

PRLWG Meeting

Teleconference - July 26, 2006

- Program registration
 - 1672 MWs registered in the EDRP and SCR programs
 - 150 MW increase in the EDRP & SCR Program for generation in Zones J and K from July of 2005
 - 90 MW increase in the EDRP & SCR program for Interruptible load in Zones J & K from July 2005
- July 18/19 SRC and EDRP event report
 - On July 18, EDRP and SCR resources were activated in Zones H-K between 1 pm and 10 pm for a total of approx 657 MWs responding.
 - On July 19, due to local network problems experienced in the Con Ed territory, the NYISO activated EDRP and SCR resources in Zone J from approximately 10:45 am to 7 pm for a total of approx 414 MWs responding.
- Update on DR in ancillary services
 - The FERC issued an Order allowing Demand Side Resources to participate in the Real Time Markets in the third quarter of 2007.
 - The NYISO is required to provide quarterly reports to FERC on the status of the project.
- Update on DG rulemaking
 - The NYISO continues to work with the New York State Department of Conservation for clarification of the ruling on the operation of Distributed Generators, and the impact the ruling would have on the Demand Response Programs.
 - The NYISO will attempt to have a DEC representative available at a future working group meeting to discuss the details of the rule making with the Market Participants
- Next meeting schedule for August 23rd has been rescheduled to a YTD date during the week of September 4th.
