

## **ESPWG**

**July 18, 2003**

### **Action Items**

1. NYISO to provide a simulation/demonstration and more detailed information on Probe at the next ESPWG meeting scheduled for August 1.
2. Add the TSCs to the list of items not included in congestion costs and provide an analysis of the TCCs and TSCs to show how they net.
3. NYISO to review the timeline for the initial planning process under the assumption that it does not include projected congestion costs.
4. NYISO will provide information on the current process for conducting reliability assessments (e.g. – what are the criteria, how are the studies conducted, etc.)
5. NYISO will prepare a process flow diagram for the stakeholder review and approval process indicating a role for both TPAS and the ESPWG
