

NYISO Business Issues Committee Meeting Minutes

December 14, 2005

The Desmond Hotel

660 Albany-Shaker Road

Albany NY 12110

1. Welcome & Meeting Objectives

Mr. Ray Kinney, (NYSEG) Chair of the Business Issues Committee (BIC), called the meeting to order at 10:00 AM and welcomed the members of BIC. Attendees introduced themselves and named the organizations they represent.

2. Approval of minutes for October 26, 2005

Minutes passed unanimously.

Approval of minutes for November 17, 2005

Mr. Stuart Nachmias of Consolidated Edison asked for the insertion into the minutes of a transcript of the comments of the NYISO's Rick Gonzales with regard to LBMP price convergence and Real-Time Commitment and Real-Time Dispatch. With that change, minutes passed unanimously.

3. Chair's Report

Mr. Kinney presented a parting gift to the outgoing chair, Mr. James Scheiderich of Select Energy, in recognition of his service as Chair of the BIC.

4. Market Operations Report

Mr. John Buechler of the NYISO noted that the highlights for November 2005 include the fact that LBMP, fuel prices, and average costs were down this month relative to October. Uplift and Regulation have increased for the same period. Mr. Buechler also reminded the BIC that the presentation of Uplift in this report (Chart 4C) have changed per the last BIC meeting.

5. Regional Market Enhancements-Northeast Seams Report

Mr. Buechler noted that a meeting was held with ISO-New England and NYISO Market Participants in November on Intra-hour Transaction Scheduling (ITS); recommendations from that meeting are being brought back to the appropriate committees continued work.

Mr. Buechler continued by stating the work on Controllable Lines continues, and meetings with ISONE have been taking place. Mr. Michel Prevost of HQ Energy Services asked about the status of a report he said was promised for the fourth quarter of 2005 by the NYISO on the NY MS-7040 Transfer Study; NYISO staff responded that they would follow up on that.

As for Modeling of Netted Transactions at the NYISO-HQ interface, Mr. Prevost stated that that the study of this topic was to be completed in October, and NYISO indicated that it would produce a presentation summarizing the study. In response to his question about the status of that presentation, Mr. Ray Stalter of the NYISO stated that the NYISO will follow up with a discussion at the S&P Working Group in January.

6. Working Group Updates

A. Billing and Accounting (BAWG)

Mr. Dave Hall of NYSEG reported that the BAWG had not met since the last BIC. A discussion ensued on the Metering Task Force (MTF). It was noted that the MTF will likely not meet their 6 month deadline on the analysis of the status of metering issues. Mr. Scheiderich asked if the security issue of disclosing the location of revenue meters was being examined by NYISO legal staff. Mr. Stalter responded that he would follow up on this.

B. Electric System Planning Working Group (ESPWG)

Mr. Tariq Niazi, of the NYS CPB, reported that cost allocation was discussed at the last ESPWG. A proposal from Jerry Ancona of National Grid was also discussed, and will be included in discussions at the next meeting of the ESPWG. Mr. Howard Fromer of PSEG asked if the NYISO Board had acted on the Reliability Needs Assessment (RNA); an update was to be provided by Mr. Carl Patka of the NYISO later in this meeting. There was a further discussion about the RNA and its associated timeline.

C. ICAP Working Group

Mr. Glenn Haake of IPPNY reported that there was no meeting of the ICAPWG since the last BIC. He did report on activities at the NYSRC, such as its IRM procedures and developments at the NYSRC's Executive Council.

D. Interconnection Issues Task Force

Mr. Haake reported that there was also no meeting of the IITF since the last BIC, though he did provide an update on Deliverability Study filings. The next meeting is December 19.

E. Market Structures Working Group

Mr. Liam Baker of Reliant reported there is an upcoming meeting on Voltage Support Services with a representative from FERC to work on VSS rate proposals.

F. Scheduling and Pricing Working Group (S&PWG)

Mr. Bart Franey of National Grid reported that the S&PWG met on the 29th of November; he related that changes to the Virtual Bidding credit policy were discussed, and noted that Ms. Kyla Douglas of the NYISO will be giving a presentation on this at today's BIC. Also discussed, both here and at the S&PWG, were the GP2 Rest-Of-State AMP/Tariff issues. Mr. Franey went on to talk about a third issue related to SRE/Out-of-Merit units, in-city mitigation, and under-and-over mitigation by the NYISO. The net impact presented by the NYISO was about \$2.5 million, according to Mr. Franey. There followed a discussion on the correct impact amount, and how that will flow through the billing statements.

G. Price Responsive Load Working Group (PRLWG)

Mr. Rick Mancini of Galt Power reported that at the PRLWG it was reported that registration for EDRP and SCR programs is down slightly. He next stated that the NYISO update on Demand Response in the Ancillary Services markets explained that NYISO work continues, with a NYISO resource analysis due at the next PRLWG in January 2006. Third, the NYISO presented an analysis of the July 27, 2005 EDRP/SCR event; the event performance indicated that response was below historical and registered levels. As a result, the NYISO will be proposing various changes to the SCR program. Finally, the 2005 NYISO Demand

Response Program Evaluation was presented; total NYISO payments were \$986,000, with estimated benefits of \$1.97 million.

With regard to the Day-Ahead Demand Response Program Evaluation (DADRP), Mr. Younger asked a clarifying question about the value of lost load vs generator bids. Mr. Younger also asked about the Evaluation's conclusion about net social welfare of the DADRP. Mr. Fromer pointed out that he had, in a prior BIC, addressed the appropriateness of revisiting the current limitations on the 24-hour notice for the NYISO to call an SCR; he asked Mr. Mancini if this had come up in the PRLWG. Mr. Mancini responded a program was being looked at for units that could provide a response in 30 minutes. Mr. Stalter noted that he would make sure that was on the agenda for the next PRLWG. A discussion followed on the SCR program, as well as needed updates to the ICAP Manual.

7. Proposed Changes to the NYISO Virtual Transactions Credit Policy

Ms. Kyla Douglas of the NYISO presented the proposed changes to the Credit Requirements for Virtual Transactions; she started with the recent history of this issue. This included the forms of credit support and the number of days used for calculating the credit needed for Market Participants. Ms. Douglas noted that the BIC today is to vote on changes to the tariff with regard to the forms of credit to be accepted by the NYISO. Separately, she noted that the Virtual Transactions Certification Form process will be revised to streamline the customer information submittal process.

Ms. Douglas then went into some detail as to the forms of credit support allowed by the NYISO historically and at the present time. In response to a question from Mr. Nachmias, Ms. Douglas discussed the allocation of credit between NYISO markets for a given Market Participant and how a change request from a Market Participant on their collateral allocation is handled. Mr. Nachmias then asked about the lag between the MPs trading activity and the NYISO Credit Department's monitoring of the MP's market position with regard to its allowed credit. A discussion of this aspect of credit policies ensued.

In reply to Mr. Ron Mackowiak of Entergy Nuclear, Ms. Douglas went over NYISO credit policies with regard to MP bond rating agency ratings. In response to questions from Mr. Fromer, Ms. Douglas covered the process that takes place when a MP asks to have their credit limit adjusted, and the controls the NYISO has to monitor MP positions. A discussion followed about the precautions taken by the NYISO for ensuring the validity of communications from MPs with regard to their credit positions.

After lunch, following a discussion of a proposed amendment (see below) to the motion from Con Ed, it was suggested that the Motion To Revise The Credit Policy For Virtual Transactions (with regard to the forms of acceptable collateral) be tabled for further changes, especially as it would not delay the date that this vote is sent to the Management Committee. As for the proposed amendment, it reflected the concern on the part of Consolidated Edison about the relationship between the mark-to-market lag for tracking MP trading positions and, in their opinion, slightly more risky forms of credit support. Consolidated Edison consequently had a desire to incorporate language with respect to this issue in the motion.

Further discussion about whether the motion as originally written should be put up for a vote led to the original motion being moved and seconded to be voted on by the BIC. The

proposed amendment was then added to the original motion. There was more discussion about the amendment, and whether there was an indeed a logical connection between the original motion as written and the amendment, or if the amendment should be voted on as a separate motion.

Ms. Doreen Saia asked that the minutes contain language that the NYISO report back to the Market Participants on the report being produced by LECG.

It was decided that the amendment was unfriendly; and a vote was held on whether to incorporate the amendment into the motion.

Motion 3a:

The Business Issues Committee (BIC) hereby approves revisions to the NYISO's Credit requirements for Virtual Transactions, as presented to the BIC on December 14, 2005. The BIC requests that the NYISO prepare the draft tariff amendments for consideration by the Management Committee (MC) necessary to reflect the proposed changes to allow customers to satisfy the credit requirements for Virtual Transactions using any of the forms of credit support approved for uses in other NYISO markets. The BIC also requests the NYISO to report back on Market Participant risks due to mark-to-market delays with respect to Virtual Bidding Transactions with a specific plan to be presented to BIC by February 2006.

(Motion failed with 39.91% affirmative votes.)

The original motion was then called to a vote:

Motion 3:

The Business Issues Committee (BIC) hereby approves revisions to the NYISO's Credit requirements for Virtual Transactions, as presented to the BIC on December 14, 2005. The BIC requests that the NYISO prepare the draft tariff amendments for consideration by the Management Committee (MC) necessary to reflect the proposed changes to allow customers to satisfy the credit requirements for Virtual Transactions using any of the forms of credit support approved for uses in other NYISO markets.

(Motion passed by majority show of hands with abstentions.)

Mr. Franey asked that the minutes reflect his opinion that the LECG study should address the so-called 2-day lag issue.

8. Update on Voltage Support Program

Mr. Carl Patka of the NYISO provided an update on the Voltage Support Program. He discussed the appeals of certain MPs to the NYISO Board of Directors as a result of the NYISO Management Committee decisions of October 11, 2005. Continuing, Mr. Patka listed the major parts of the BOD decision, including having the current VSS rate continue into 2005, with no interruption. In addition, any revision of the rate would be retroactive to January 1, 2006. One of the directives of the Board was that the NYISO invite the FERC Dispute Resolution Service to meet with it and the MPs to help facilitate resolution of the VSS issues.

Mr. Patka gave more detail on this FERC service and what it can provide, which includes acting as a neutral evaluator and selecting a mediator.

The Board directed NYISO Staff to make a status report at the January Board meeting, including agreement on the 2006 VSS rate, or, by not later than the BOD's February meeting, a report on reasons why agreement was not reached and respective positions of each involved party. The BOD also expressed concern that the MPs expect the BOD to determine a cost-of-service rate, which regulatory agencies are best equipped to set. Mr. Patka went on note that the areas of tentative agreement are extensive, and he listed some of those, and he also listed unresolved issues.

Mr. Haake expressed his appreciation of the Board for extending the current rate into 2006. There followed a discussion about cost-based-rates vs the demand curves used in other NYISO markets, and whether the necessary cost data is available. Mr. Fromer asked what role the NYISO would play in the upcoming discussions between the MPs and the FERC representative. Mr. Patka responded that the main role of the NYISO would be to facilitate the MPs reaching an agreement and coming up with a plan, a process, and a schedule to allow that to happen. Mr. Fromer opined that if the FERC representative was aware of the opinion of NYISO Staff, as expressed in the past, it may help settle the issues more quickly. There followed a discussion as to the best way to efficiently use the FERC services.

9. Billing and Price Corrections Task Force Update.

Mr. Kevin Jones of Hunton and Williams provided an update to this Task Force. He noted that the BPCTF was created early in 2005 to work with NYISO staff to develop new rules and related tariff provisions to govern the NYISO's price and settlement correction responsibilities. The formation of the BPCTF was partially in response to FERC's May 9 order for the NYISO to revise its price corrections procedures. Three proposals to amend the NYISO tariff have come out of the work of the BPCTF; two have to do with settlements, or bills, and one on prices themselves. He stated that at the next meeting they hope to finalize the new price correction provisions of the tariff, and the near-term settlement correction provisions of the tariff as well. The plan would be to bring these proposals to the January BIC meeting. He then went into some detail on these changes, such as the desire to bring more transparency in the price correction process. As for the near-term settlement proposals, the change would be to remove the indefinite period of time the NYISO is allowed to review MP challenges to the settlements posted, as currently specified in the tariff.

10. New Business

Mr. Scheiderich commented that there are near-term RPWG issues that are such that the chairs of the BIC, the OC, and RPWG meet to be kept abreast of the work of the RPWG.

11. Administrative Matters

None.

12. Adjournment

Meeting adjourned at 2:45 PM.

Respectfully Submitted,
William G. Porter
Recording BIC Secretary

NYISO Business Issues Committee

December 14, 2005

MOTIONS FROM THE MEETING

Motion 1:

Motion to approve the Minutes from the October 26, 2005 BIC meeting.

(Motion passed unanimously by show of hands)

Motion 2:

Motion to approve the Minutes from the November 17, 2005 BIC meeting.

(Motion passed unanimously by show of hands)

Motion 3a:

The Business Issues Committee (BIC) hereby approves revisions to the NYISO's Credit requirements for Virtual Transactions, as presented to the BIC on December 14, 2005. The BIC requests that the NYISO prepare the draft tariff amendments for consideration by the Management Committee (MC) necessary to reflect the proposed changes to allow customers to satisfy the credit requirements for Virtual Transactions using any of the forms of credit support approved for uses in other NYISO markets. The BIC also requests the NYISO to report back on Market Participant risks due to mark-to-market delays with respect to Virtual Bidding Transactions with a specific plan to be presented to BIC by February 2006.

(Motion failed with 39.91% affirmative votes.)

Motion 3:

The Business Issues Committee (BIC) hereby approves revisions to the NYISO's Credit requirements for Virtual Transactions, as presented to the BIC on December 14, 2005. The BIC requests that the NYISO prepare the draft tariff amendments for consideration by the Management Committee (MC) necessary to reflect the proposed changes to allow customers to satisfy the credit requirements for Virtual Transactions using any of the forms of credit support approved for uses in other NYISO markets.

(Motion passed by majority show of hands with abstentions.)
