NYISO Webconferencing Information

Webex Meeting Center 6.2

This meeting is available through the NYISO Web Conferencing Service.

Please note that Webex has recently been upgraded to a new version (Meeting Center 6.2).

To participate in a meeting, you will have to install/reinstall Webex Meeting Manager on your computer. This is an automatic set up and will only take a few seconds with a high-speed connection.

Please follow the instructions below to join a meeting:

1. Go to http://nyiso.webex.com.

2. Click on "Join now" tab located at the right of the meeting name.

3. Login with your name (email address optional) - click "Okay" tab

4. If you have not already installed Webex Meeting Manager 6.2, you will be prompted to run the install at this point. Click on the "Set up" tab. (This should only take a few minutes if you are on a high speed connection.

5. You will now be joined in as a participant in the meeting.

(Service is not compatible with Netscape Navigator 6.0 - for best performance, use Internet Explorer. Also, we recommend that you connect through your company's LAN or other high-speed connections such as cable modem or DSL line.)

Note: Teleconferencing numbers for the meetings are located on the NYISO calendar at http://mdex.nyiso.com - under " Meetings " . Questions/comments regarding this service can be directed to Leigh Bullock at: lbullock@nyiso.com
