

**Proposed discussion items from MTF to BAWG  
concerning RMR Manual:  
Drafted by Duane Wheeler (NYPA) 10/27/2004**

The following is a list of items under discussion with our latest revision of the Revenue Metering Requirements Manual (RMRM) that MTF cannot come to a consensus on. The differences amongst MTF members basically concerns whether or not the manual will be simply a Revenue Metering Requirements Manual or a manual where some processes are included. We will be seeking the direction of BAWG on these issues at their November 9, 2004 meeting.

1. Name of document. "Revenue Metering" or "Settlement".
2. Do we include in the manual details on daily metering checkout process?
3. Definition of Zones.
4. NYISO Billing process as related to metering.
5. Losses.
6. Define the use of the Web Based Reconciliation System (WBR).
7. Discussion of examples of monthly billing schedules (settlement adjustments or true-ups) for metering and customer load data.
8. Describe how WBR can be used by MA to check out meters and the NYISO PTS data.
9. Do we need to include in the manual details on TOL processes?
