NYISO Business Issues Committee Meeting Minutes – DRAFT

August 24, 2005

NYS Nurses Association 11 Cornell Road Latham, NY 12110

1. Welcome & Meeting Objectives

Mr. Jim Scheiderich, (Select Energy) Chair of the Business Issues Committee (BIC), called the meeting to order at 10:00 AM and welcomed the members of BIC. Attendees introduced themselves and named the organizations they represent.

2. Approval of minutes for June 29, 2005

Mr. Ray Stalter of the NYISO reviewed the June 29th Minutes with the Committee, noting changes submitted by Committee members. No additional comments on the Minutes were raised by the BIC at the meeting.

Motion 1:

Motion to approve the minutes from the June 29th meeting of the BIC. Motion Passed

2. Approval of minutes for July 27, 2005

Mr. Stalter reviewed the Minutes from the July 27th meeting. No additional comments on the Minutes were raised by the BIC at the meeting.

Motion 2:

Motion to approve the minutes from the July 27th meeting of the BIC. Motion Passed

3. Chair's Report

No Report provided.

4. Market Operations Report

Mr. Charles King, NYISO Vice President of Market Services, presented the Market Operations Report. The NYISO recorded two days of record loads in July, and saw very high out sendout MWh, and high average LBMPS as well. In response to a question from Mr. Younger, the NYISO will investigate producing an analysis of average past monthly LBMPs, and how they compare when corrected for fuel prices adjustments. Mr. King went on to note that uplift has risen this summer, due largely to Bid Production Cost Guarantees related to the Thunderstorm Alert process. Also, while high volatility was seen in Real Time prices, the NYISO deployed the recently approved 10-Minute resource software, which should result in improvement. The NYISO will monitor price volatility and continue to provide reports to the BIC.

5. Northeast Seams Report

With regard to Intra-Hour Transaction Scheduling, Mr. King stated that the report on the pilot tests is expected to be discussed at the MSWG in September.

With regard to Regional Resource Adequacy ("RAM"), Mr. King noted that the date for having a stakeholder meeting on the various ICAP proposals has been pushed out since there is still work being done in PJM related to their Reliability Pricing Model, as well as in ISO-New England ("ISONE"), where the work being performed is associated with Locational Installed Capacity ("LICAP").

Mr. King noted that on August 22 ISONE issued an operating protocol for the 1385 cable under Long Island sound. Kevin Jones of LIPA asked about the NYISO's response to this protocol. Mr. King responded that NYISO Market Operations has reviewed the protocol, and the NYISO has been communicating with ISONE on the matter. He further encouraged Mr. Jones to raise additional questions on the Operating Protocol at the NYISO Operating Committee. Mr. Scheiderich asked for access to this ISONE protocol.

In response to a question from Ms. Doreen Saia of Mirant, Mr. King replied that LECG is working on an analysis of the PJM proxy bus and associated price calculations. Ms. Saia stated she would like to get the PJM proxy bus on the agenda of the Market Structure Working Group meeting in September. Subsequent to this, a discussion was had among BIC members on analyses of interfaces, multiple proxy busses, free-flowing ties, controllable lines, and phase-angle regulators.

6. Working Group Updates

A. Billing and Accounting (BAWG)

Mr. Kevin Kipers of the New York Power Authority reviewed his presentation, which included discussion of the automated 80/20 split that is planned for September implementation. Deployment of the automation of export rates to ISO-NE has been delayed until October. Final Bill closeouts are continuing at the rate of 5 per invoice. Manual adjustments are included. The NYISO was asked by the BAWG to send emails to the Market Participants if changes are made to the manual adjustments, which the NYISO is looking into. Mr. Schederich asked if there are additional BPCG changes being made for the marketplace. Mr. Kipers responded that just one supplier is affected. Ms. Saia asked about the 30-day challenge period, and the ability to make changes to the invoices within that period. Mr. Kipers responded by indicating that that this process is not yet completely defined. There followed a discussion of the months (November 1999 to March 2000) that are being closed out, specifically manual adjustments and when the 30-day review clock started. Further discussion of this issue will take place at BAWG. Mr. Scheiderich opined that the only way to move forward on certain billing issues is to seek a tariff change, and that there is a task force working on the resolution of the final bill disposition.

B. ESPWG

Mr. Bill Pallazzo of NYPA described the efforts under way at ESPWG to keep onschedule with regard to the reliability planning process. Other topics he covered included the cost allocation process and the ICAP demand curve, where work continues. NY Public Service Commission (PSC) staff was asked, by the ESPWG, for a brief overview about their notice asking for comment on generator retirements and the impact on voltage levels below the bulk power system. PSC staff had asked if PowerGEM could validate the "What-if" analyses related to the planning process, especially with regard to the economic value of ameliorating a constraint by building a new transmission facility. This was seen as a way to ensure that the screening process being used has some value, which he noted appears to be the case if the appropriate qualifiers are used.

B. IITF

No meeting was held.

D. ICAP Working Group

Mr. Glen Haake of IPPNY reported that the last ICAPWG meeting was held on August 16th. At this meeting intermittent resources were discussed, which is scheduled to be discussed at the next meeting as well. Regarding the resources, the NYISO proposes to develop Demonstrated Maximum Net Capability (DMNC) for each facility by using the nameplate rating initially, and for the forced outage rate it would use actual output during peak hours of the capability seasons. Until the latter data can be produced, the General Electric wind study would provide that information. Intermittent resource-related rules will require tariff changes. It is expected this will be in place in the beginning of 2006.

The ICAP Demand Curve adjustment process and how it could be improved was discussed. Draft tariff language is to be sent out today. The schedule related to market participant approval of the tariff language was outlined.

SCR issues were discussed. Other ICAP WG topics noted included:

- Metering options for Distributed Generation resources and how to do the baseline testing and assess the impact on Transmission District/TO peaks.
- DMNC verification and associated problems, especially with getting revenue meter information to verify tests; the NYISO proposed to use its Plant Information (PI) system as a substitute for the meter data.
- DMNC test audit periods originally proposed to be up to 18 months. The NYISO MMU agreed to look at shortening the length of those periods.
- Work with the Installed Capacity Subcommittee of the NYS Reliability Council to develop both the Locational Capacity Requirements and the IRM process on a consistent basis.
- Import rights and "fastest fax wins" method looked at; the group is considering other ways to assign import rights.

C. Market Structures Working Group

Liam Baker, for Reliant, reported the Voltage Support Services (VSS) changes were discussed, and will be the subject of a motion to be voted on in the BIC today. Dave Lawrence of the NYISO presented the market evolution plan. AWS Truewind gave a presentation regarding wind forecasting, and its associated impacts on markets.

Other MSWG topics included 15-minute scheduling, the TCC manual, and Black Start services.

D. Price Responsive Load Working Group

Rick Mancini discussed advisories and activations for the EDRP and SCR programs. Some MPs have expressed concern with the number of advisories and activations, and the stand-by period needed when advisories are called. NYISO staff indicated that Operations would report to the PRLWG about the basis for advisories. Also on the PRLWG agenda were options for demand response participation in the Ancillary Services. The SCR participant notification process was another topic. Finally, NYSERDA presented information on the Con Ed demand response initiatives.

G. Scheduling & Pricing Working Group

Mr. Stalter talked about Virtual Bidding credit policy discussion at a recent SPWG/Credit Policy Task Force teleconference. Additional meetings addressing the Virtual Bidding credit policy will be scheduled in the Fall. In response to a question from Matt Picardi, Mr. Stalter indicated that the filing being discussed was a compliance filing to FERC.

7. Proposed NYISO TCC Manual

Ms. Kathy Whitaker of the NYISO reviewed the TCC Auction Manual. The scope of the current version of the Manual was discussed. This version focuses on the auction process, the auction rules, and the attachments, (the latter are attached to the rules document). Future Manual enhancements will include what is currently NYISO Technical Bulletin information: also, Market Participant self-validations, Attachment L updates, and transferring TCCs, among other things. However, the immediate goal is to get the manual out to the marketplace to support the Autumn 2005 capability period auction. Ms. Whittaker reviewed the history of this version of the manual at MSWG. BIC approval is needed today to get the manual out to the marketplace.

The motion was displayed for the Committee, and motioned and seconded by Jim Scheiderich and Matt Picardi. Mr. Picardi discussed the finality of auction results and how Market Participants are to interpret those results, in addition to other aspects of the manual. This is to be examined further by the MSWG, possibly to be addressed for the Spring 2006 auction. The motion was modified to address these concerns.

Mr. James D'Andrea for Keyspan Ravenswood raised a concern with voting on Manuals, and asked if manuals should be filed with FERC. Mr. Scheiderich responded that this question is a broader issue and should be addressed at Management Committee level. Further discussion was held about the language of the motion as displayed and revised. Mr. Alex Schnell of the NYISO had some concerns regarding the language of the revised motion, as the NYISO doesn't have complete control over how quickly the changes to various TCC documents and processes are approved. After more discussion of the roles of the tariff(s) as filed with FERC vs NYISO manuals, the vote on the motion was held.

Motion #3:

The Business Issues Committee (BIC) hereby approves the NYISO TCC Manual, as reviewed by the MSWG and distributed to the Committee on August 9, 2005.

The BIC further directs the MSWG to continue to review issues raised at the August 15th MSWG meeting regarding the finality of auction round results, and issues raised at this meeting with respect to TCC purchase and sale agreements and auction rules and deliver to BIC recommendations for changes to such rules, agreements, manuals, including attachments, or NYISO tariffs, for consideration and approval by BIC. The goal is that the process should be completed in time for any changes to be implemented for the Spring 2006 TCC auction.

(Motion passed with opposition from Keyspan Ravenswood, and several abstentions)

8. Proposal for Resolution of Near-term Voltage Support Service (VSS) Revisons

There was a discussion of whether to table this issue as more negotiating work is needed. Mr. Carl Patka of the NYISO pointed out there is a need to file with FERC as there is no rate in place for 2006. He further stated that not much progress has been made. A discussion ensued about where we are in the process of setting and filing a VSS rate.

Motion #4b:

Motion to table discussion of proposed Voltage Support Service program revisions. (Motion passed with opposition from National Grid and several abstentions)

9. Proposed Local Black Start Program revisions.

Ms Gina Fedele of Hunton & Williams outlined her presentation on the proposal to address providers of local Black Start service in Load Zone J (NYC). Negotiations with providers in the Orange & Rockland (O&R) and Central Hudson (CH) subzones will start soon. She noted that while Black Start compensation is addressed in the OATT and MST, the Tariffs contain very little detail on the compensation methodology. In the past, compensation has been developed from cost-based date found in FERC Form 1, however, divested generators are not keeping FERC Form 1 data, so current cost data is not available.

The new Zone J proposals were discussed, including the proposed compensation and testing requirements. The plan is for Con Ed to identify generators that are needed to provide Black Start in NYC. Other plan highlights include the length of service and technical requirements. Zone J compensation in the tariff would be changed from cost-based compensation to being determined on a unit and site basis.

Ms. Saia noted that local providers of Black Start have not been paid for this service since 1999 and in 2003 a Black Start Task Force was formed to resolve these issues. There were fewer issues for non-Zone J providers, so the Task Force agreed to let the Zone J entities work on their local black start program first. The intent was for this work to develop a rate for all local black start providers. Ms. Saia went on to state that it is her hope that the FERC filing would be comprehensive and not piecemeal. Ms. Saia is working to come up with language to satisfy Mirant as well as other affected parties.

Dr. Meyer Sasson of Con Ed agreed that it is important to have Black Start contracts in place, but noted that there are issues with regard to compensation, testing, and other technical concerns. In his view, a good testing program has been developed for New York City, but it is unknown what issues might exist for the other two zones. The NYISO has been heavily involved, which has been helpful. Dr. Sasson continued by saying that the NYC methodology may not work in the Central Hudson and Orange and Rockland subzones. He asserted that it is nonetheless important to get a plan in place for NYC and not to wait until plans are completed for other zones.

Mr. Haake noted that the generators in NYC performed well during the blackout, as they would now if called on. He was concerned over further delay in developing the Zone J/NYC agreements. Ms. Saia stated that Mirant is willing to allow this motion, but wants the O&R and Central Hudson black start work to move forward on a defined timeframe.

Ms. Fedele stated that the NYISO is planning to circulate proposals to the NY restof-state providers in the next week or two, and would agree to a tight timeframe, perhaps even starting within a month.

Neil Butterklee of Con Edison responded that he appreciated the concern expressed at the BIC, but this proposal is not just about compensation, but also testing. He opined that it is not appropriate for the BIC to make a motion for other third-parties to take specific actions in some number or weeks. Ms. Fedele responded that deadlines can be useful to get action. There was more discussion about other New York State providers' needs being addressed in this motion.

The motion was called for and moved by Con Edison and Keyspan Ravenswood. Tom Canino raised concerns with language in paragraph two of the motion, and moved to strike. LIPA seconded the motion to strike.

Motion 5a

Motion to amend motion 5 to strike second paragraph of motion. (Motion failed with 37% affirmative votes)

The main motion was called.

Motion #5

The Business Issues Committee (BIC) recommends that the Management Committee approve a Black Start and Restoration Services compensation plan and

testing principles upon which tariff amendments will be based relating to the provision of black start service in load zone J by existing black start providers, as presented to the BIC at its August 24, 2005 meeting.

The BIC further recommends that a proposal (s) to address the rights, obligations, and compensation plan, for the two other existing local providers of black start and system restoration services, shall be presented by the NYISO Staff at its September 2005 BIC meeting for discussion and action.

(Motion passed unanimously by show of hands with abstentions)

10. New Business

Mr. Younger expressed concerns about the NYISO website. Mr. King agreed that there is a need to improve certain aspects of the web, and to track website issues. He also suggested that Mr. Younger send particular issues to him. Mr. King noted that we are delivering further enhancements for the Web in October.

11. Administrative matters.

None

12. Adjournment

Meeting adjourned at 3:15 PM.

Respectfully Submitted, Bill Porter Recording BIC Secretary

Business Issues Committee Meeting

August 24, 2005 NYSNA – Latham, NY

SUMMARY OF MOTIONS

Motion #1:

Motion to approve the minutes of the June 29, 2005 meeting.

(Motion passed unanimously by show of hands)

Motion #2:

Motion to approve the minutes of the July 27, 2005 meeting.

(Motion passed unanimously by show of hands)

Motion #3:

The Business Issues Committee (BIC) hereby approves the NYISO TCC Manual, as reviewed by the MSWG and distributed to the Committee on August 9, 2005.

The BIC further directs the MSWG to continue to review issues raised at the August 15th MSWG meeting regarding the finality of auction round results, and issues raised at this meeting with respect to TCC purchase and sale agreements and auction rules and deliver to BIC recommendations for changes to such rules, agreements, manuals, including attachments, or NYISO tariffs, for consideration and approval by BIC. The goal is that the process should be completed in time for any changes to be implemented for the Spring 2006 TCC auction.

(Motion passed by a majority show of hands with abstentions)

Motion #4a

The Business Issues Committee (BIC) hereby approves revisions to the NYISO Voltage Support Service Program, as recommended by the MSWG at the August 15th meeting, as noted below:

- 1) To move to Net Lagging at the point of interconnection compensation measurement;
- 2) To provide clarification of testing requirements, as presented to the BIC at the August 24th meeting;
- 3) To the extent that a supplier does not have access to data from a net MVar meter, the NYISO will calculate a value based upon a gross MVar reading and an established power flow calculation;
- 4) The 2006 revenue requirement will be based upon the 2001 revenue requirement, updated for new additions and retirements as of October 31, 2005.

In addition, the BIC recommends that the Management Committee act to delete, as presented to the BIC on August 24th, the section from Rate Schedule 2 that requires Voltage Service payments to Non-Utility Generators ("NUGs") operating under existing power purchase agreements to be provided to the entity purchasing the NUG's Energy or Capacity, unless otherwise stipulated by that entity.

(Discussion of proposed Voltage Support Service program revisions tabled - see motion 4b)

Motion #4b:

Motion to table discussion of proposed Voltage Support Service program revisions.

(Motion passed by a majority show of hands with abstentions)

Motion #5

The Business Issues Committee (BIC) recommends that the Management Committee approve a Black Start and Restoration Services compensation plan and testing principles upon which tariff amendments will be based relating to the provision of black start service in load zone J by existing black start providers, as presented to the BIC at its August 24, 2005 meeting.

The BIC further recommends that a proposal (s) to address the rights, obligations, and compensation plan, for the two other existing local providers of black start and system restoration services, shall be presented by the NYISO Staff at its September 2005 BIC meeting for discussion and action.

(Motion passed unanimously by show of hands with abstentions)

Motion 5a

Motion to amend motion 5 to strike second paragraph of motion.

(Motion failed with 37% affirmative votes)
