ISO/RTO Meter Data Managers

Best Practices Forum

William deVries
NYISO – January 2006

Overview

- In June 2005, the NYISO was asked to participate in a forum of ISO/RTO Meter Data Managers

- The objective was to foster the sharing of information on how to improve processes

- Several ISO/RTOs are participating in this forum

Overview (con't)

- Several teleconferences have resulted in the group identifying 11 Best Practices
- The group recognizes that an ISO/RTO may rely on Market Participants or third parties to perform some of these process

Best Practices

1. Meter Service Provider Standards

2. Meter Hardware Standards

3. Installation/Configuration Guidelines and Approval

4. Meter Point Registration

5. Secondary/Backup Data Process

6. Communications Standards

Best Practices (con't)

7. Calibration and Maintenance Requirements

8. Equipment and Data Security Standards

9. Data Validation and Correction Process

10. Dispute Resolution Process

11. Conformance Audits

Next Step

- The group intends to share these Best Practices with the ISO/RTO Customer Settlements forum for feedback
