# Market Performance Highlights for August, 2003

- Prices for energy increased in August due to the recovery from the system disturbance (the return of the base load generation).
- Prices for reserves remained stable. However, the relatively small number of hours of HAM regulation purchased in August, caused the monthly HAM average price for regulation to show a dramatic increase.
- Price reservations and corrections have dropped back below historic levels.

**Average Daily NYISO - Administered Total Price (Energy & Ancillary Services)**  
2002 Annual Average \$49.77/MWH  
August 2002 YTD Average \$48.39/MWH  
August 2003 YTD Average \$67.64/MWH

## NYISO Dollar Flows - Uplift - OATT Schedule 1 components

DAM Contract Balancing amounts are for payments made to generating units go make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.

DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart. The value for April 2003 is \$135,233.

DAM residuals are revenue charged or returned to customers due to the under or over collection of funds. On this chart, negative values represent funds returned to Transmission Customers (through Transmission Owners' Transmission Service Charges).
