Re: Notice of Intent to Return Binghamton Cogeneration Plant to Service

Dear Ms. Davies:

In February 2012, Standard Binghamton, LLC retired the Binghamton Cogeneration Plant, located at 22 Charles Street in Binghamton, New York (PTID 23790). The retirement occurred after full compliance with the New York Public Service Commission's Generator Retirement Notice Order and receipt of confirmation from the New York Independent System Operator, Inc. ("NYISO") and New York State Electric & Gas Corporation ("NYSEG") that the facility was not needed for reliability purposes. Subsequently, Binghamton BOP, LLC acquired the facility and associated assets.

The facility consisted of a single, gas-fired LM 5000 powertrain with a nameplate rating of 47.7 MW. The turbine had the ability to burn No. 2 fuel oil as a back-up fuel source. Since acquiring the facility, Binghamton BOP has maintained it and its equipment in a status that would allow the equipment to be sold for use in another facility or allow the plant to recommence commercial operations in the event market conditions improved in New York.

Binghamton BOP recently decided to recommence commercial operations at the facility. Accordingly, it is in the process of obtaining regulatory approvals and authorizations to do so and to participate in the NYISO's markets. It is also acquiring the requisite contracts and permits and undertaking other activities required to operate the facility. At this time, Binghamton BOP plans to commence operations in the fourth quarter of 2014.

Accordingly, Binghamton BOP hereby provides written notice of its intentions to the NYISO. By copies of this letter, such notice is also provided to the NYSEG and the Public Service Commission. Please contact the undersigned if you have any questions regarding this matter.

Sincerely,

Colin Clements, CPA, CCIFP
Chief Financial Officer
