Issue

- As part of the monthly charts, the Schedule 1 billing codes are categorized as
 - Bid Production Cost Guarantee (BPCG) Balancing
 - Bid Production Cost Guarantee (BPCG) DAM
 - Bid Production Cost Guarantee (BPCG) DAM Virtual
 - DAM Contract Balancing
 - Local Reliability Balancing
 - Local Reliability DAM
 - NYISO Cost of Operations
 - Residuals Balancing
 - Residuals DAM
- We will be moving one of the billing codes we had included under “BPCG Balancing” to the “Residuals Balancing” Category
- The Billing codes for each of the 9 buckets listed above are available on 4-AE

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.

DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.

DAM residuals are revenue charged or returned to customers due to the under or over collection of funds. On this chart, negative values represent funds returned to Transmission Customers (through Transmission Owners' Transmission Service Charges).

- The Balancing Market Congestion Balancing category is actually a congestion residual. These residuals are the "not for profit" balancing mechanism that accounts for any congestion paid to generators that is not paid for by the loads (this includes virtual load and virtual generation).
- For this reason, we are proposing to move the Balancing Market Congestion Balancing from the "BPCG Balancing" category to the "Residuals Balancing" category.

 DAM residuals are revenue charged or returned to customers due to the under or over collection of funds. On this chart, negative values represent funds returned to Transmission Customers (through Transmission Owners' Transmission Service Charges).

* Effective XXX 2005 codes 81305 and 81312 have been re-categorized from BPCG Balancing to Residuals Balancing so as to better reflect their uplift type (see 4-AE)
