

***Business Issues Committee***  
December 15, 2004 Meeting  
Motion - Agenda #06

---

**Motion in Support of Request for Waiver  
of Tariff Provisions Regarding Allocation of Certain Charges**

**Whereas**, the NYISO is preparing to issue Final Closeout Settlements for eligible periods under the provisions of the OATT and Services Tariff; and

**Whereas**, the NYISO must use billing simulator software to calculate certain portions of the Final Closeout Settlements in a timely manner; and

**Whereas**, the NYISO's billing simulator software can calculate the allocation of certain charges only according to monthly load ratio shares; and

**Whereas**, the OATT and Services Tariff establish that charges associated with Bid Production Cost Guarantee payments and Day-Ahead Margin Assurance payments are to be allocated according to daily and/or hourly load ratio shares; and

**Whereas**, the NYISO has determined that the allocation of these charges is not materially different regardless of whether monthly, daily, or hourly load ratio shares are used;

**Now, Wherefore**, it is moved that the Business Issues Committee supports NYISO's request to the Federal Energy Regulatory Commission for a waiver of tariff provisions that would require the allocation of Bid Production Cost Guarantee payments and Day-Ahead Margin Assurance Payments to be made according to daily and/or hourly load ratio shares and to allow the NYISO to instead calculate the allocation of these charges using the billing simulator software, and monthly load ratio shares.
