

NYISO ENVIRONMENTAL ADVISORY COUNCIL

Spring Meeting

May 5 – 6, 2016

Hilton Garden Inn

235 Hoosick St, Troy, NY 12180

Friday May 6

9:30 a.m. – 3:30 p.m.

New York's Clean Energy Standard (CES) calls for 50% of the state's electricity to be produced from renewable resources by 2030, roughly doubling the amount of renewable energy produced in New York in the next fourteen years. Such a rapid expansion of renewable resources will create wide ranging changes for NYISO's markets, operations, and planning efforts. Discussions are intended to provide an overview of efforts to promote renewable energy around the nation, experiences and challenges seen in integrating renewable resources at larger penetration levels, and regional implications associated with one state establishing such aggressive goals relative to neighboring states. At the same time, utilities are adapting their business models in the face of sweeping changes stemming from public policy initiatives such as the CES and REV. Con Edison will offer insight into its effort to reshape itself as the Utility of the Future and what this means for the way it operates and plans its system.

9:30 – 9:45

Welcome

*Bradley C. Jones, President & CEO
NYISO*

9:45 – 10:30

National RPS Overview

David Mooney, EAC Member
National Renewable Energy Lab

10:30 – 11:15

Integrating High Levels of Renewable Energy

*Erik Ela, Senior Technical Leader
Electric Power Research Institute*

11:15 – 11:30

Break

11:30 – 12:30

Interplay of RGGI and Clean Energy Standards

*Daniel Shawhan, Resources for the Future
EAC Member*

12:30 – 1:15

Lunch

1:15 – 2:30

Utility of the Future – Con Edison Update

*Damian Sciano, Director – Distributed Resource Integration
Con Edison*

2:30

Adjourn Open Session

2:40 – 3:30

Executive Session
