

# SCR Workbook Guidelines

Stacia Armentano New York Independent System Operator

Price Responsive Load Working Group Rensselaer, NY November 9, 2009

# Agenda

- SCR Workbooks
- Current Workbook Submission Process
- New Workbook Submission Process for the Demand Response Information System (DRIS)
- Common Workbook Exceptions

# **SCR Workbook**

- SCR Workbook is used by Market Participants to register their Special Case Resources in the NYISO ICAP/SCR Demand Response Program
- Workbooks are submitted at the beginning of each Capability Period and then throughout the Capability Period to modify existing Resources or register new Resources

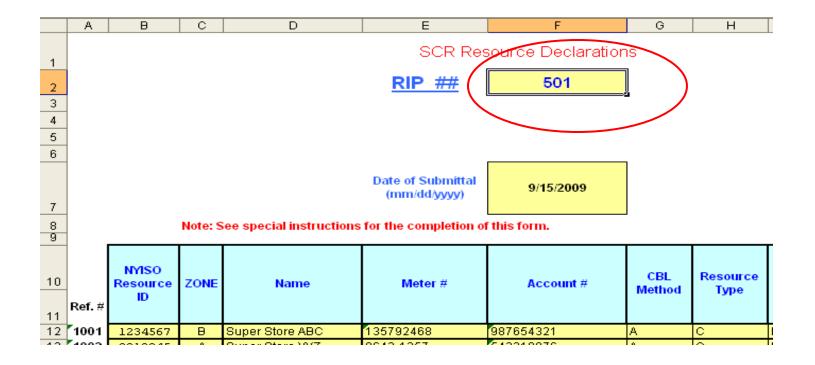

- Current Process:
  - *RIP submits SCR Workbook*
  - New Resources are assigned a Resource ID
  - New Aggregations are assigned an Aggregation ID
  - Auxiliary Market Operations contacts RIP with any questions on specific Resource registration data
  - Resources are Registered

- New SCR Workbook Process with the DRIS
  - RIP submits SCR Workbook
  - New Resources are assigned a Resource ID
  - New Aggregations are assigned an Aggregation ID
  - Workbook is imported by Auxiliary Market Operations into the DRIS
  - Exceptions are generated by the DRIS for any Resource data not meeting the standard requirements or validations
    - Exceptions are on a per Resource basis. Any Resources in the Workbook meeting all field requirements and validations will be registered.
  - Exceptions and Workbook will be sent back to the RIP for corrections to specific Resources before those Resources can be Registered

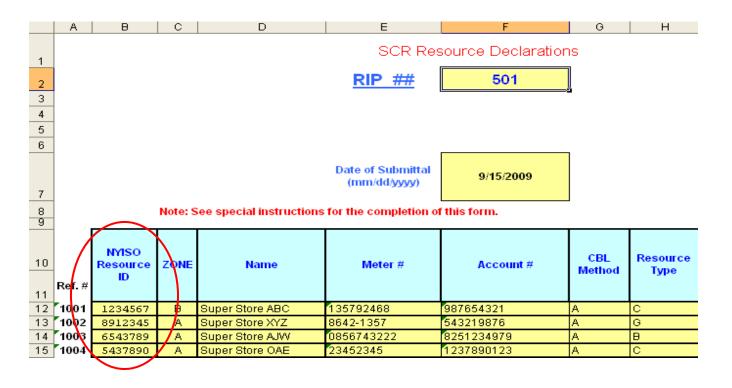

- Missing MP ID
  - *MP ID must be entered on Tab 3: New & Existing SCRs*
  - Located at the top of the worksheet in cell F2

- Missing Resource IDs for Existing Resources
  - Resource ID must be submitted for any existing Resources
  - Located on Tab 3: New & Existing SCRs

- Peak Monthly Demand Fields based on Resource Type selected
  - Located on Tab 3: New & Existing SCRs
  - For Resource Type = C

a

• **All** Peak Monthly Demand kW, Peak Monthly Demand Date, and Peak Monthly Demand Hour values must be entered for each of the 4 months

- The previous slides highlight the most common causes of Exceptions seen in the November '09 Workbook submissions.
- Additional field requirements and/or validations may cause an Exception to a Resource record.
- Registration information submitted for Resources with incorrect or incomplete data will result in an Exception, which may result in Resources not being registered, or registered at a lower value than submitted.

- The NYISO will process registration workbooks in the order they are received and provide RIPs with the following:
  - UCAP reports which will provide the details of accepted registrations and UCAP totals
  - Exception reports which will provide details of missing or inaccurate information for Resource registrations not accepted
- Depending upon the time a workbook was submitted, the number and complexity of workbooks submitted ahead of that workbook, and staff availability, UCAP and Exception reports might not be returned to a RIP before the monthly deadline.
- Early registration increases the likelihood that exceptions can be identified and corrected in time for acceptable Resource registrations before the deadline.
- RIPs may re-submit registration information at any time up to the monthly deadline.

The New York Independent System Operator (NYISO) is a not-for-profit corporation that began operations in 1999. The NYISO operates New York's bulk electricity grid, administers the state's wholesale electricity markets, and provides comprehensive reliability planning for the state's bulk electricity system.
