Subject : ICAPWG DRAFT TARIFF FOR REVIEW

Attached is a draft Tariff Section 5 for review, in preparation for the next ICAPWG meeting on November 8. Your comments are welcome. If you spot errors or have word changes you would like to suggest, please do not hesitate to forward them to me before the November 8 meeting.

For ease of review, we are providing two copies of the draft. The first is marked against the existing Tariff to show additions and deletions; the second is a clean copy of the new language without blacklining.

NYISO Staff and ICAPWG members are continuing to work on the ICAP Manual and Attachment J changes. Those documents will be recirculated shortly under separate cover. The consultant's report updating the Brattle Report and NYISO Staff's analysis of it will also be circulated under separate cover when those documents are complete.

As we have done previously, we will continue to work through the Tariff between now and the November 8 meeting and will describe at the meeting any additional changes resulting from the work that was done after this document was circulated.

Thanks.

Kathy Robb
