

Proposal to Establish New Sub-Sector
within the Public Power/Environmental Parties Sector
for Distributed Generators and Demand Response Providers

This proposal would establish a new sub-sector within the Public Power/Environmental Parties Sector for parties who qualify as Distributed Generators or Demand Response Providers. Two (2) percent of the total votes on the Management Committee shall be allocated to this new sub-sector.

The 2 percent allocation would come from equal four-tenths (0.4) percent reductions from each of the five existing Sectors, with the proviso that neither the Environmental Parties sub-sector, nor any Governmental Agency sub-sector (whether representative or consuming) shall have their current voting allocation reduced.

The proposed change would result in the following voting weight allocations:

Sector	Current Voting Percent	New Voting Percent
Generators	21.5	21.1
Other Suppliers	21.5	21.1
Transmission Owners	20	19.6
End-Use Consumers		
Large Consumers	9	8.8
Small consumers	4.5	4.3
Governmental Agency	4.5	4.5
Large Energy Using Governmental Agency	2	2
Public Power/Environmental		
State Power Authorities	8	7.8
Municipals and Coops	7	6.8
Environmental Parties	2	2
DGs and DRPs		2
TOTAL	100	100
