**Re: James A. FitzPatrick Nuclear Generating Facility
Notice of Withdrawal of Deactivation Notice**

Dear Mr. Jones:

Exelon Generation Company, LLC ("ExGen") hereby provides notice to the New York Independent System Operator ("NYISO") of its intention to continue commercial operation of the James A. FitzPatrick Nuclear Power Plant ("FitzPatrick Facility")¹ and requests that the November 2, 2015 deactivation notice for the Fitzpatrick Facility be withdrawn.²

On November 2, 2015, Entergy Nuclear FitzPatrick, LLC ("ENFP"), then the owner of the FitzPatrick Facility, notified NYISO and the Commission of its intention to retire the FitzPatrick Facility during the 4th quarter of 2016 or the first quarter of 2017. On August 8, 2016, ENFP and ExGen executed agreements providing for ENFP's asset sale of the FitzPatrick Facility and associated assets to ExGen (the "Transaction"). On January 17, 2017, at NYISO's request, ExGen provided NYISO a conditional notice of its intent to continue commercial operation of the FitzPatrick Facility subject to certain conditions, including the closing of the Transaction. ExGen and ENFP received all required regulatory approvals for the Transaction, including approvals from the New York Public Service Commission, the Nuclear Regulatory Commission, and the Federal Energy Regulatory Commission. On March 31, 2017, ExGen and ENFP successfully closed the Transaction; ExGen is now the owner of the FitzPatrick Facility.

ExGen's decision to continue commercial operations is made in reliance upon the continued validity of the New York Public Service Commission's ("NYPSC") Clean Energy Standard ("CES") and the Zero-Emissions Credit ("ZEC") Requirement established in Case 15-E-0302. ExGen reserves the exclusive right, consistent with all applicable laws and requirements of the NYISO tariff, to cease commercial operations in the event that the ZEC Requirement is modified in a manner adverse to ExGen or is terminated, suspended or stayed.

¹ The FitzPatrick Facility is an 882 MW nameplate facility located in Oswego County, New York, NYISO Zone C. The FitzPatrick Facility is interconnected to the New York Power Authority's transmission system and is located in the National Grid service territory.

² ExGen contemporaneously is providing a notice of intent to continue operations to the New York Public Service Commission ("Commission").

Mr. Bradley C. Jones
