Agenda

- **High-level Planning Overview**
- **Parallel Operations Plan Summary**
- **Cut-over Plan Details**
 - *Operations activities*
 - *Market activities*
 - *Settlements activities*
- **Fall-back Plan**
- **MP Consultation Schedule**

Cut-over Plan / Activities

✦ **Designed to Minimize Impact**

- *Minimize risk to reliability*
- *Reduce market downtime*
- *Maximize opportunity for successful fall-back*

✦ **Parallel Operations / Bidding (Legacy and SMD2)**

- *Begins with Dispatch Day November 24 (DAM bids due HB 0500 November 23)*
- *Full MP participation is critical to ensure clean transition of MP data*
- *SMD2 bids should reflect realistic bids for settlement*
- *Provides opportunity for final stabilization*
- *Facilitates rapid fall-back (if required)*

✦ **Pre-deployment SMD2 OASIS Results Created During Parallel Operations Will Not be Posted**

Cut-over Plan Impacts

✦ **Market Impacts/Outages**

- *Short MIS outages for data preparation/transfer*
 - Three planned outages: (1) early November; (2) prior to parallel operation; and, (3) November 30
 - Exact schedule/details to be announced

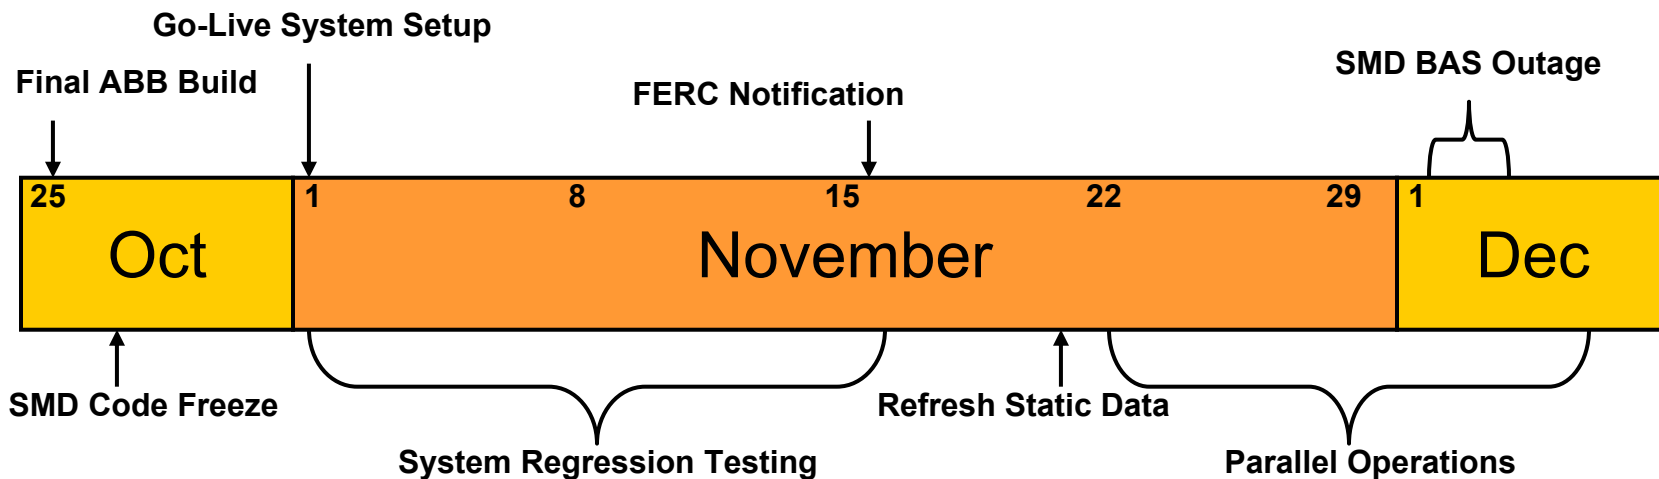

✦ **Operational Impact**

- *Short dispatch signal interruption at cut-over*

✦ **Billing Outages**

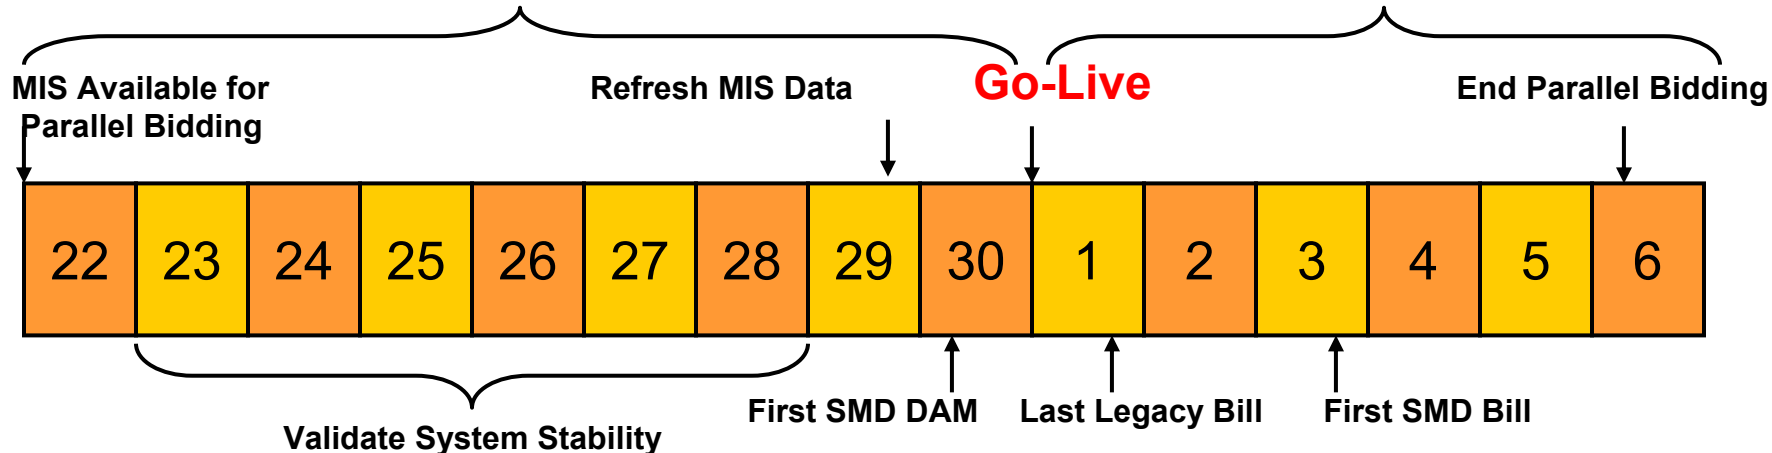

- *Longer outage for historical data translation*
- *Following posting of November 30 invoice*
- *First SMD2 invoice posted on December 3*
 - Specific schedule dependent on data conversion

Cut-over Timeline

SMD2 Bids Non-Binding up to DA & RT Markets for 12/1

Legacy Bids Non-Binding Unless Fall-back Occurs

SMD2 Remaining Test Activities

- ✦ **Final System Configuration**
 - *Convert systems from market trial configuration*
- ✦ **Ongoing Regression Testing**
 - *Ensure late fixes don't cause other problems*
- ✦ **Verification of Issue List Resolution**
- ✦ **Final ICCP Testing – Transmission Owners**
 - *Currently in progress*
 - *SMD2 model load test will require 15-minute outage; schedule to be determined*

Parallel Operations Overview

✚ **Prior to Cut-over to SMD2 on December 1**

- *Legacy systems will secure grid, dispatch basepoints, determine schedules, and set prices*
- *SMD2 systems will be used to validate new system operation*
- *Bids placed in SMD2 system will be non-binding for markets up to Day-Ahead and Real-Time markets for December 1*

✚ **Following Cut-over to SMD2 on December 1**

- *SMD2 systems will secure grid, dispatch basepoints, determine schedules, and set prices*
- *Legacy system will be used only in event of fall-back*
- *Bids placed in Legacy system will be non-binding unless fall-back occurs following cut-over to SMD2*

Parallel Operations Overview (Cont.)

- ✦ **MPs are Strongly Encouraged to Enter Realistic Bids in Each System**
 - *Day-Ahead, Real-Time, Transactions*
- ✦ **Operations Will Maintain Outage Schedules in both Systems During Parallel Operations**
- ✦ **No OASIS Postings for Parallel System**
 - *Schedules will be posted*
- ✦ **Day-Ahead Market Postings for Parallel System May Not Meet Customary Time Criteria**
 - *Primary Day-Ahead Market results will be posted timely*

Price Correction / Reservations

✦ Price Reservations

- *All price intervals will be reserved for up to 2 weeks following cut-over*
- *Five (5) day posting of price corrections still required*

✦ Price Corrections

- *Best effort will be made to include all available price corrections in legacy system prior to cut-over*
- *MISHIST/BAS outage following cut-over may prohibit some November price corrections from being included*
- *November 2004 initial settlement may not contain all price corrections; will need to be captured in 4-month true-up*

SMD2 Fall-Back

- ✦ **Primary Objective in Making Fall-back Decision is Maintaining Power System Reliability**
- ✦ **Multiple Scenarios Have Been Considered**
 - *Reliability emergency; Immediate execution of plan*
 - *Market dysfunction; Planned migration to next DAM schedules (possibly at next 00:00)*
 - *Hybrid*
- ✦ **Depending on Decision Factors, Amount of Market Notification Might be Variable**
 - *The NYISO would strive for the maximum amount of notification possible*

SMD2 Fall-Back (Cont.)

- ✦ **Process of Executing Fall-back is Similar Whether Emergency or Planned**
 - *Notify TO control centers, Market Participants*
 - *Reload legacy ICCP model; basepoints supplied from legacy EMS*
 - *Declare statewide Out of Merit (OOM)*
 - *Assess status of legacy market schedules, determine best time to resume NYISO markets*
 - *Perform controlled establishment of legacy schedules*
- ✦ **Settlement rules for period between cut-over and fall-back will depend on circumstances. Specific rules will be developed and shared with MPs.**
