

Business Issues Committee

May 20, 2005 Meeting

Motion - Agenda #06

Motion:

The Business Issues Committee (BIC) recommends that the Management Committee approve revisions to the tariff to allow for modified treatment of 10-Minute Gas Turbines (GTs) in RTS, as outlined in the Concept of Operations document presented to the BIC at the May 18th meeting, which would allow 10-Minute GTs not yet committed, and not under a minimum downtime constraint, to be scheduled and participate in real-time price setting.
