

NYISO Revenue Meters
Definition Proposed by Con Edison:

NYISO Revenue Metering System – A metering system – including current transformers, potential transformers, data collection and transmission system – that a NYISO registered Metering Authority uses to measure, record and upload daily to the NYISO’s Web-Based Reconciliation System (WebRec) the MWhr associated with a generator or intra- and inter-utility tie line(including NYCA control area ties), with the exception of the Con Edison Super-zone.
