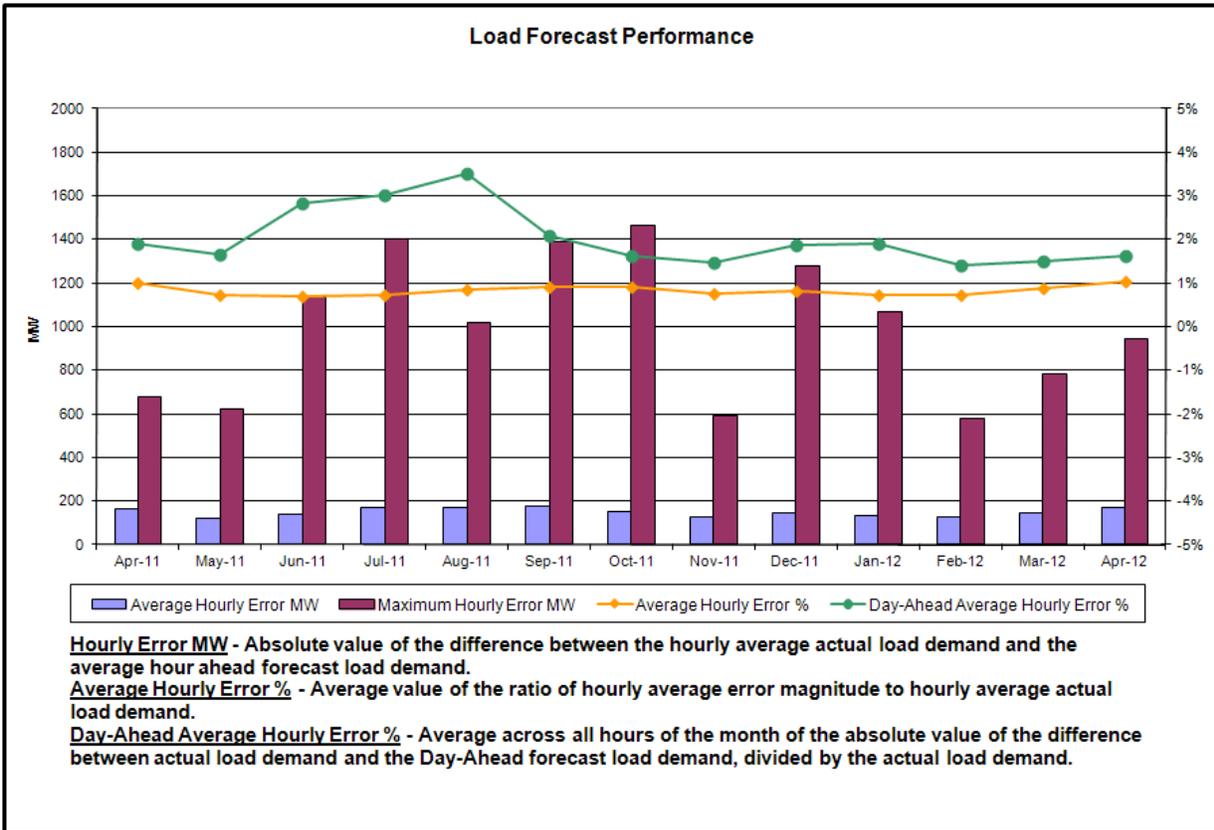

- Peak load of 21,128 MW occurred on 4/16/2012 HB 15
- All-time winter capability period peak load of 25,541 MW occurred on 12/20/2004 HB 17
- 0 hours of Thunder Storm Alerts were declared.
- **Clockwise Lake Erie Loop Flows**
 - 12 hours of NERC TLR level 3 curtailments
 - On April 5, 2012 at 10:00hrs, IESO and MISO placed in service three of the four Ontario-Michigan phase angle regulators (PARs). The fourth Ontario-Michigan interconnection PAR is currently bypassed. With only three of the four PARs in service, the ability to control circulation is limited compared to the capability with four PARs in service.

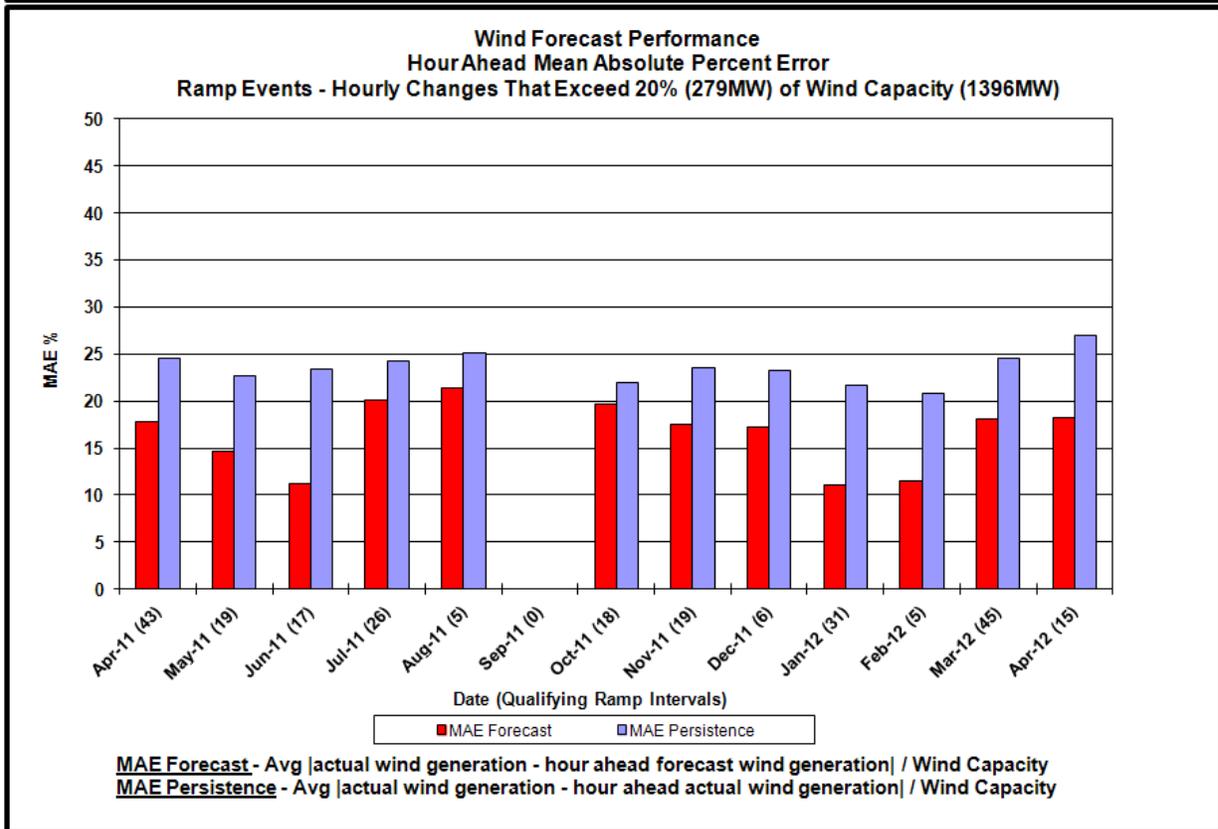

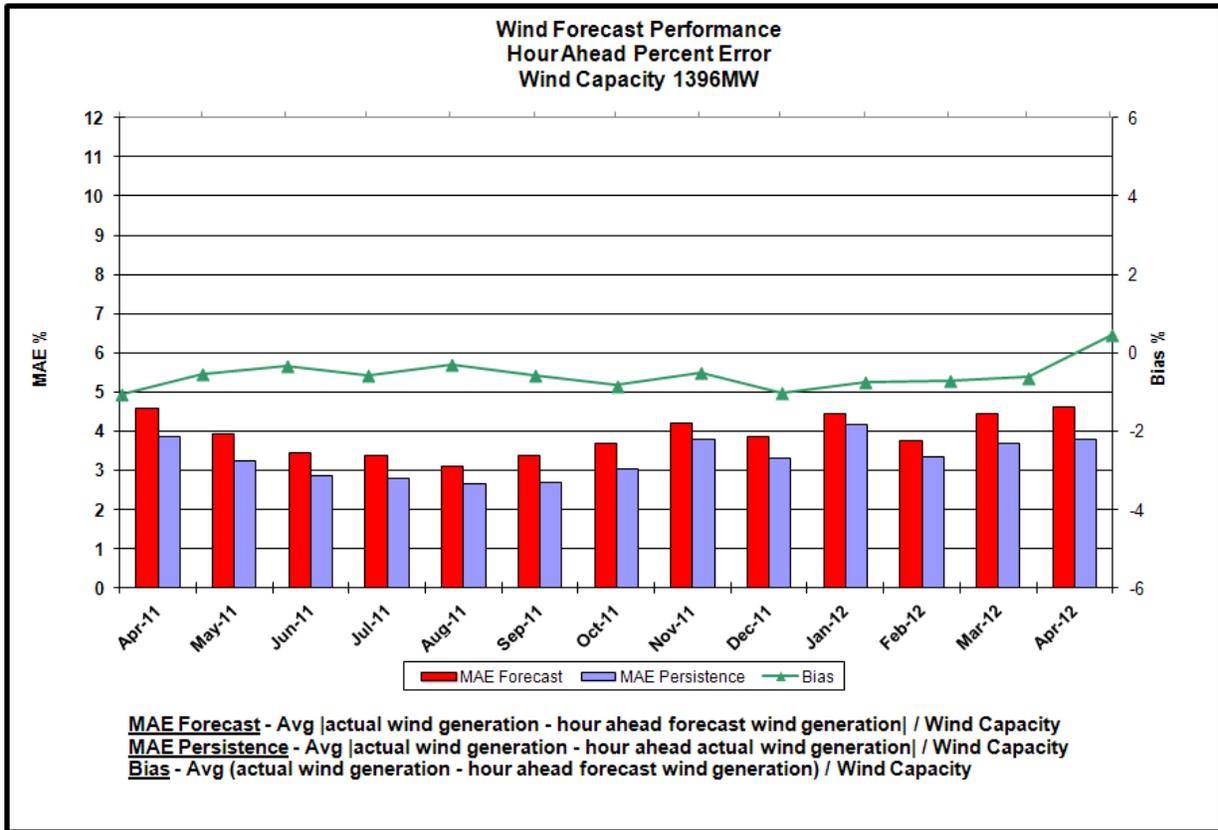

Reliability Performance Metrics

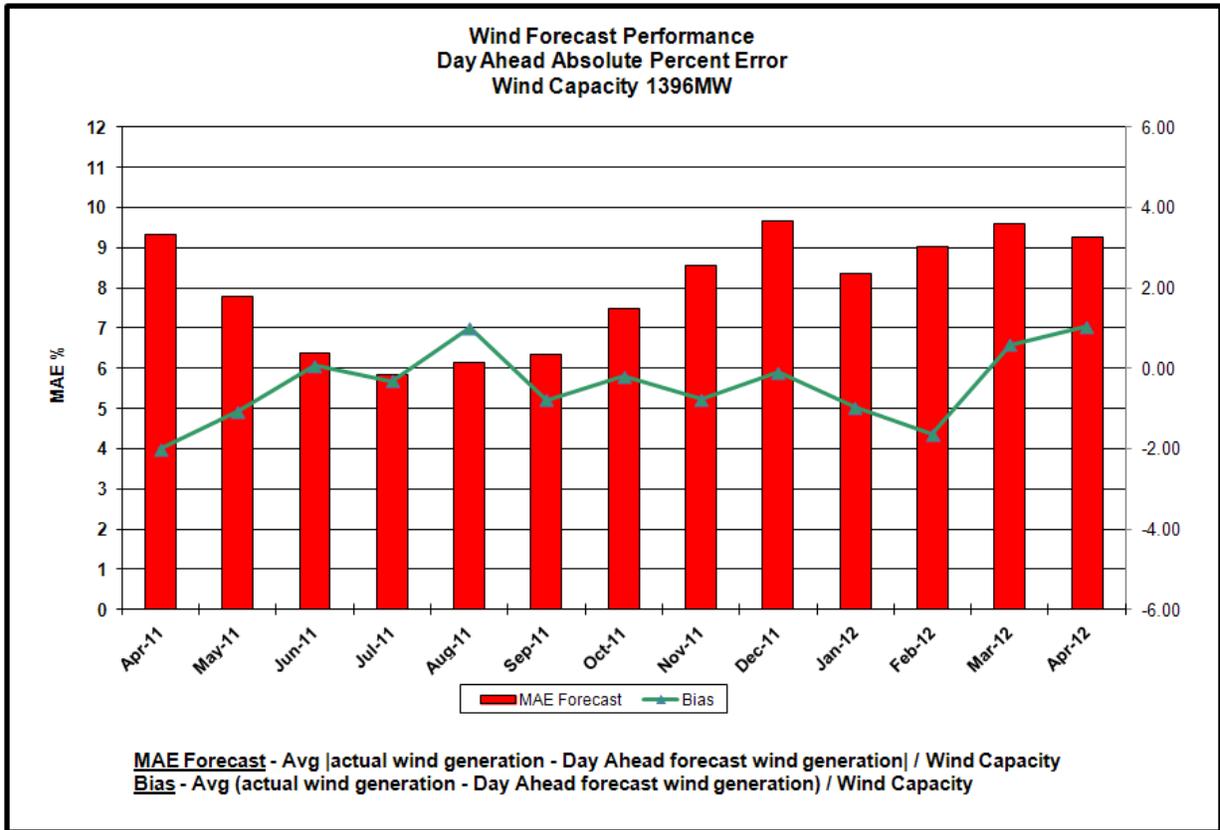

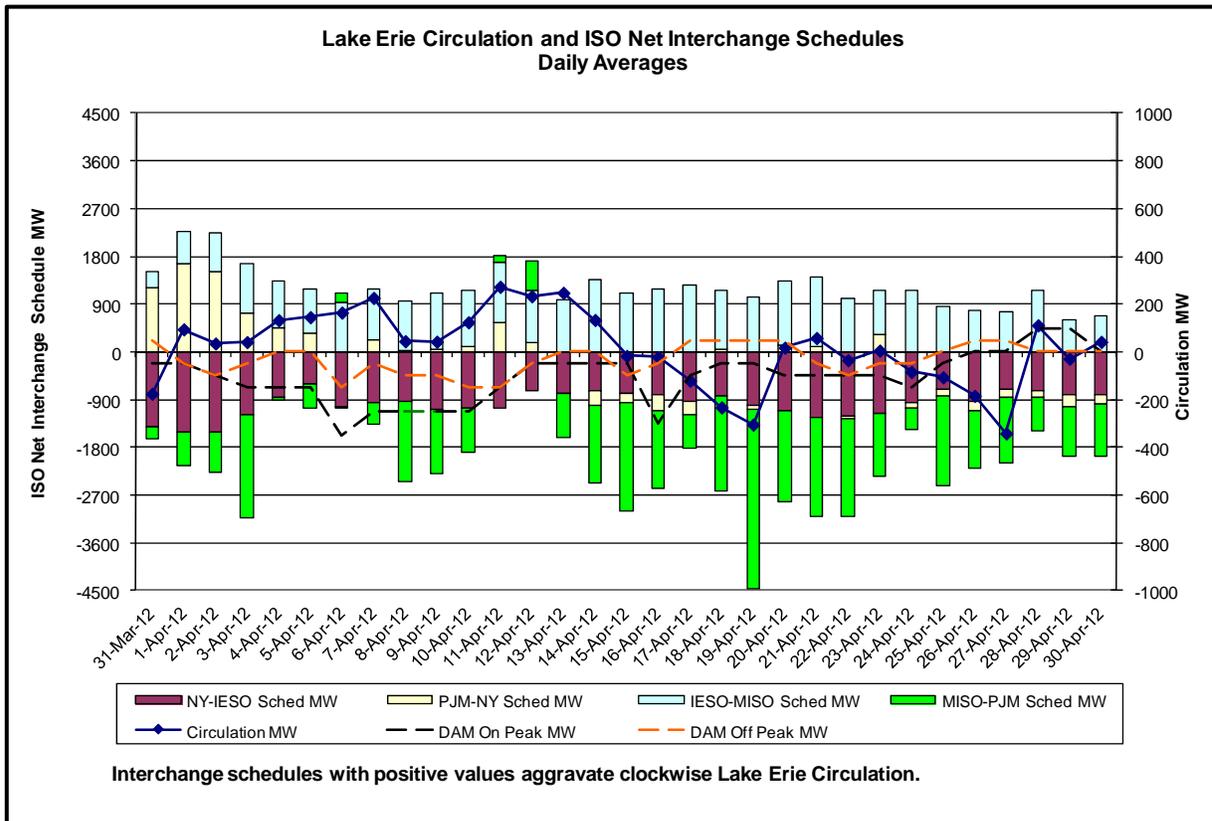

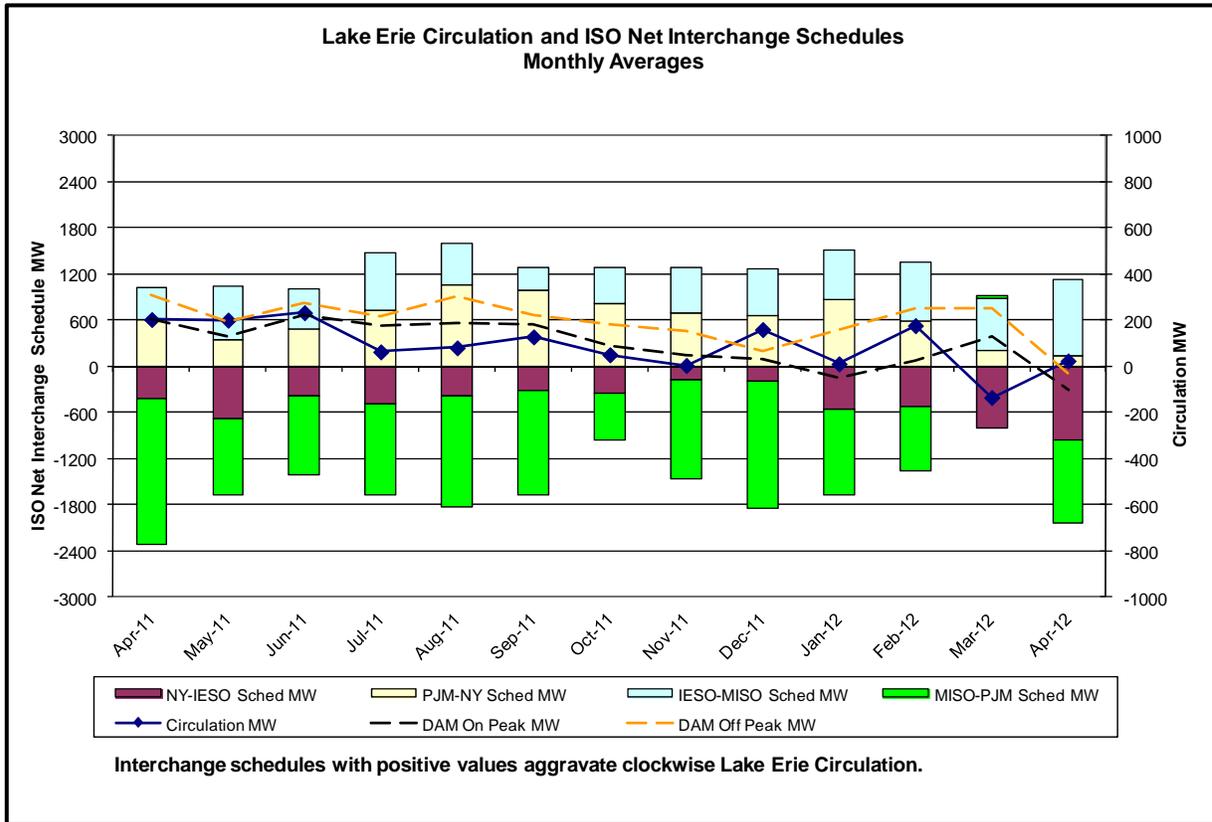

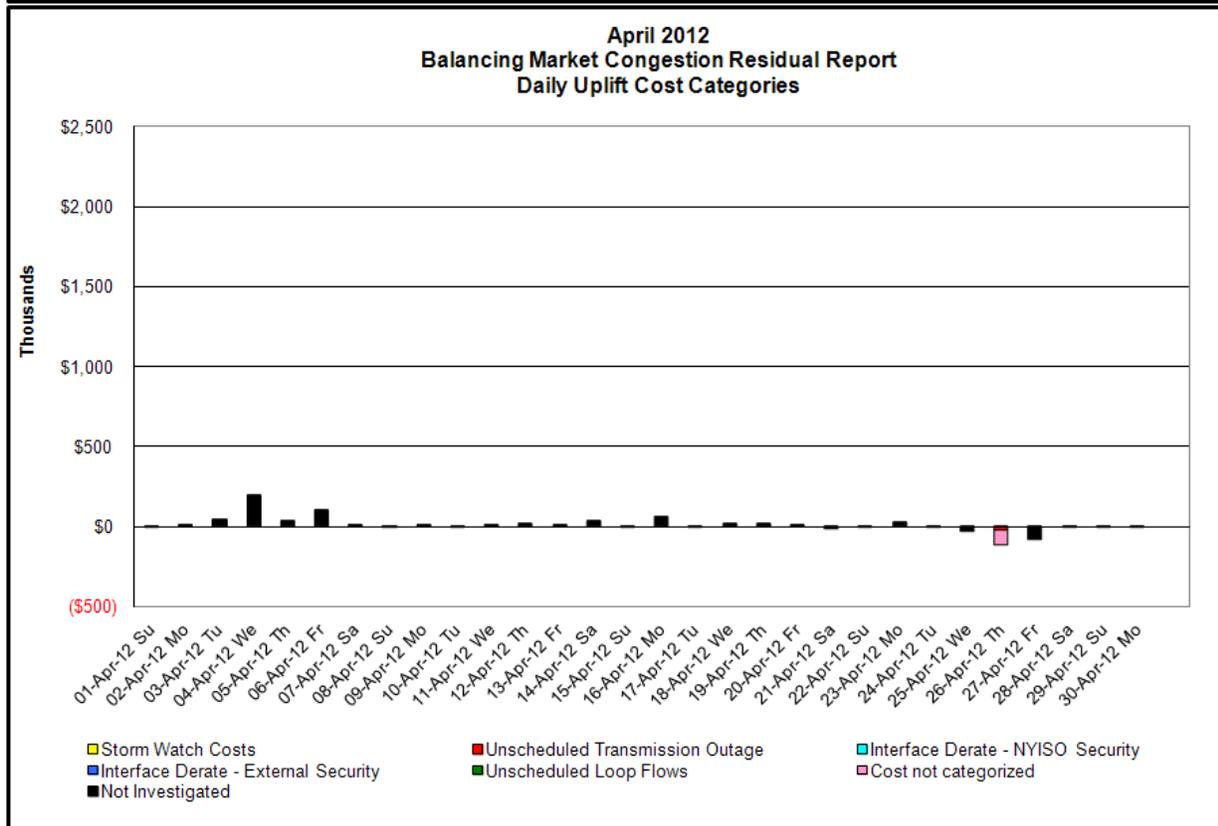

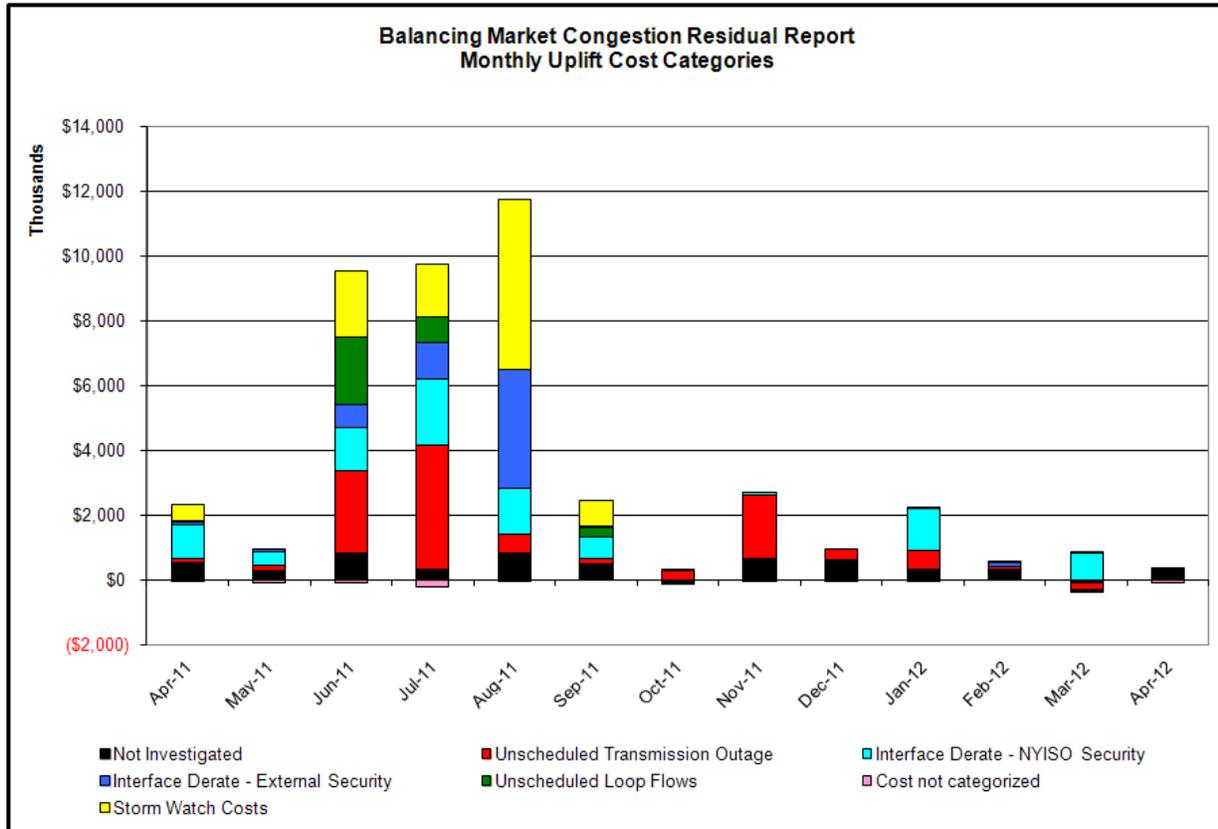

Market Performance Metrics

Day's investigated in April: 26

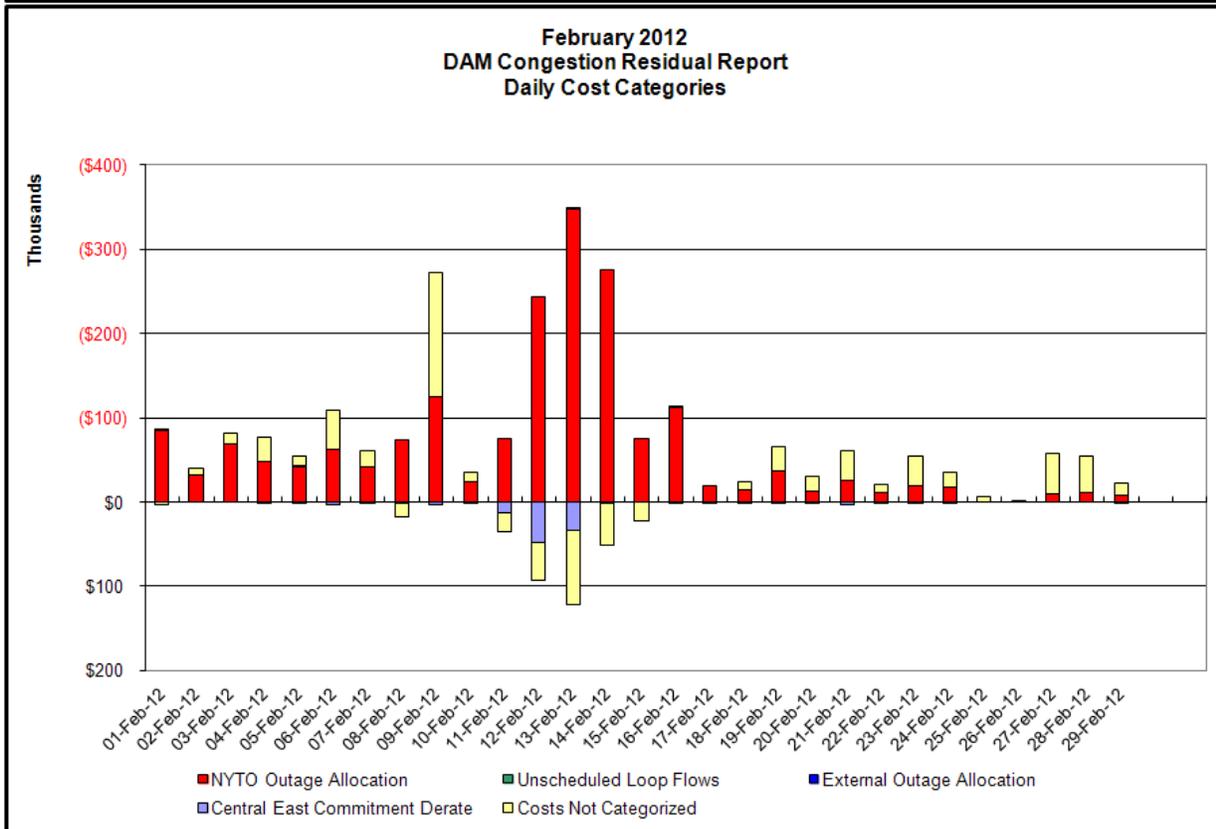

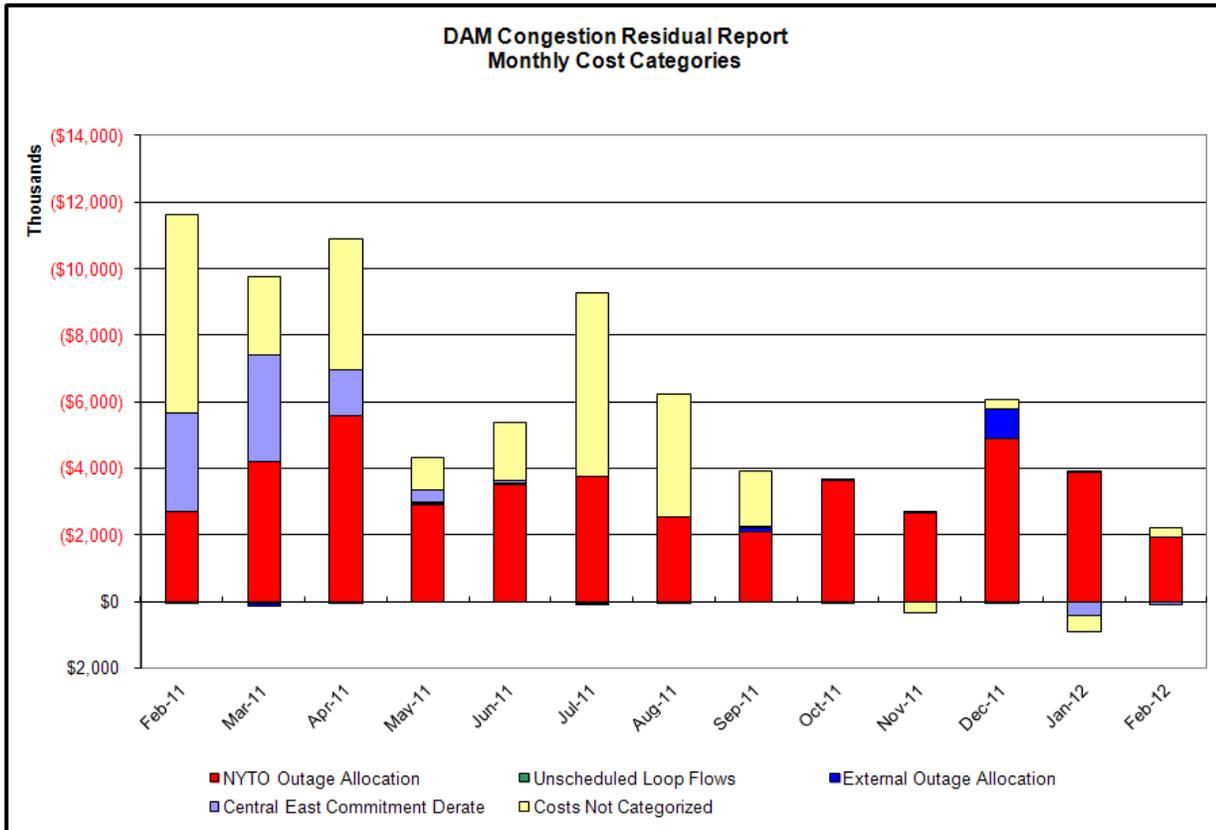

Event	Date (yyyymm)	Hours	Description
	4/26/2012	20	Early return-to-service Jamaica-Corona 138kV (#18001)

Real-Time Balancing Market Congestion Residual (Uplift Cost) Categories

<u>Category</u>	<u>Cost Assignment</u>	<u>Events Types</u>	<u>Event Examples</u>
Storm Watch	Zone J	Thunderstorm Alert (TSA)	TSA Activations
Unscheduled Transmission Outage	Market-wide	Reduction in DAM to RTM transfers related to unscheduled transmission outage	Forced Line Outage, Unit AVR Outages
Interface Derate - NYISO Security	Market-wide	Reduction in DAM to RTM transfers not related to transmission outage	Interface Derates due to RTM voltages
Interface Derate - External Security	Market-wide	Reduction in DAM to RTM transfers related to External Control Area Security Events	TLR Events, External Transaction Curtailments
Unscheduled Loop Flows	Market-wide	Changes in DAM to RTM unscheduled loop flows impacting NYISO Interface transmission constraints	DAM to RTM Clockwise Lake Erie Loop Flows greater than 125 MW

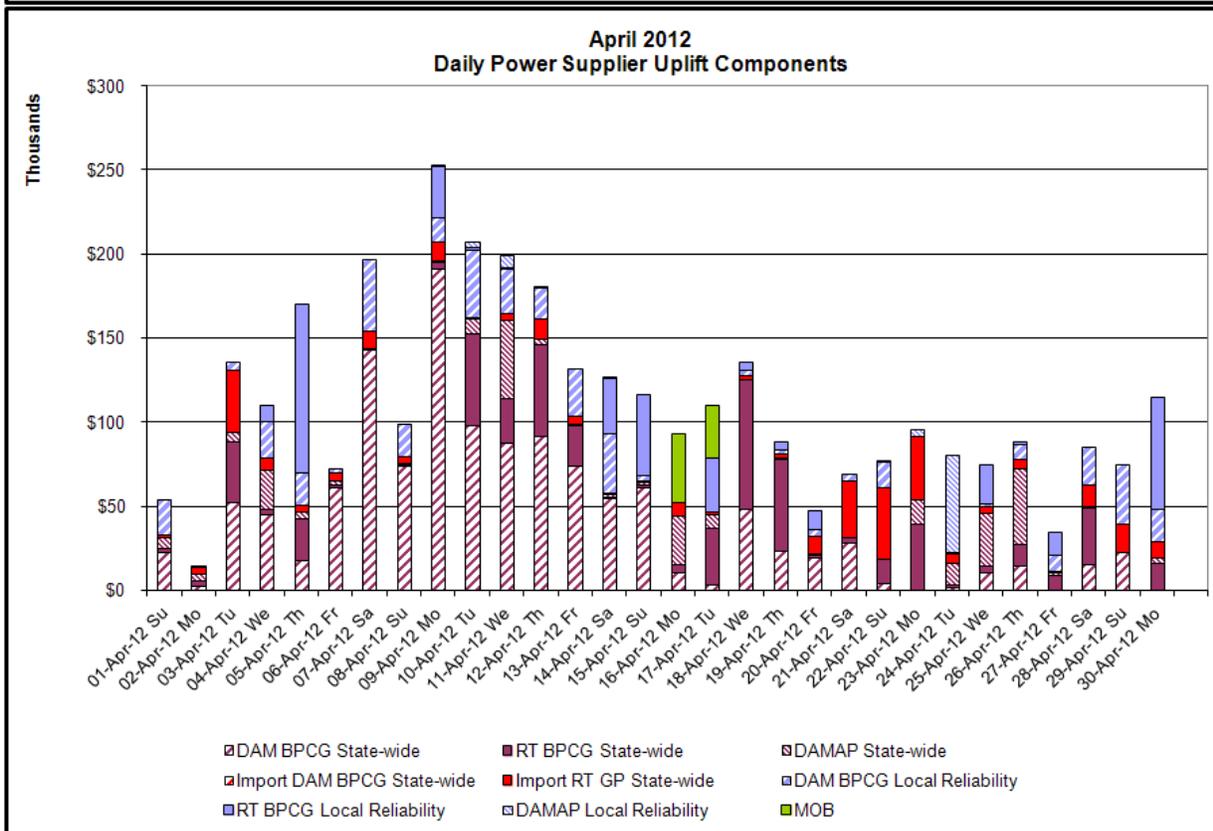

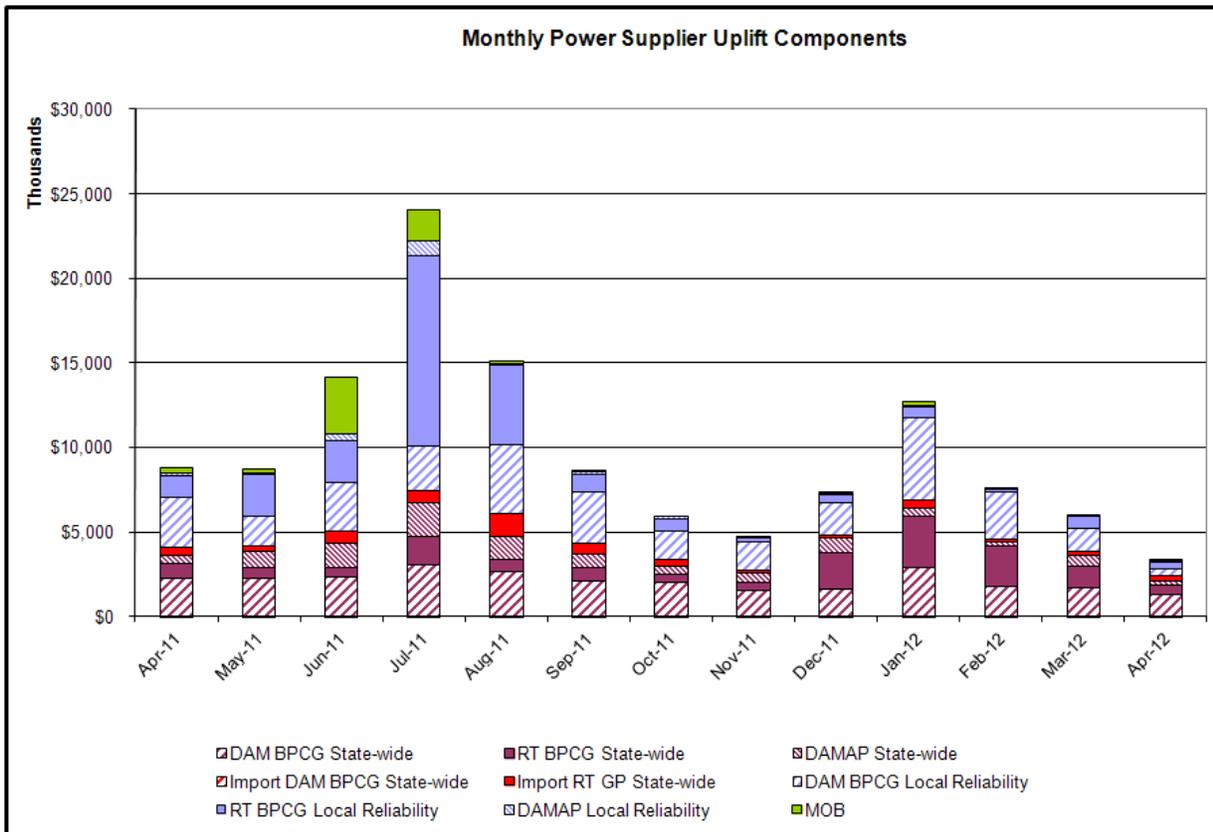

Monthly Balancing Market Congestion Report Assumptions/Notes

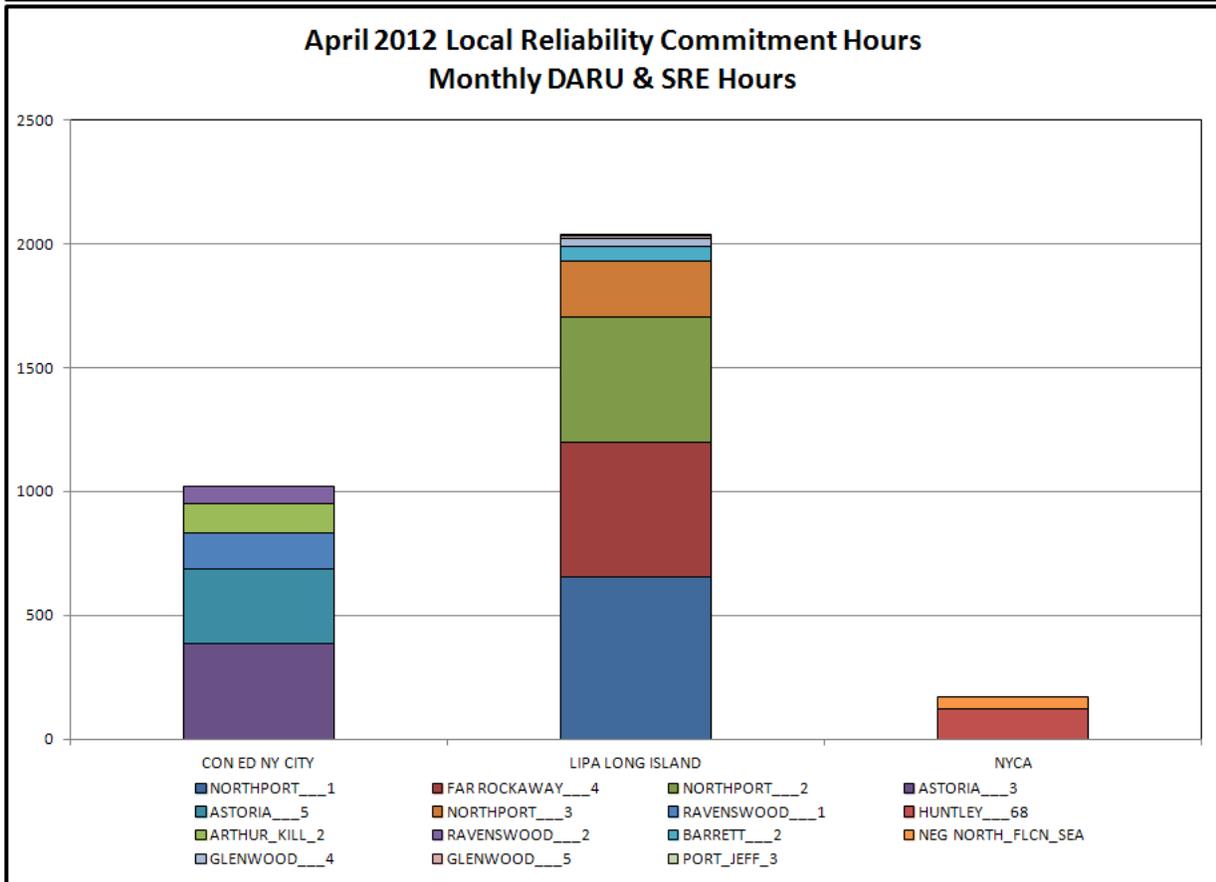

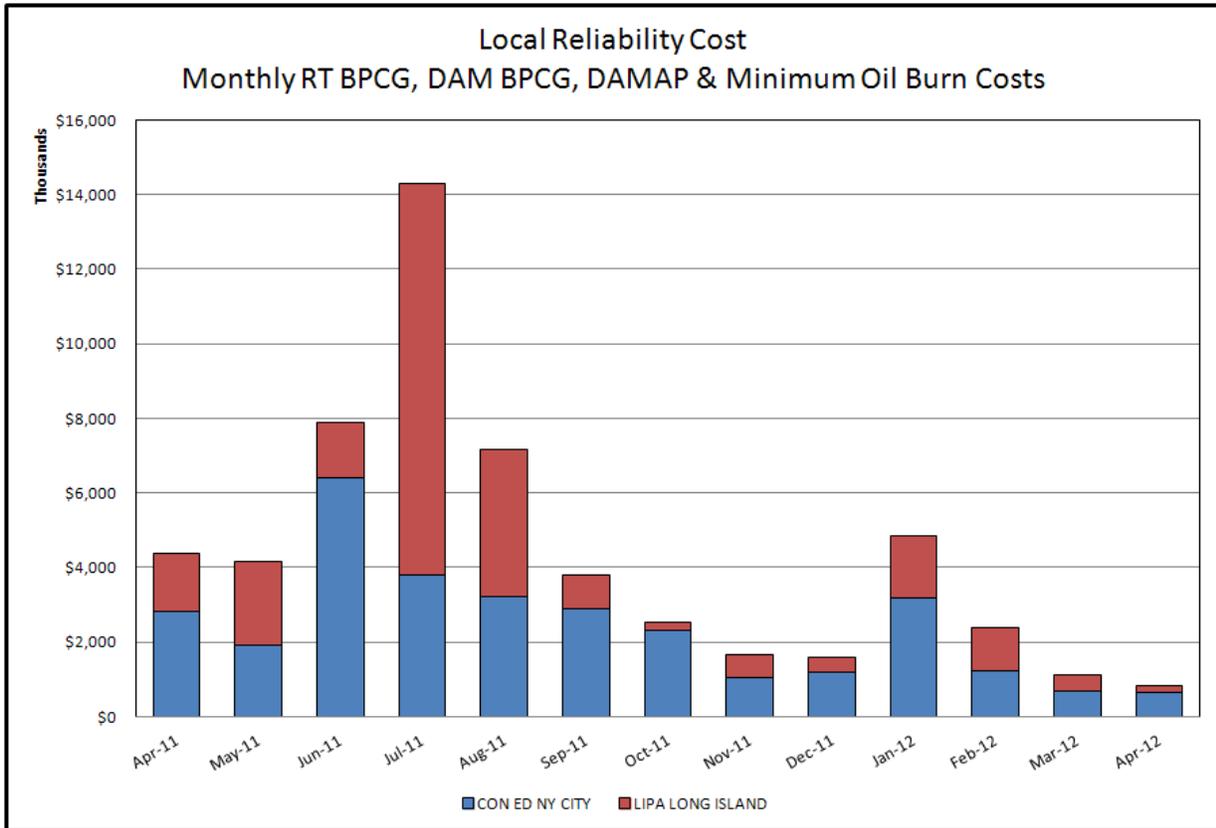

- 1) Storm Watch Costs are identified as daily total uplift costs
- 2) At a minimum those days with \$ 100 K/HR, shortfall of \$200 K/Day or more, or surplus of \$ 100 K/Day or more are investigated
- 3) Uplift costs associated with multiple event types are apportioned equally by hour
- 4) Investigations began with Dec 2008. Prior months are reported as Not Investigated.

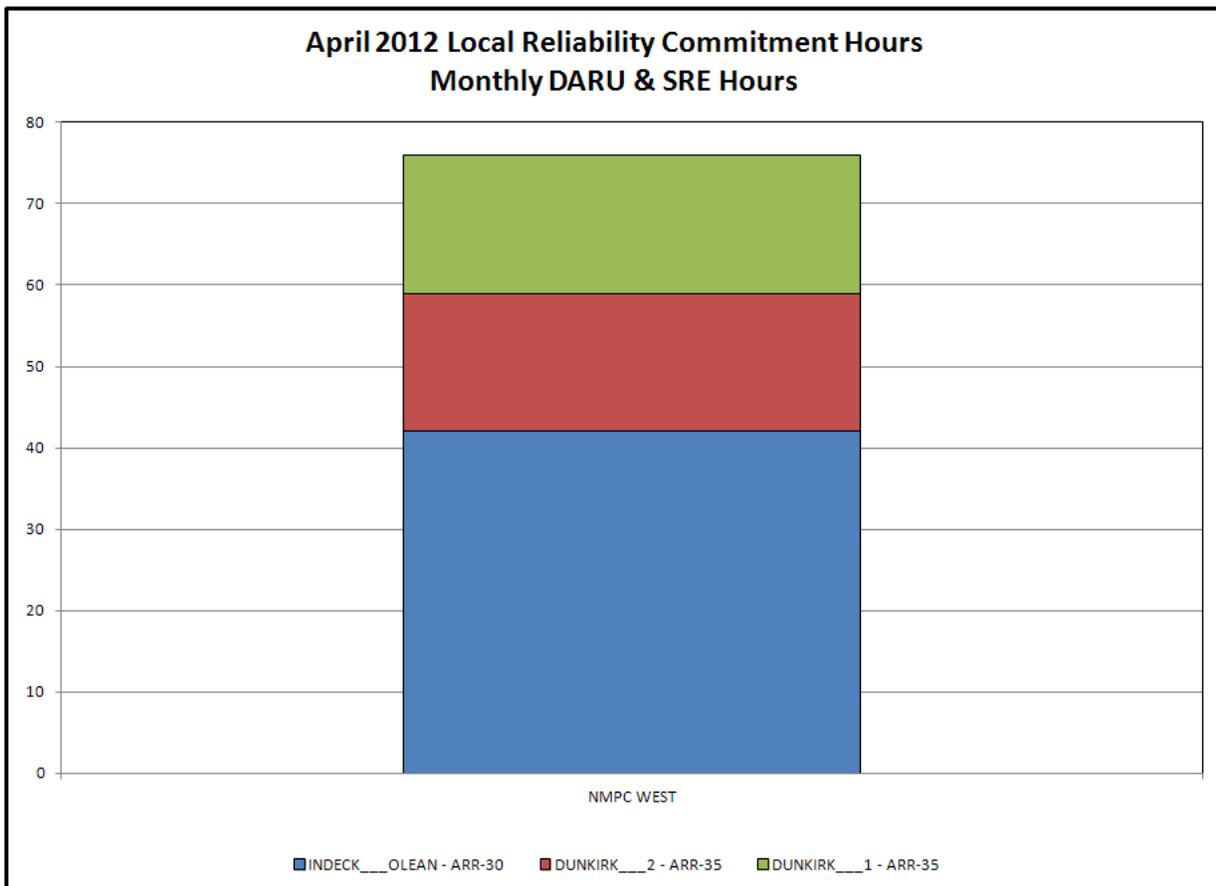

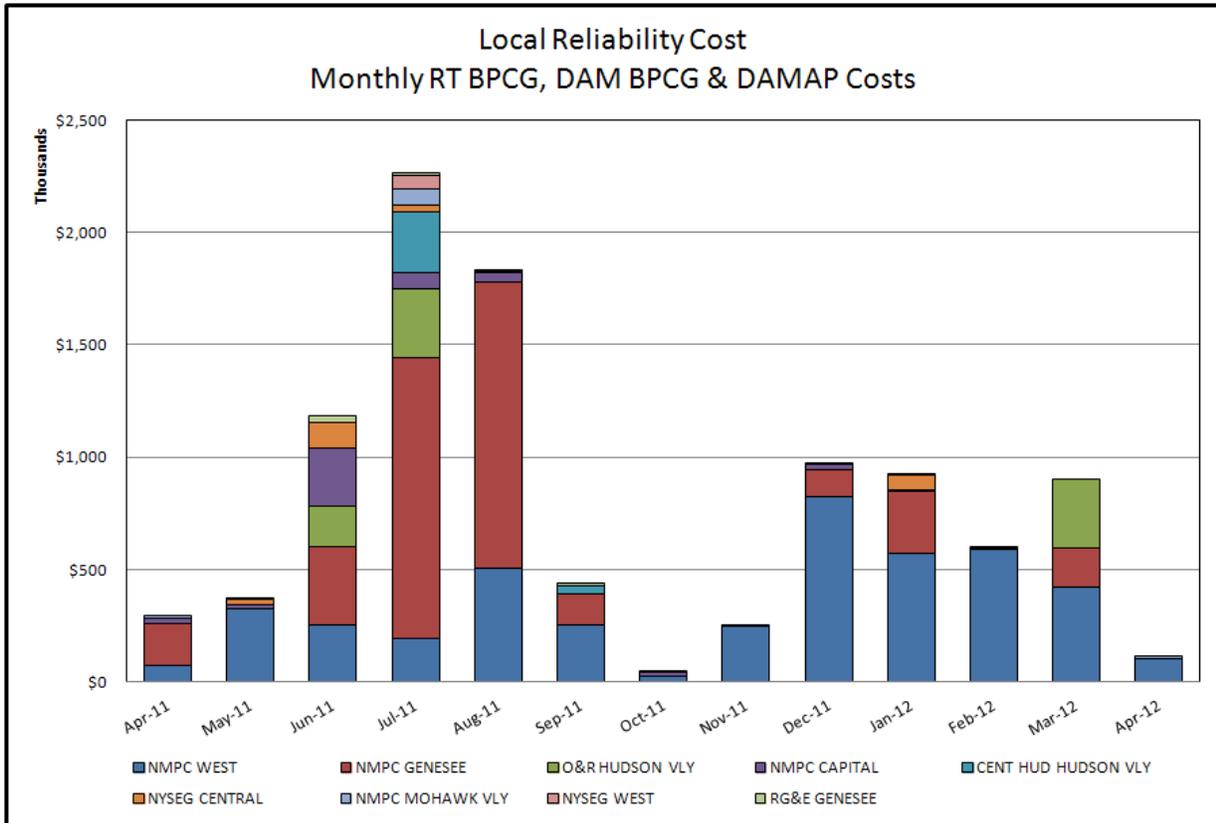

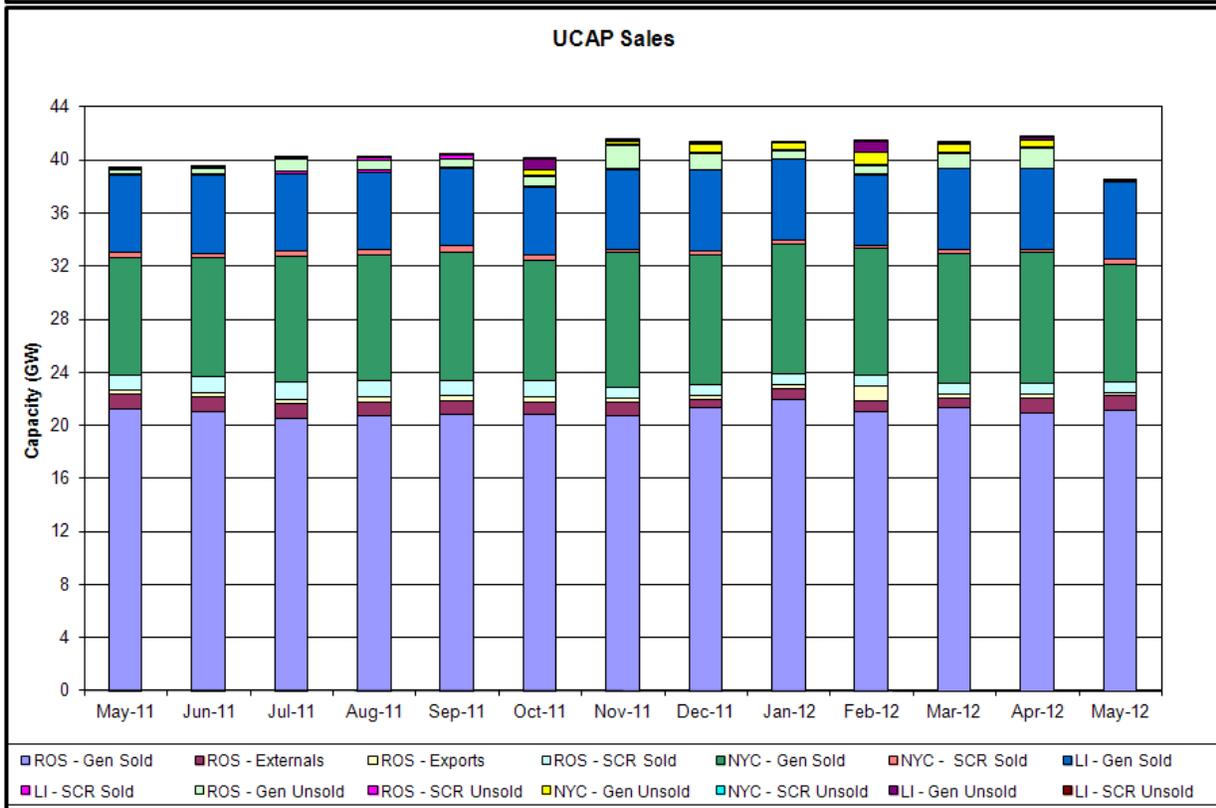

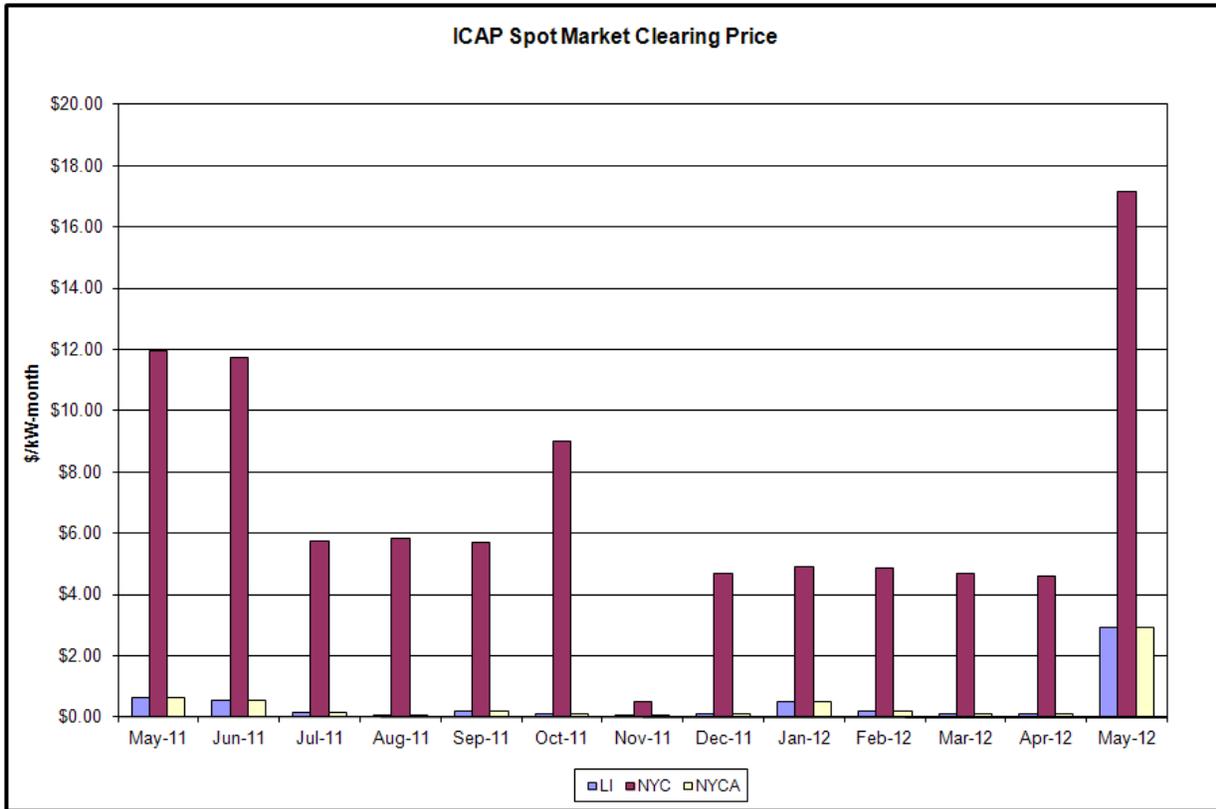

Day-Ahead Market Congestion Residual Categories

<u>Category</u>	<u>Cost Assignment</u>	<u>Events Types</u>	<u>Event Examples</u>
NYTO Outage Allocation	Responsible TO	Direct allocation to NYTO's responsible for transmission equipment status change.	DAM scheduled outage for equipment modeled in-service for the TCC Auction.
Unscheduled Loop Flows	All TO by Monthly Allocation Factor	Residual impact of Lake Erie circulation, MW difference between the DAM and TCC Auction.	Lake Erie Loop Flow Assumptions
External Outage Allocation	All TO by Monthly Allocation Factor	Direct allocation to transmission equipment status change caused by change in status of external equipment.	Tie line required out-of-service by TO of neighboring control area.
Central East Commitment Derate	All TO by Monthly Allocation Factor	Reductions in the DAM Central East_VC limit as compared to the TCC Auction limit, which are not associated with transmission line outages.	

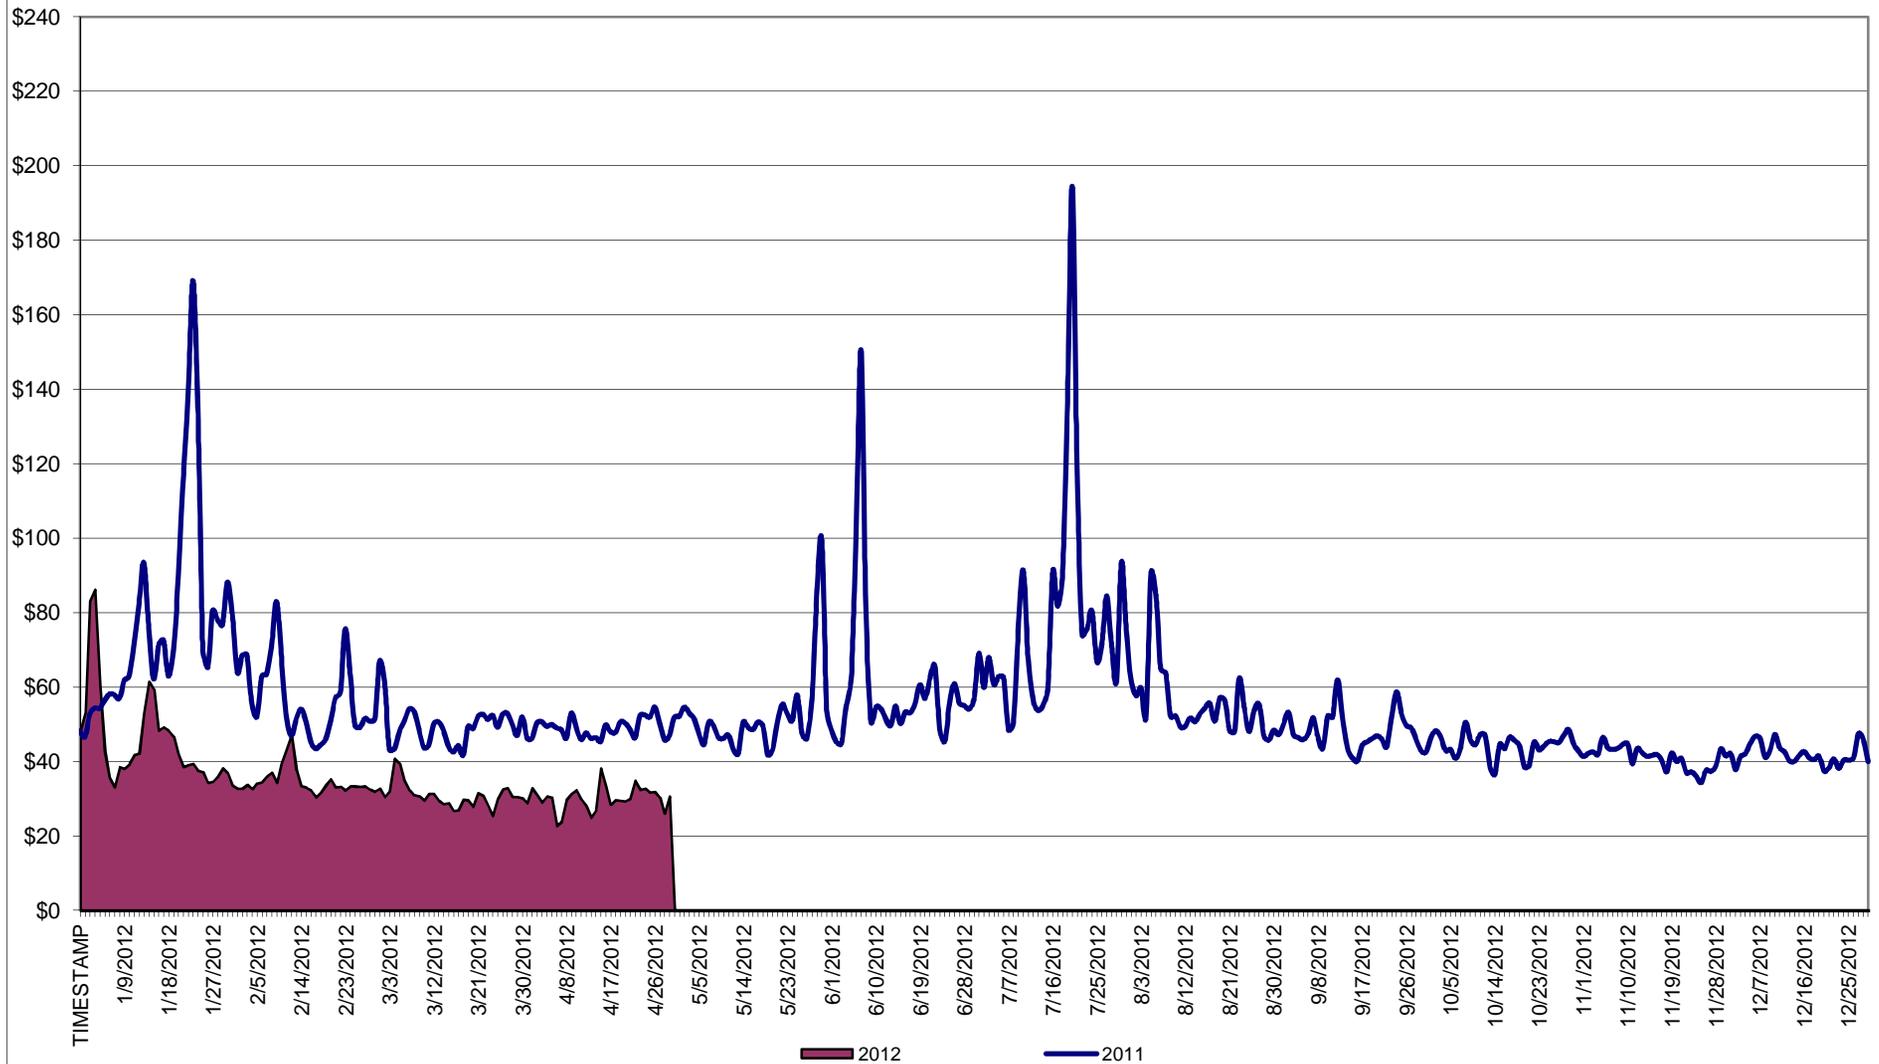

Market Performance Highlights for April 2012

- **LBMP for April is \$28.30/MWh, comparable to \$28.98/MWh in March 2012.**
 - Day Ahead and Real Time Load Weighted LBMPs are down compared to March 2012.
- **Average monthly year-to-date cost of \$36.05/MWh, a decrease from the previous month, \$37.91/MWh.**
- **Average daily sendout is 396 GWh/day in April; down from 407 GWh/day in March 2012 and comparable to 398 GWh/day in April 2011.**
- **Natural gas and distillate prices are down compared to the previous month.**
 - Natural Gas is \$2.13/MMBtu, down from \$2.34/MMBtu in March.
 - Kerosene is \$24.32/MMBtu, down from \$24.65/MMBtu in March.
 - No. 2 Fuel Oil is \$22.45/MMBtu, down from \$22.91/MMBtu in March.
 - No. 6 Fuel Oil is \$20.37/MMBtu, down from \$21.19/MMBtu in March.
- **Uplift per MWh is lower compared to the previous month.**
 - Uplift (not including NYISO cost of operations) is -\$0.18/MWh, lower than -\$0.03/MWh in March.
 - The Local Reliability Share is \$0.07/MWh.
 - The Statewide Share is -\$0.25/MWh.
 - TSA \$ per NYC MWh is \$0.00/MWh.
 - Total uplift (Schedule 1 components including NYISO Cost of Operations) is lower compared to March.

Daily NYISO Average Cost/MWh (Energy & Ancillary Services)*
 2011 Annual Average \$56.47/MWh
 April 2011YTD Average \$59.15/MWh
 April 2012YTD Average \$36.05/MWh

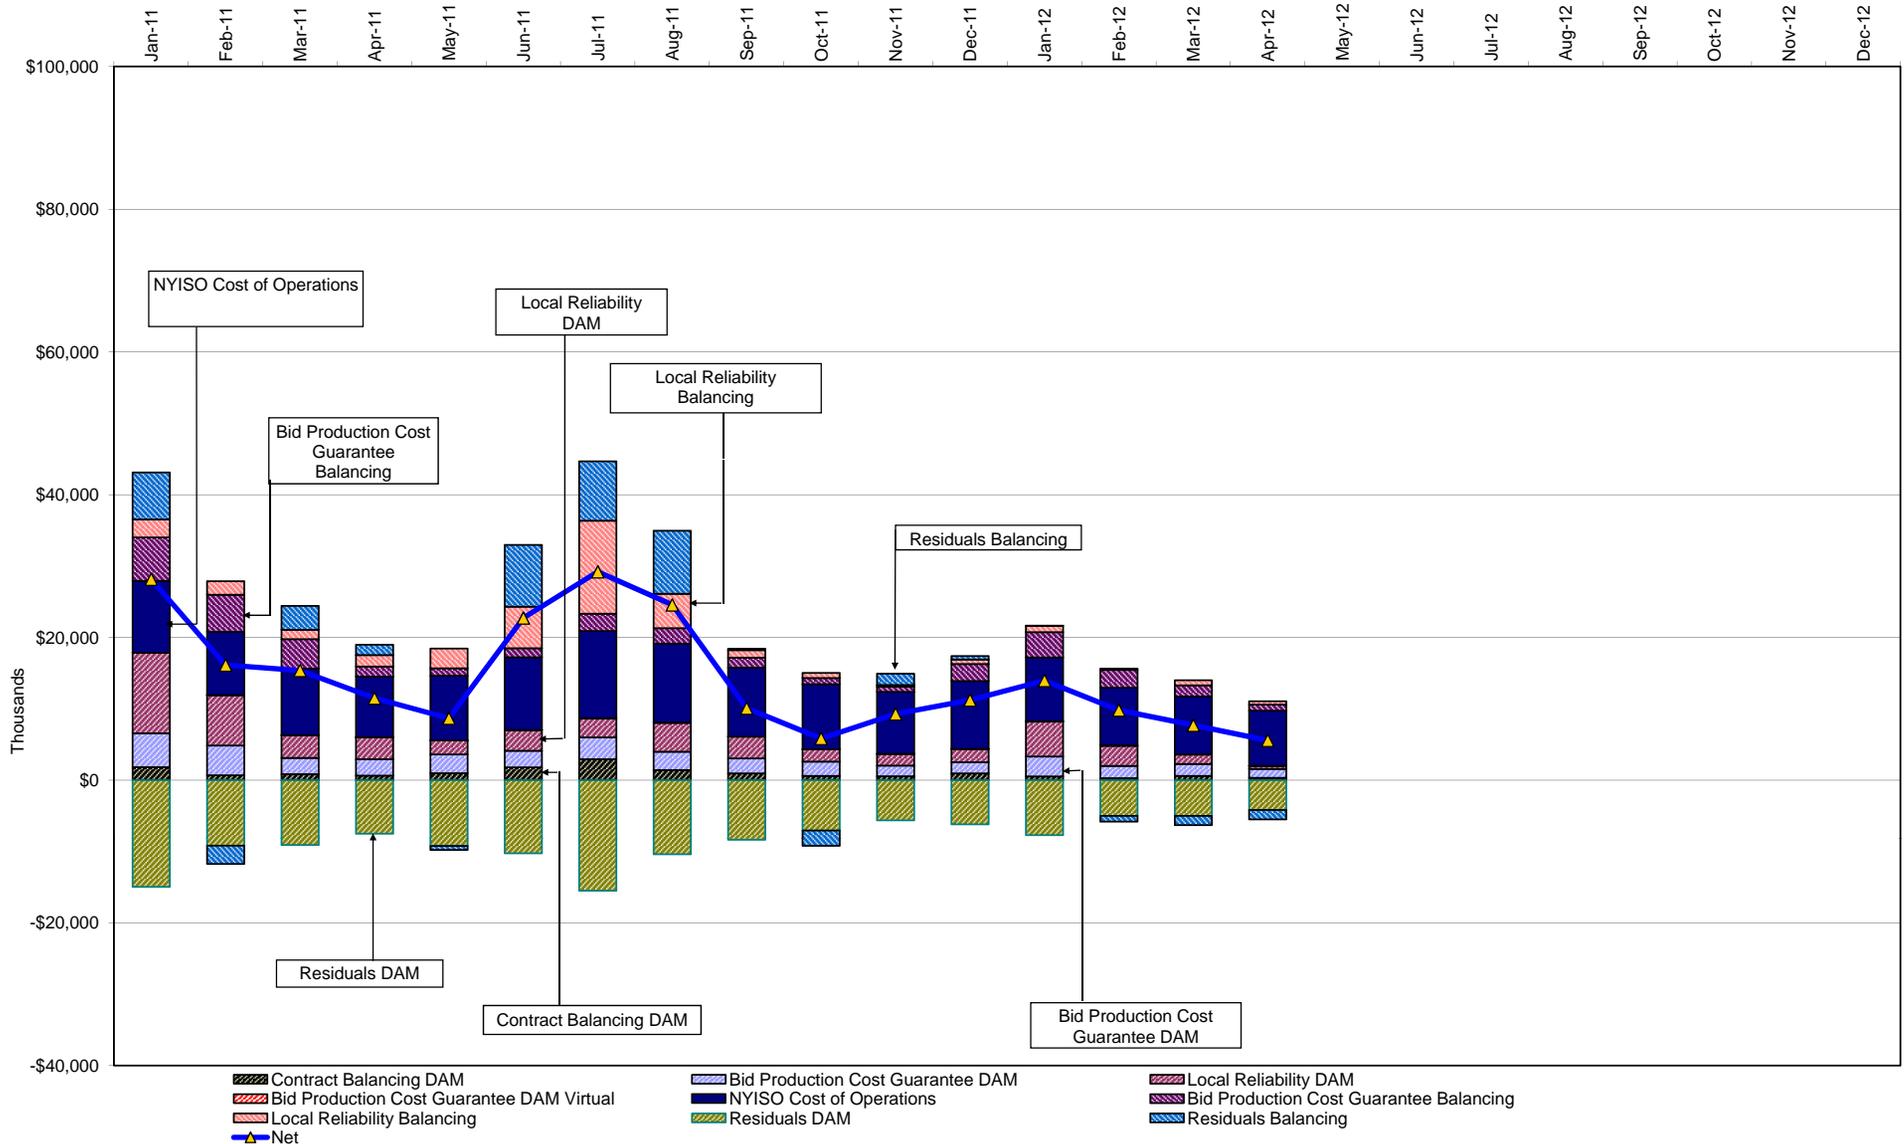

* Excludes ICAP payments.

NYISO Dollar Flows - Uplift- OATT Schedule 1 components - Data through April 30, 2012

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.
 DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.
 DAM residuals consist of both energy and loss revenue collections and payments. By design, there is a net over collection of revenues due to the difference between the marginal losses paid to generation and the average losses charged to loads.

Day Ahead Forecast - April 2012 Percent Error - Actual & Weather Adjusted

Day-Ahead Forecast Accuracy - Cumulative Performance 2012 Year-to-Date

Project	Status and Milestone Deliverables
Business Intelligence Products	
Market and Settlement Data Management Phase I: Broader Regional Markets	<p>Status: Broader Regional Markets (BRM) initiatives will require reporting and analysis on historical BMS and MIS data beginning in 2012. Analysis will need to be performed over a large time span of data. BMS data that is currently retained for only ten days will be retained for up to five years for analysis. This deployment is scheduled for the 4th quarter in support of Market to Market with PJM.</p> <p>Deliverables: To achieve BRM reporting and analysis requirements, this project will provide a platform for analytics and reporting as well as analytics of other control area data that may be required.</p>
eTariff Public Website Module	<p>Status: This project will add the eTariff Public Website module to www.nyiso.com. This deployment is targeted for the 4th quarter.</p> <p>Deliverables: The 2012 project will provide Market Participants with new functionality that allows searching and viewing capabilities for NYISO tariffs, filings and docket numbers.</p>
Public Website: Publishing Process	<p>Status: The NYISO public website uses several older systems to maintain the content on the website. This deployment is scheduled for the 4th quarter.</p> <p>Deliverables: This project will replace the current content management technology and the portal technology with a single, more efficient, and cost-effective solution using Microsoft SharePoint to maintain and post documents to the public website.</p>
Capacity Market Products	
Additional Capacity Zones	<p>Status: The NYISO and stakeholders developed the rationale in 2010 for creating additional capacity zones, identified as a recommendation in the 2009 State of the Market report. NYISO submitted a FERC compliance filing in January 2011 to define the criteria for creating new capacity zones. The Market Design Concept was discussed with stakeholders in late October 2011 and the compliance filing was submitted in November 2011. Deployment is scheduled for 2014 consistent with the next Demand Curve Reset. Completion of the functional requirements specification is scheduled for the end of 1st quarter 2012.</p> <p>Deliverables: The 2012 project will focus on completing the functional requirements specification for additional capacity zones and initiating the software development process.</p>

Project	Status and Milestone Deliverables
---------	-----------------------------------

Demand Response Products	
--------------------------	--

DSASP Direct Communication Phase 2	<p>Status: Based on the NYISO’s response to FERC Order 719, in 2010 NYISO and stakeholders discussed the changes needed to accommodate aggregated small demand response resources providing ancillary services (DSASP). The Market Design Concept to treat aggregations in the same manner as individual DSASP resources was proposed and approved by Market Participants at the December 2010 BIC. Functional requirements for direct communications were successfully completed and communicated to the Market Participants in 2011. Market rule changes and software changes are required to support the implementation of DSASP Aggregations. The deployment is targeted for 4thQ 2012.</p> <p>Deliverables: The focus of the 2012 project is the implementation of the required rule changes and software changes.</p>
Demand Response Information System: Event Notification	<p>Status: NYISO currently handles event notification for Demand Response through a vendor who is no longer reliable in delivering notification, which has resulted in NYISO Operations having to utilize manual processes for sending event notification to stakeholders. Replacement of NYISO’s existing event notification system with DRIS will enhance reliability by ensuring that demand response aggregators receive notifications in a consistent and timely manner. Integration with DRIS reduces duplication of event information and facilitates event response reporting. This deployment is targeted for 2nd quarter 2012.</p> <p>Deliverables: The focus of the project in 2012 is the implementation of a replacement of the event notification vendor to allow for integration with the Demand Response Information System (DRIS).</p>
Demand Response – Real Time Energy Market	<p>Status: NYISO will focus on the development of market rules and identification of software changes required to permit demand response entities to participate in the NYISO’s real-time energy market. Market Design approval is targeted for 4th quarter 2012.</p> <p>Deliverables: Market Design Approval is the focus of the project in 2012.</p>
Order 745 – Day Ahead Demand Response Program (DADRP) Compliance	<p>Status: NYISO will implement the net benefits test based on the compliance filing submitted in 2011. Also, as part of the compliance obligation, NYISO will conduct a study to evaluate the feasibility of incorporating a dynamic net benefits test into the day-ahead and real-time unit commitment and scheduling processes. Implementation of the net benefits test was scheduled for a March deployment; however, as of March 8, 2012, FERC has not responded to NYISO’s August 2011 compliance filing on the net benefits test; NYISO notified FERC in mid-February that it would not be able to implement on the proposed effective without an answer from FERC; project is temporarily reprioritized pending a response from FERC. A compliance filing detailing the results of the feasibility study is due to FERC on September 21, 2012.</p> <p>Deliverables: The focus of this project in 2012 is the implementation of the Net Benefits test as filed with FERC in 2011 and completion of the dynamic net benefits study.</p>

Project	Status and Milestone Deliverables
Energy Markets Products	
Ancillary Services Mitigation	<p>Status: Per recommendation of NYISO’s Market Advisor, NYISO should modify two mitigation provisions that may limit competitive 10-minute reserves offers in the day-ahead market. A market design concept was presented to stakeholders in the 4th quarter of 2011. Tariff changes and software changes are planned for 4th quarter 2012.</p> <p>Deliverables: This project will focus on implementation of required tariff changes and software changes to support the market design.</p>
Market to Market Coordination - PJM	<p>Status: In late-2006, PJM approached NYISO, interested in developing a program to allow inter-control area dispatch to help manage congestion. PJM has implemented a program with MISO. In 2007, NYISO initiated discussions with PJM to further understand the MISO program and begin to outline a conceptual straw proposal for a similar program between PJM and NY. NYISO has continued to define the details of a Market to Market (formerly known as Congestion Management) protocol between NYISO and PJM. In 2009, NYISO worked with PJM and NYISO stakeholders to develop a Market to Market protocol. Protocol development was not completed in 2009. The question of entitlement rights on coordinated flow gates could not be addressed until the NYISO had developed or procured a market flow calculator. In 2011 the NYISO implemented the market flow calculator and continued to work with PJM to meet the 2010 FERC Order to implement Market to Market coordination. The software deployment is targeted for 4th quarter 2012.</p> <p>Deliverables: The focus of this project in 2012 is to deploy all of the required software changes to enable Market to Market coordination between PJM and NY.</p>
Interregional Transaction Coordination Phases I and III	<p>Status: Interregional Transaction Coordination is a Broader Regional Markets initiative that provides more frequent scheduling of external energy transactions with the interfaces. Currently, energy transactions between NY and other control areas are evaluated economically once for the hour. The 2008 and 2009 State of the Market recommendation #2 is, “NYISO continue its work with neighboring control areas to better utilize the transfer capability between regions.” Phase I of this project will enable more frequent scheduling with Hydro Quebec (HQ). Phase III will enable more frequent scheduling with PJM. Phase I is complete. Phase III is targeted for deployment in June 2012.</p> <p>Deliverables: The focus of this project in 2012 is to deliver the necessary software enhancements and tools to implement intra-hour energy transaction scheduling with PJM.</p>
Interregional Transaction Coordination Phase IV – ISO-NE Intra-hour Transaction Scheduling (IRIS)	<p>Status: This project expands upon the work completed in Phases I and III by implementing Intra-hour energy transaction scheduling capabilities with ISO-NE. The 2008 and 2009 State of the Market recommendation #2 is, “NYISO continue its work with neighboring control areas to better utilize the transfer capability between regions.” The tariff filing was submitted in 4th Q 2011. The Architectural Design Specification is targeted for 4th quarter 2012.</p> <p>Deliverables: The focus of the project in 2012 is to complete the Architectural Design Specification.</p>
Interregional Transaction Coordination	<p>Status: This project expands upon the work of Phase 4 by leveraging the designs with New England on Coordinated</p>

Project	Status and Milestone Deliverables
Phase V – PJM Coordinated Transaction Scheduling	<p>Transaction Scheduling. PJM is hoping to evolve transaction scheduling with the NYISO to gain full efficiencies for both regions. A market design concept is targeted for the 4th quarter 2012.</p> <p>Deliverables: The focus of this project in 2012 is the proposal of a market design concept.</p>
Order 755: Regulation Compensation	<p>Status: FERC issued Order 755 in October 2011 with a compliance filing detailing design and implementation plan due in April 2012, followed by implementation in October 2012. This project is targeted for deployment in the 4th quarter 2012.</p> <p>Deliverables: The focus of this project in 2012 is the deployment of software changes necessary to support NYISO's compliance filing submitted in April 2012.</p>
Scheduling and Pricing: Enhanced Scarcity Pricing	<p>Status: The 2010 State of the Market recommends the NYISO investigate the possibility of more efficient price setting when energy within the NYCA is scarce. The NYISO will evaluate the causes for the pricing inefficiency and, if necessary, develop and review with stakeholders potential market enhancements that will best capture most efficient price for periods with scarce energy.</p> <p>Deliverables: The focus of this project in 2012 is stakeholder approval of the market design.</p>
Enterprise Technology Products	
Ranger Messaging Integration	<p>Status: Market to Market Coordination requires near real-time business messages to be exchanged between NYISO and the market systems of its external partners in support of the flow gate coordination process. This project will augment existing integration capabilities to include secure near real-time exchange of structured business data between NYISO's market system, PJM, and other partners. Near real-time messaging will increase as NYISO processes increasingly interact with external partners and customers. Deployment of ranger messaging integration is targeted for 4th quarter 2012 in support of Market to Market Coordination with PJM.</p> <p>Deliverables: The focus of this project in 2012 is to implement a new platform to enable near real-time message exchange.</p>
Enterprise Project Management (EPM) Platform: Phase I	<p>Status: This initiative will deliver Microsoft Project 2010 in a robust, hosted environment that will provide NYISO with up-to-date project scheduling and tracking tools, centralized and consistent project reporting for improved portfolio management, and improved project team collaboration. This platform will also enable future enhancements to NYISO's project resource planning and management process. Phase I is scheduled for implementation in 2nd quarter 2012.</p> <p>Deliverables: The focus of Phase I is implementation of the hosted solution combined with training and updated business process to effectively utilize the platform.</p>
Finance Products	

Project	Status and Milestone Deliverables
Bad Debt Processing Flexibility	<p>Status: This project will provide NYISO the ability to place Bad Debt Losses on any invoice (Flexible Invoice Period [FIP] or Monthly) to reduce exposure and aid in timely recovery of funds. Currently, bad debt losses can only be applied to a monthly invoice, creating a potential delay of 3-4 weeks should a bad debt loss occur shortly after monthly invoice issuance. This project would reduce the length of time funds are borrowed from Working Capital and reduce credit risk exposure. The software changes were successfully deployed in March. This project is complete.</p> <p>Deliverables: The focus of this project is implementation of the required software changes.</p>
ICAP Weekly Invoicing Automation	<p>Status: This project will automate the process of assessing ICAP charges/credits on Flexible Invoicing Period (FIP) and Monthly invoices. This is a manually intensive process today spanning multiple departments. This project would eliminate the need for manual entry and reduce the potential for errors associated with manual processes. The software deployment of these changes is planned for January 2012. This project is complete.</p> <p>Deliverables: The focus of this project is the automation of the existing manual process.</p>
Transaction Credit Enhancements	<p>Status: Enhancements to the CMS application are needed to better align the credit requirements for external transactions (imports, exports, wheels) to the evolving market design for transactions occurring as part of the Broader Regional Markets initiatives. Market rules have been approved by stakeholders and detailed requirements are complete. Completion of the software development is scheduled for 4th quarter 2012 with plans to implement in 2013.</p> <p>Deliverables: The focus of this project in 2012 is to complete all of the software development.</p>
Operations & Reliability Products	
Energy Management System (EMS) Visualization	<p>Status: This is a multi-year project to determine the requirements, design and to implement the necessary situational awareness, data redundancy and communication infrastructure to facilitate operational control from the new Krey Primary Control Center. The Architectural Design is scheduled for completion in the 3rd quarter.</p> <p>Deliverables: The focus of this project in 2012 is completion of the Architectural Design.</p>
Phase I Meter Upgrade	<p>Status: The focus of this project is to move existing and new circuits to a new configuration and to add the new building to the network, which is required in order to fully support Phase I data needs in the new control center. The Architectural Design is scheduled for completion in the 3rd quarter.</p> <p>Deliverables: The focus of this project in 2012 is completion of the Architectural Design.</p>

Project	Status and Milestone Deliverables
Hudson Transmission Partners (HTP) Controllable Tie Line	<p>Status: This project would support the implementation of a new controllable tie line from PJM into NYCA. Targeted commercial date is early 2013. Software changes are targeted for 4th quarter 2012.</p> <p>Deliverables: The focus of this project in 2012 is to deploy the required software changes in support of the targeted commercial operation date.</p>
Rest of State (ROS) DAM Mitigation Automation	<p>Status: Currently MMA monitors for ROS DAM BPCG mitigation in a very labor intensive and time consuming manner. All other BPCG mitigation has been automated (i.e. DAM and RT for NYC and RT for ROS). The implementation of ROS DAM BPCG is the last remaining tariff defined full threshold BPCG mitigation that needs to be automated. Approval of the market design is targeted for 4th quarter 2012.</p> <p>Deliverables: The focus of this project in 2012 is stakeholder approval of the market design.</p>
Planning and TCC Market Products	
TCC Multi-Duration/Non-Historic Fixed-Price TCC Phase I	<p>Status: This project continues the 2010 efforts to provide for TCC Auction 'End State' functionality; in 2010 NYISO implemented functionality for MPs to sell TCCs in any round. Continuing efforts will focus on the implementation of Non-Historic Fixed Price TCCs, multi-duration capability period auctions, and balance of period TCCs. NYISO completed the functional requirements in 2011 as planned. NYISO is targeting a 4th quarter software deployment to support offering Non-Historic Fixed Price TCCs beginning with the Spring 2013 Capability Period Auction.</p> <p>Deliverables: The focus of this project is a software deployment in support of NYISO's Non-Historic Fixed-Price TCC Compliance Filing.</p>
High Performance Computing for Planning Studies Phase II	<p>Status: This is a project to put in place the infrastructure required to enable System Resource Planning to conduct large, data intensive planning studies. The solution for MARs was successfully deployed in August 2011. Phase II of this project will deploy MAPS on the High Performance Computing platform. This deployment is targeted for 4th quarter 2012.</p> <p>Deliverables: The focus of this project in 2012 is the implementation of the solution for MAPS.</p>
Siemens PTI Model-on-Demand Phase II	<p>Status: The second phase of this project will focus on maintenance and consulting for implementation of the Siemens PTI Model-on-Demand (MOD) web portal, which will allow TOs and MPs to review and approve data in a structured, interactive manor. The software design is targeted for completion in the 4th quarter 2012.</p> <p>Deliverables: The focus of this project in 2012 is the completion of the software design.</p>

Summary Description of FERC Regulatory Filings, Investigations and Rulemakings and Related Orders in NYISO Matters April 2012

Filing Date	Filing Summary	Docket	Order Date	Order Summary	Outcome
12/28/2011	NYISO 205 filing of tariff revisions to add Coordinated Transaction Scheduling	ER12-701-000	04/19/2012	FERC order accepting revisions subject to compliance to set effective date	Accepted compliance required
01/13/2012	NYISO errata filing re: CTS filing	ER12-701-000	04/19/2012	FERC order accepting revisions subject to compliance to set effective date	Accepted compliance required
03/06/2012	NYISO errata filing to correct base tariff document (MST sec. 23.4) used in ER11-2544-001	ER12-1209-000	04/30/2012	Letter order accepting corrected base filing on the date previously accepted by FERC	Accepted
03/06/2012	NYISO errata filing to correct base tariff document (MST sec. 23.4) used in ER11-2544-002	ER12-1210-000	04/30/2012	Letter order accepting corrected base filing on the date previously accepted by FERC	Accepted
03/06/2012	NYISO errata filing to correct base tariff document (MST sec. 23.4) used in ER12-26-000	ER12-1211-000	04/30/2012	Letter order accepting corrected base filing on the date previously accepted by FERC	Accepted
03/06/2012	NYISO 205 filing re: Day-Ahead Margin Assurance (DAMAP) Payments to Gas Turbines and Request for Waivers	ER12-1215-000	05/08/2012	Letter order accepting revisions effective 3/7/12, as requested	Accepted
03/09/2012	NYISO errata filing re: Day-Ahead Margin Assurance (DAMAP) Payments to Gas Turbines and Request for Waivers (correct tariff records)	ER12-1215-001	05/08/2012	Letter order accepting revisions effective 3/7/12, as requested	Accepted
03/22/2012	NYISO filing of a request for limited tariff waiver, MST Sections 5.12.11.1.1 and 5.12.11.1.2, regarding registration of specific SCRs	ER12-1322-000	04/03/2012	FERC letter order granting tariff waiver as requested	Accepted
04/02/2012	NYISO filing of FERC Form No. 715 Annual Transmission Planning and Evaluation report	Form 715	No order	No order to be issued.	
04/02/2012	NYISO Annual Compliance Report Regarding Unreserved Use and Late Study Penalties	OA12-3-000			
04/03/2012	NYISO Response to the Answer of the Independent Market Monitor for PJM that was submitted in response to NYISO's 3/30/12 Request to Convene an On-the-Record Technical Conference	ER08-1281-010			

Filing Date	Filing Summary	Docket	Order Date	Order Summary	Outcome
04/04/2012	NYISO compliance filing re: Report on efforts to develop rules addressing compensation to generators that are determined to be needed for reliability	ER10-2220-000			
04/05/2012	NYISO filing of tariff revisions re: Order No. 741, MP verification of risk management procedures	ER11-3949-004			
04/10/2012	NYISO filing of a Presentation and Talking Points for a Requested Technical Conference on Interface Pricing	ER08-1281-010			
04/12/2012	NYISO filing of comments on TC Ravenswood Black Start Rate Schedule filing	ER12-1418-000			
04/13/2012	NYISO filing of a preliminary answer to the Complaint by Energy Spectrum, Inc. and Riverbay Corporation re: Technical Bulletin No. 217	EL12-56-000			
04/16/2012	NYISO filing of a Request for Rehearing and Request to Defer Consideration of FERC's 3/14/12 order regarding a New Interface Pricing Policy	ER08-1281-010			
04/19/2012	NYISO filing of an answer to the Energy Spectrum and Riverbay complaint re: Tech Bulletin 217, and request for expedited action	EL12-56-000			
04/23/2012	NYISO filing of FERC Reporting Requirement No. 582 re: total MW hours of transmission service in interstate commerce for calendar year 2011		No order	No order to be issued	
04/24/2012	NYISO filing of request for leave to answer and answer to the 4/20/12 Riverbay answer re: Tech Bulletin 217	EL12-56-000			
04/26/2012	NYISO filing of list of reviewing representatives re: the proposed Protective Order by Astoria Generating Company	EL12-58-000			
04/30/2012	NYISO filing of revisions to the OATT and Services Tariff in compliance with FERC Order Nos. 741 and 741-A	ER11-3949-005			
04/30/2012	NYISO filing of revisions to the ISO-TO Agreement and ISO-NYSRC Agreement	ER11-3951-001			

Filing Date	Filing Summary	Docket	Order Date	Order Summary	Outcome
	in compliance with FERC Order Nos. 741 and 741-A				
04/30/2012	NYISO compliance filing on order no. 755 re: compensation for providers of regulation services	ER12-1653-000, RM11-7-000, AD10-11-000			
04/30/2012	NYISO filing of its first quarter 2012 EQR report	ER02-2001-000	None	No order to be issued	
05/01/2012	Requests for Leave to Answer and Answers to the indicated NYTOs and the April 30, 2012 Motion for Leave to Answer and Answer of Energy Spectrum, Inc. and Riverbay Corporation Regarding NYISO technical bulleting 217	EL12-56-000			
05/01/2012	NYISO/PJM joint compliance filing re: Market to Market coordination	ER12-718-001			
05/02/2012	NYISO filing of Request for Extension of Time to Submit a Compliance Filing re: Interface Pricing, Request for Shortened Notice and Comment Period, and Expedited Commission Action.	ER08-1281-010			
05/04/2012	NYISO motion to intervene and comments re: AES petition	EC12-93-000			
05/08/2012	NYISO motion to intervene and comment re: Con Ed/NYPA SA #1873	ER12-1624-000
