draft User's Guide

Introduction

The MIS web enabled applications described in this User's Guide support upload and download query functions related to hourly tie line, generation, sub-zone and load bus data. **Upon deployment of these applications the NYISO will no longer support the use of FTP, monthly adjustment (XX), or ICCP files.**

This User's Guide assumes prior knowledge in the use of the NYISO MIS and MIS upload/download batch procedures. For information on the NYISO MIS, and the relevant authorization and Digital Certificate requirements, please refer to the [NYISO Market Participant User's Guide](#) (MPUG). For additional information relating to the upload/download process please refer to [Section 8 of the MPUG](#).

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

Section 1 – Using MIS Upload/Download Batch Procedures

Upload template for tie line, generator, and sub-zone data

The "TIE_GEN_SUBZONE_DATA" upload template enables a meter authority to upload tie line, generator and sub-zone hourly MW values to the NYISO MIS for a specific tie line, generator, or sub-zone PTID, or up to all applicable PTIDs assigned to that meter authority.

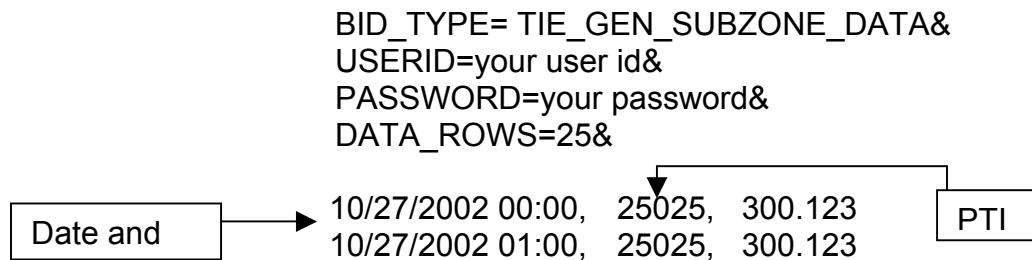

Data submitted via the TIE_GEN_SUBZONE_DATA upload template is always preceded by a header that defines the "Bid Type" (TIE_GEN_SUBZONE_DATA), the user's ID, the user's password, and the number of rows of data. An ampersand (&) defines the end of each entry field of the header, and data entered may not exceed 3 decimal places.

Data Dictionary for the BID_TYPE = TIE_GEN_SUBZONE_DATA upload template:

Variable Name	Value	Mandatory
USERID	Oracle account user name	Y
PASSWORD	Oracle account password	Y
BID_TYPE	TIE_GEN_SUBZONE_DATA	Y

Parameter	Data Type	Description
Date_Hour	MM/DD/YYYY HH:MM	Date parameter can be defined as the specific day. Included in the upload per PTID would be 23, 24, or 25 hourly values ¹ . All hours are identified as hour beginning (HB). Times are local (New York) time.
TIE/GEN PTID	NUM (6,0)	Unique integer identifier defined by NYISO
Hourly MW Value	NUMBER (20,3)	Hourly MW value reported by the meter authority for each PTID

For example, hourly MW values submitted for HB 00 through HB 23 of October 27, 2002 for PTID 25025 would look like this:

¹ For additional information concerning the treatment of 23 and 25- hour days, please refer to NYISO Technical Bulletins # 64 (25-hour day) and # 88 (23-hour day).

New York Independent System Operator

draft User's Guide

10/27/2002 25:00,	25025,	300.123
10/27/2002 02:00,	25025,	300.123
⋮	⋮	⋮
10/27/2002 20:00,	25025,	300.123
10/27/2002 21:00,	25025,	300.123
10/27/2002 22:00,	25025,	300.123
10/27/2002 23:00,	25025,	300.123

Hourly MW

Following successful submission of "TIE_GEN_SUBZONE_DATA" the NYISO will respond with a three-record header that includes a time stamp, confirmation of the bid type (TIE_GEN_SUBZONE_DATA), and the number of data rows processed. The data will be returned in the following format:

Date & Hour, Billing Date, Version, MA (Metering Authority), PTID, Name of PTID, Metering Authority Hourly MW Value, NYISO Hourly MW Value, Metering Authority Hourly Meter Update Date and Hour, Update User

For example:

TIME_STAMP=10/28/2002 08:41:37
BID_TYPE= TIE_GEN_SUBZONE_DATA
DATA_ROWS=25

10/27/2002 00:00,,,	XYZ Company,	12345, ABC,	124.23,	125.24,	12/15/2002 14:31:05,	scotto,
10/27/2002 01:00,,,	XYZ Company,	12345, ABC,	124.381,	125.315,	12/15/2002 14:31:05,	scotto,
10/27/2002 25:00,,,	XYZ Company,	12345, ABC,	125,	125.42,	12/15/2002 14:31:05,	scotto,
10/27/2002 02:00,,,	XYZ Company,	12345, ABC,	125,	125.42,	12/15/2002 14:31:05,	scotto,
10/27/2002 03:00,,,	XYZ Company,	12345, ABC,	125.17,	125.6,	12/15/2002 14:31:05,	scotto,
⋮	⋮	⋮	⋮	⋮	⋮	⋮

If the data is not entered or received properly the NYISO MIS will provide an error message indicating that the data must be resubmitted. For a complete listing of possible error messages, please refer to the OASIS page of the NYISO web site at <http://mis.nyiso.com/public/P-10list.htm>

Download template for tie line, generator, and sub-zone data

The "TIE_GEN_SUBZONE_DETAIL" download template enables a generator or meter authority to download their tie line, generator and sub-zone hourly MW data for a specified period of time within a month. The user can enter a single tie line, generator, or sub-zone PTID, or select up to 10 PTIDs at one time. If the PTID field is left blank, then every PTID associated with the meter authority will be included in the output file.

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

Data Dictionary for the TIE_GEN_SUBZONE_DETAIL download template:

Variable Name	Value	Mandatory
USERID	Oracle account user name	Y
PASSWORD	Oracle account password	Y
QUERY_TYPE	TIE_GEN_SUBZONE_DETAIL	Y
BILLING_MONTH	MM/DD/YYYY	Y
PTID	PTID exactly as shown in MIS	N
START_DATE	MM/DD/YYYY HH:MM:SS	N
END_DATE	MM/DD/YYYY HH:MM:SS	N
VERSION	Version number	N
ADVISORY_DATA	Y for advisory billed data only, N for most current data	N
UPDATE_TIME_START	MM/DD/YYYY HH:MM:SS	N
UPDATE_TIME_END	MM/DD/YYYY HH:MM:SS	N

The query to download sub-zone data for sub-zone PTID 12345 for October 27, 2002 would look like this:

```
USERID=your user ID&PASSWORD=your password&
QUERY_TYPE= TIE_GEN_SUBZONE_DETAIL&
BILLING_MONTH=10/27/2002&PTID=12345&
```

The MIS response to the download request for TIE_GEN_SUBZONE_DETAIL will provide the following data in csv (comma separated value) format:

Date & Hour, Billing Date, Version, MA (Metering Authority), PTID, Name of PTID, Metering Authority Hourly MW Value, NYISO Hourly MW Value, Metering Authority Hourly Meter Update Date and Hour, Update User

The returned data will appear as illustrated below.

```
10/27/2002 00:00, 10/27/2002, 0, XYZ Company, 12345, ABC, 124.23, 125.24, 12/15/2002 14:31:05, scotto,

10/27/2002 05:00, 10/27/2002, 0, XYZ Company, 12345, ABC, 130.54, 131.78, 12/15/2002 14:31:05, scotto,
10/27/2002 06:00, 10/27/2002, 0, XYZ Company, 12345, ABC, 132.246, 132.3, 12/15/2002 14:31:05, scotto,
10/27/2002 07:00, 10/27/2002, 0, XYZ Company, 12345, ABC, 136.4, 136.436, 12/15/2002 14:31:05, scotto,
10/27/2002 08:00, 10/27/2002, 0, XYZ Company, 12345, ABC, 129.35, 130, 12/15/2002 14:31:05, scotto,
10/27/2002 09:00, 10/27/2002, 0, XYZ Company, 12345, ABC, 132, 132, 12/15/2002 14:31:05, scotto,
10/27/2002 10:00, 10/27/2002, 0, XYZ Company, 12345, ABC, 132.1, 132, 12/15/2002 14:31:05, scotto,
10/27/2002 11:00, 10/27/2002, 0, XYZ Company, 12345, ABC, .....,.....,.....
```

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

For multiple PTID queries a comma “,” is used to separate the PTID values with the ampersand (&) following the last PTID number (For example PTID=12345,34567,56789&). To query all PTIDs, omit the PTID field entirely. For example:

```
USERID=your user ID&PASSWORD=your password&
QUERY_TYPE= TIE_GEN_SUBZONE_DETAIL&
BILLING_MONTH=10/27/2002&
```

If the applicable meter authority reports no hourly MW value for a particular PTID, then the *Metering Authority Hourly Value* field will be left blank.

Upload template for load bus data

The LOAD_BUS_HOUR_DATA upload template enables a meter authority to upload its applicable load bus data. The user can upload a single BUS PTID, or up to all applicable BUS PTIDs for all hours of a single day. If the MW value for a load bus is zero for a given hour, then the user must enter a zero in the field. The field should not be left blank. Also, data entered may not exceed 3 decimal places. The LOAD_BUS_HOUR_DATA replaces the data previously identified as TOL, and hourly load bus data.

Data submitted via the LOAD_BUS_HOUR_DATA upload template is always preceded by a header that defines the “Bid Type” (LOAD_BUS_HOUR_DATA), the user's ID, the user's password, and the number of rows of data. An ampersand (&) defines the end of each entry field of the header.

Data dictionary for the BID_TYPE = LOAD_BUS_HOUR_DATA upload template:

Variable Name	Value	Mandatory
USERID	Oracle account user name	Y
PASSWORD	Oracle account password	Y
BID_TYPE	LOAD_BUS_HOUR_DATA	Y

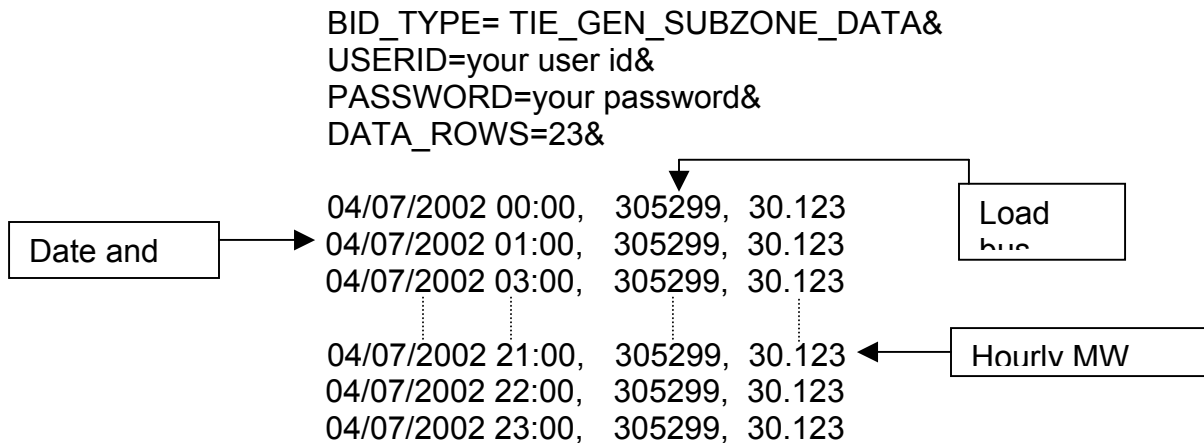

Parameter	Data Type	Description
Date_Hour	MM/DD/YYYY HH:MM	Date parameter can be defined as the specific day. Included in the upload per PTID would be 23, 24, or 25 hourly values. All hours are identified as hour beginning (HB). Times are local (New York) time.
BUS PTID	NUM (6,0)	Unique integer identifier defined by NYISO for each load bus.
Hourly MW Value	NUMBER (20,3)	Hourly MW value reported by the Metering Authority for each BUS PTID. (It is mandatory that a value be submitted. If no value is submitted then a null will appear).

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

For example, hourly load bus MW values submitted for HB 00 through HB 23 of April 7, 2002 for bus PTID 305299 would look like this:

Following successful submission of "LOAD_BUS_HOUR_DATA" the NYISO will respond with a three-record header that includes a time stamp, confirmation of the bid type (LOAD_BUS_HOUR_DATA), and the number of data rows processed. The data will be returned in the following format:

Date & Hour, Billing Date, Version, Load Bus PTID, Load Bus Name, Metering Authority Hourly Value, Update Date and Hour, Update User

For example:

```

    TIME_STAMP=06/02/2002 09:27:14
    BID_TYPE= LOAD_BUS_HOUR_DATA
    DATA_ROWS=23

    04/07/2002 0:00,,, 78901, XXX West, 125.17,6/15/2002 14:31:05
    04/07/2002 1:00,,, 78901, XXX West, 125.1, 6/15/2002 14:31:05
    04/07/2002 3:00,,, 78901, XXX West, 125.35, 6/15/2002 14:31:05
    04/07/2002 4:00,,, 78901, XXX West, 131.678, 6/15/2002 14:31:05
    04/07/2002 5:00,,, 78901, XXX West, 131.327, 6/15/2002 14:31:05
    04/07/2002 6:00,,, 78901, XXX West, 132.1, 6/15/2002 14:31:05
    04/07/2002 7:00,,, 78901, XXX West, 136.53, 6/15/2002 14:31:05
    04/07/2002 8:00,,, 78901, XXX West, 130.86, 6/15/2002 14:31:05
    04/07/2002 9:00,,, 78901, XXX West, 132.186, 6/15/2002 14:31:05
    04/07/2002 10:00,,, 78901, XXX West, 132.5, 6/15/2002 14:31:05
  
```

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

If the data is not entered or received properly the NYISO MIS will provide an error message indicating that the data must be checked and resubmitted.

Download template for load bus data

The "LOAD_BUS_HOUR_DETAIL" download template enables load serving entities to download their applicable load bus data. This download query can provide load bus data for a specified period of time within a given month. The user may query a single BUS PTID, select up to 10 BUS PTIDs at one time, or select all BUS PTIDs associated with the user by leaving the BUS PTID field blank. The returned information will also specify the last time that the data was updated, and identify the party that performed the most recent update.

Data dictionary for the LOAD_BUS_HOUR_DETAIL download template:

Variable Name	Value	Mandatory
USERID	Oracle account user name	Y
PASSWORD	Oracle account password	Y
QUERY_TYPE	LOAD_BUS_HOUR_DETAIL	Y
BILLING_MONTH	MM/DD/YYYY	Y
PTID	PTID exactly as shown in MIS	N
START_DATE	MM/DD/YYYY HH:MM:SS	N
END_DATE	MM/DD/YYYY HH:MM:SS	N
VERSION	Version number	N
ADVISORY_DATA	Y for advisory billed data only, N for most current data	N
UPDATE_TIME_START	MM/DD/YYYY HH:MM:SS	N
UPDATE_TIME_END	MM/DD/YYYY HH:MM:SS	N

The query to download load bus data for load bus PTID 78901 for June 1, 2002 would look like this:

```
USERID=your user ID&PASSWORD=your password&
QUERY_TYPE= LOAD_BUS_HOUR_DETAIL&
BILLING_MONTH=04/07/2002&PTID=78901&
```

The MIS response to the LOAD_BUS_HOUR_DETAIL query will provide the following data in csv format:

Date & Hour, Billing Date, Version, Load Bus PTID, Load Bus Name, Metering Authority Hourly Value, Update Date and Hour, Update User

The returned data will appear as illustrated below.

```
04/07/2002 0:00, 04/07/2002, 0, 78901, XXX West, 125.17,06/15/2002 14:31:05
04/07/2002 1:00, 04/07/2002, 0, 78901, XXX West, 125.1, 06/15/2002 14:31:05
```

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

04/07/2002 3:00, 04/07/2002, 0, 78901, XXX West, 125.35, 06/15/2002 14:31:05
04/07/2002 4:00, 04/07/2002, 0, 78901, XXX West, 131.678, 06/15/2002 14:31:05

For multiple PTID queries a comma “,” is used to separate the PTID values with the ampersand (&) following the last PTID number (For example PTID=12345,34567,56789&). To query all PTIDs, omit the PTID field entirely. For example:

USERID=your user ID&PASSWORD=your password&
QUERY_TYPE= LOAD_BUS_HOUR_DETAIL&
BILLING_MONTH=04/07/2002&

Download template for Metering Authority Subzone Load Data

The “Subzone Load” download template enables a Metering Authority to download its Subzone Load data. The user can enter a single subzone PTID, select up to 10 subzone PTIDs at one time, or select every subzone PTID associated with the user by leaving the PTID field blank, and the MIS will return data for a specific date, or an entire month, as specified by the user. The metering authority subzone load data replaces the data previously identified as MLOAD data.

Data dictionary for the Metering Authority Subzone Load Data download template:

Variable Name	Value	Mandatory
USERID	Oracle account user name	Y
PASSWORD	Oracle account password	Y
QUERY_TYPE	SUBZONE_LOAD	Y
DATE	MM/YYYY or MM/DD/YYYY	Y
PTID	Subzone PTID exactly as shown in MIS	N

The query to download sub-zone load data for sub-zone PTID 12345 for September 1, 2002 would look like this:

USERID=your user ID&PASSWORD=your password&
QUERY_TYPE= SUBZONE_LOAD &
DATE=09/01/2002&PTID=12345&

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

The MIS response to an "Metering Authority Subzone Load Data" query will include the following in csv format:

Date & Hour, Billing Date, Version, Subzone PTID, Load Data (integrated MWhr), Losses value, Subzone Load Verified

The returned data will appear as illustrated below.

```
09/01/2001 0:00, 9/1/2001, 0, 12345, 716.906, 5.234,Y
09/01/2001 1:00, 9/1/2001, 0, 12345, 684.652, 4.2134, Y
09/01/2001 2:00, 9/1/2001, 0, 12345, 658.39, 10.221, Y
09/01/2001 3:00, 9/1/2001, 0, 12345, 641.323, 7.23, Y
09/01/2001 4:00, 9/1/2001, 0, 12345, 642.829, 9.216, Y
09/01/2001 5:00, 9/1/2001, 0, 12345, 633.675, 8.176, Y
09/01/2001 6:00, 9/1/2001, 0, 12345, 654.738, 5.231, Y
09/01/2001 7:00, 9/1/2001, 0, 12345, 706.675, 5, Y
09/01/2001 8:00, 9/1/2001, 0, 12345, 770.594, 5.987, Y
09/01/2001 9:00, 9/1/2001, 0, 12345, 811.354, 5.121, Y
09/01/2001 10:00, 9/1/2001, 0, 12345, 822.451, 4.216,Y
09/01/2001 11:00, 9/1/2001, 0, 12345, ....., .....
```

For multiple PTID queries a comma “,” is used to separate the PTID values with the ampersand (&) following the last PTID number (For example PTID=12345,34567,56789&). To query all PTIDs, omit the PTID field entirely. For example:

```
USERID=your user ID&PASSWORD=your password&
QUERY_TYPE= SUBZONE_LOAD &DATE=09/01/2002&
```

Upload template to indicate Meter Authority Agreement

The METER_AUTHORITY_AGREEMENT upload template enables the metering authority to indicate agreement with the subzone load calculation for a given subzone. This template gives the metering authority the ability to indicate agreement on a single day, or multiple days. An ampersand (&) defines the end of each entry field of the header.

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

Web Based Reconciliation

draft User's Guide

Data dictionary for the BID_TYPE = METER_AUTHORITY_AGREEMENT upload template:

Variable Name	Value	Mandatory
USERID	Oracle account user name	Y
PASSWORD	Oracle account password	Y
BID_TYPE	METER_AUTHORITY_AGREEMENT	Y

Parameter	Data Type	Description
Date	MM/DD/YYYY	Date parameter can be defined as the specific day.
PTID	NUM (6,0)	Unique integer identifier defined by NYISO for each subzone
Agreement Flag	Y, N	A flag signifying, for the subzone identified, that the meter authority signifies agreement (Y) with their subzone load value. An "N" signifies that the meter authority does not agree with their subzone load value.

For example, if a meter authority wanted to indicate agreement with the data the submitted message would look like this:

```
BID_TYPE= METER_AUTHORITY_AGREEMENT&
USERID=your user id&
PASSWORD=your password&
DATA_ROWS=3&
```

```
06/01/2002, 305299, Y
06/02/2002, 305299, Y
06/03/2002, 305299, Y
```

Following successful submission of "METER_AUTHORITY_AGREEMENT" the NYISO will respond with a three-record header that includes a time stamp, confirmation of the bid type (METER_AUTHORITY_AGREEMENT), and the number if data rows processed. The data will be returned in the following format:

Date, Subzone PTID, Subzone Name, Agreement Flag

For example:

```
TIME_STAMP=06/02/2002 07:35:16
BID_TYPE=METER_AUTHORITY_AGREEMENT
DATA_ROWS=3
04/07/2002,12345,SUBZONE_A,Y
04/08/2002,12345,SUBZONE_A,Y
04/09/2002,12345,SUBZONE_A,N
```

New York Independent System Operator

Download template for Monthly Wholesale Load Verification

The "WHOLESALE_VERIFICATION" download template enables a meter authority to download wholesale load data for each specified subzone if their wholesale loads match their calculated subzone load value (within tolerance). This template will return results on a monthly basis, displaying each day of the month as one row, and each subzone as one column. The user can enter a single Subzone PTID, multiple Subzone PTIDs, or all Subzone PTIDs associated with the meter authority.

Data dictionary for the Monthly Wholesale Load Verification download template:

Variable Name	Value	Mandatory
USERID	Oracle account user name	Y
PASSWORD	Oracle account password	Y
QUERY_TYPE	WHOLESALE_VERIFICATION	Y
DATE	MM/YYYY	Y
PTID	Subzone PTID exactly shown in MIS	N
START_DATE	MM/DD/YYYY HH:MM:SS	N
END_DATE	MM/DD/YYYY HH:MM:SS	N

The query to download monthly wholesale load data for verification would look like this:

```
USERID=your user ID&PASSWORD=your password&
QUERY_TYPE= WHOLESALE_VERIFICATION&
DATE=09/2002&PTID=12345&
```

The MIS response to a WHOLESALE_VERIFICATION query will include the following in csv format:

Date & Hour, Subzone PTID, Subzone name, Within Tolerance Flag

The returned data will appear as illustrated below.

```
09/1/2001 0:00, 12345,XYZ East,Y
09/1/2001 1:00, 12345,XYZ East,Y
09/1/2001 2:00, 12345,XYZ East,Y
09/1/2001 3:00, 12345,XYZ East,Y
09/1/2001 4:00, 12345,XYZ East,Y
09/1/2001 5:00, 12345,XYZ East,Y
09/1/2001 6:00, 12345,XYZ East,Y
09/1/2001 7:00, 12345,XYZ East,Y
09/1/2001 8:00, 12345,XYZ East,Y
09/1/2001 9:00, 12345,XYZ East,Y
09/1/2001 10:00, 12345,XYZ East,Y
09/1/2001 11:00, 12345,XYZ East,Y
09/1/2001 12:00, 12345,XYZ East,Y
```

New York Independent System Operator

NOTE: This is a draft User's Guide and is distributed solely for the purpose of soliciting comments. This draft User's Guide does not represent NYISO concepts, techniques or processes.

For multiple PTID queries a comma “,” is used to separate the PTID values with the ampersand (&) following the last PTID number (For example PTID=12345,34567,56789&). To query all PTIDs, omit the PTID field entirely. For example:

```
USERID=your user ID&PASSWORD=your password&
QUERY_TYPE= WHOLESALE_VERIFICATION&DATE=09/2002&
```

Download template for Invoice History

The “INVOICE_HIST” download template enables a user to download invoice history data for a specified date range.

Data dictionary for the Invoice History download template:

Variable Name	Value	Mandatory
USERID	Oracle account user name	Y
PASSWORD	Oracle account password	Y
QUERY_TYPE	INVOICE_HIST	Y
START_DATE	MM/DD/YYYY	Y
END_DATE	MM/DD/YYYY	Y

The query to download monthly wholesale load data for verification would look like this:

```
USERID=your user ID&PASSWORD=your password&
QUERY_TYPE=INVOICE_HIST&
START_DATE=06/01/2002&END_DATE=06/30/2002&
```

The MIS response to an INVOICE_HISTORY query will include the following in csv format:

Invoice Date, Billing Date, Version Number, Last Updated

The returned data will appear as illustrated below.

```
06/01/2002,06/02/2002,0,07/02/2002 11:34
06/01/2002,06/02/2002,1,07/02/2002 11:34
06/01/2002,06/02/2002,2,07/02/2002 11:34
```

Section 2 - Access through interactive web displays

Tie line, generator, subzone, and load bus data may also be accessed, reviewed and updated via an interactive MIS web based feature. To utilize this feature it is first necessary to login to the NYISO MIS through the User Login page at <https://marketplace.nyiso.com/pgLogin.jsp>. With the proper NYISO Digital Certificate, the User Login display will appear allowing the user to log into the NYISO MIS. For additional information related to logging into the NYISO MIS please refer to Section 7 of the [NYISO MPUG](#).

Once logged into the NYISO MIS select *Metering Reconciliation* as illustrated in Figure 2-1.

Figure 2-1

The *Calculated Subzone Load* query page (Figure 2-2) is the default page when the user first enters the Metering Reconciliation application. Clicking on the “Report Type” button accesses the other Metering Reconciliation query pages. A drop down menu lists the query options.

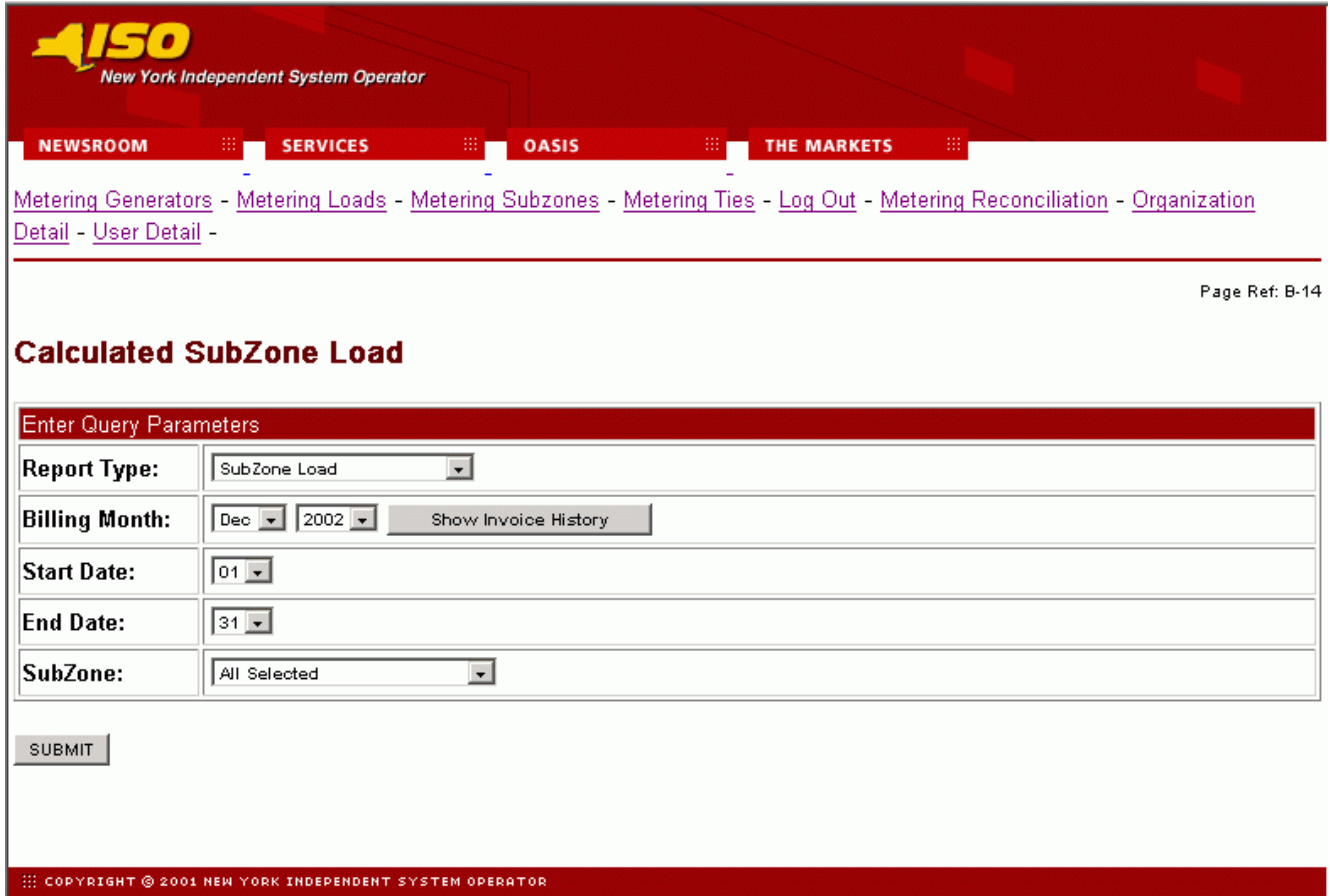

The *Calculated Subzone Load* query page enables the user to select the date, start and stop times, and the PTID of interest for viewing calculated subzone load data. If no PTID is selected, then all PTIDs that the user has access to will be provided for the date and times entered. After the query information is entered click on *Update* to retrieve the specified report, or *Reset* to clear the query fields.

The *Calculated Subzone Load* query page, as well as the other query pages includes a “Show Invoice History” button that provides the option of choosing a specific invoice version. When this button is clicked, the query page will be regenerated with an additional menu providing a list of all available versions for the specified billing month. By default, a report will represent the current metering information.

Calculated Subzone Load Query Page

This query allows a meter authority to view their ISO calculated subzone load for a specific month. The *Calculated Subzone Load* query page includes a drop down menu that is populated with all subzones owned by the meter authority. The user has the ability to

choose a single subzone, or all of their subzones by selecting the appropriate choice from the drop down menu.

The screenshot shows the IISO web interface. At the top left is the IISO logo. A navigation bar contains links for NEWSROOM, SERVICES, OASIS, and THE MARKETS. Below this is a breadcrumb trail: [Metering Generators](#) - [Metering Loads](#) - [Metering Subzones](#) - [Metering Ties](#) - [Log Out](#) - [Metering Reconciliation](#) - [Organization Detail](#) - [User Detail](#). On the right side, there is a page reference: Page Ref: B-14. The main heading is **Calculated SubZone Load**. Below this is a form titled "Enter Query Parameters" with the following fields:

Report Type:	SubZone Load
Billing Month:	Dec 2002 <input type="button" value="Show Invoice History"/>
Start Date:	01
End Date:	31
SubZone:	All Selected

Below the form is a button. At the bottom of the page, there is a copyright notice: COPYRIGHT © 2001 NEW YORK INDEPENDENT SYSTEM OPERATOR.

Figure 2-2

After the query parameters have been entered the *Calculated Subzone Load* results page (Figure 2-3) is displayed. For each day in the specified data range the ISO calculated MWh data is displayed, sorted by hour. If there are multiple days in the date range, each day will be displayed separately with its own ISO MWh subtotal. A checkbox enables the meter authority to indicate their acceptance of the ISO data.

Figure 2-8

This query produces a *Monthly Load Verification for Subzones* results page (Figure 2-9) that displays one subzone per column, and each row displays a different day of the month. At the intersection of each day and each subzone there is a checkbox and a magnifying glass icon. A checked check box, indicates that the user has accepted the current ISO calculated MWh. An unchecked box indicates that either the user has not accepted the current data, or a neighboring generator or tie has updated their information, which recalculates the ISO MWh and will uncheck the box for the user. Clicking on the magnifying glass will forward the user to the *Calculated Subzone Load* results page (Figure 2-3) for that subzone and day combination. Click on the submit button on the bottom of the display to submit the completed *Monthly Load Verification for Subzones* form.

The screenshot shows the AISO (New York Independent System Operator) web interface. At the top, there is a navigation menu with tabs for NEWSROOM, SERVICES, OASIS, and THE MARKETS. Below the menu are several links: Metering Generators, Metering Loads, Metering Subzones, Metering Ties, Log Out, Metering Reconciliation, Organization Detail, and User Detail. The page title is 'Monthly Load Verification for SubZones'. Under 'Query Criteria', the 'Query Type' is set to 'SubZone Load Verification'. There are 'Check All' and 'Clear All' buttons. The main content is a table with columns for Date, Billing Date, and eight SubZones: North, Northeast, East, Southeast, South, Southwest, and West. Each cell in the table contains a checkbox and a magnifying glass icon. A callout box with an arrow points to a magnifying glass icon in the 'Southeast' column for the date '12/9/2002', with the text: 'Click on a magnifying glass icon to view calculated subzone load data for that subzone for that day.' At the bottom of the table are 'Submit' and 'Reset' buttons. A footer at the very bottom reads 'COPYRIGHT © 2001 NEW YORK INDEPENDENT SYSTEM OPERATOR'.

Figure 2-9

Wholesale Bus Load Detail Query page

After a meter authority approves their ISO calculated subzone load figures they then proceed to upload their Wholesale Load Bus information. From the *Wholesale Bus Load Detail* query page the user has the ability to choose a date or date/time frame, and a specific subzone for which they wish to enter their wholesale load bus data. Once the query criteria are entered the *Wholesale Load Bus Detail* results page (Figure 2-11) is displayed with the PTIDs for which the meter authority is responsible. The user can report and submit wholesale load bus data from this display.

Figure 2-11

Wholesale Load Match query page

Once a meter authority submits their wholesale load bus information for a given subzone for a given month, then they can proceed to the *Wholesale Load Match* query page. From this query page the user has the ability to choose a date and a specific subzone for which they would like to see if the sum of the wholesale loads matches the sum of the subzone (within tolerance).

Page Ref: B-18

Figure 2-12

The Wholesale Load Match query yields a table (Figure 2-13) that signifies if the sum of the wholesale loads matches the subzone load value (within tolerance) for all subzones selected for each day for the month selected. A checkmark (√) indicates that the values agree, and an X indicates that the values are not within the tolerance.

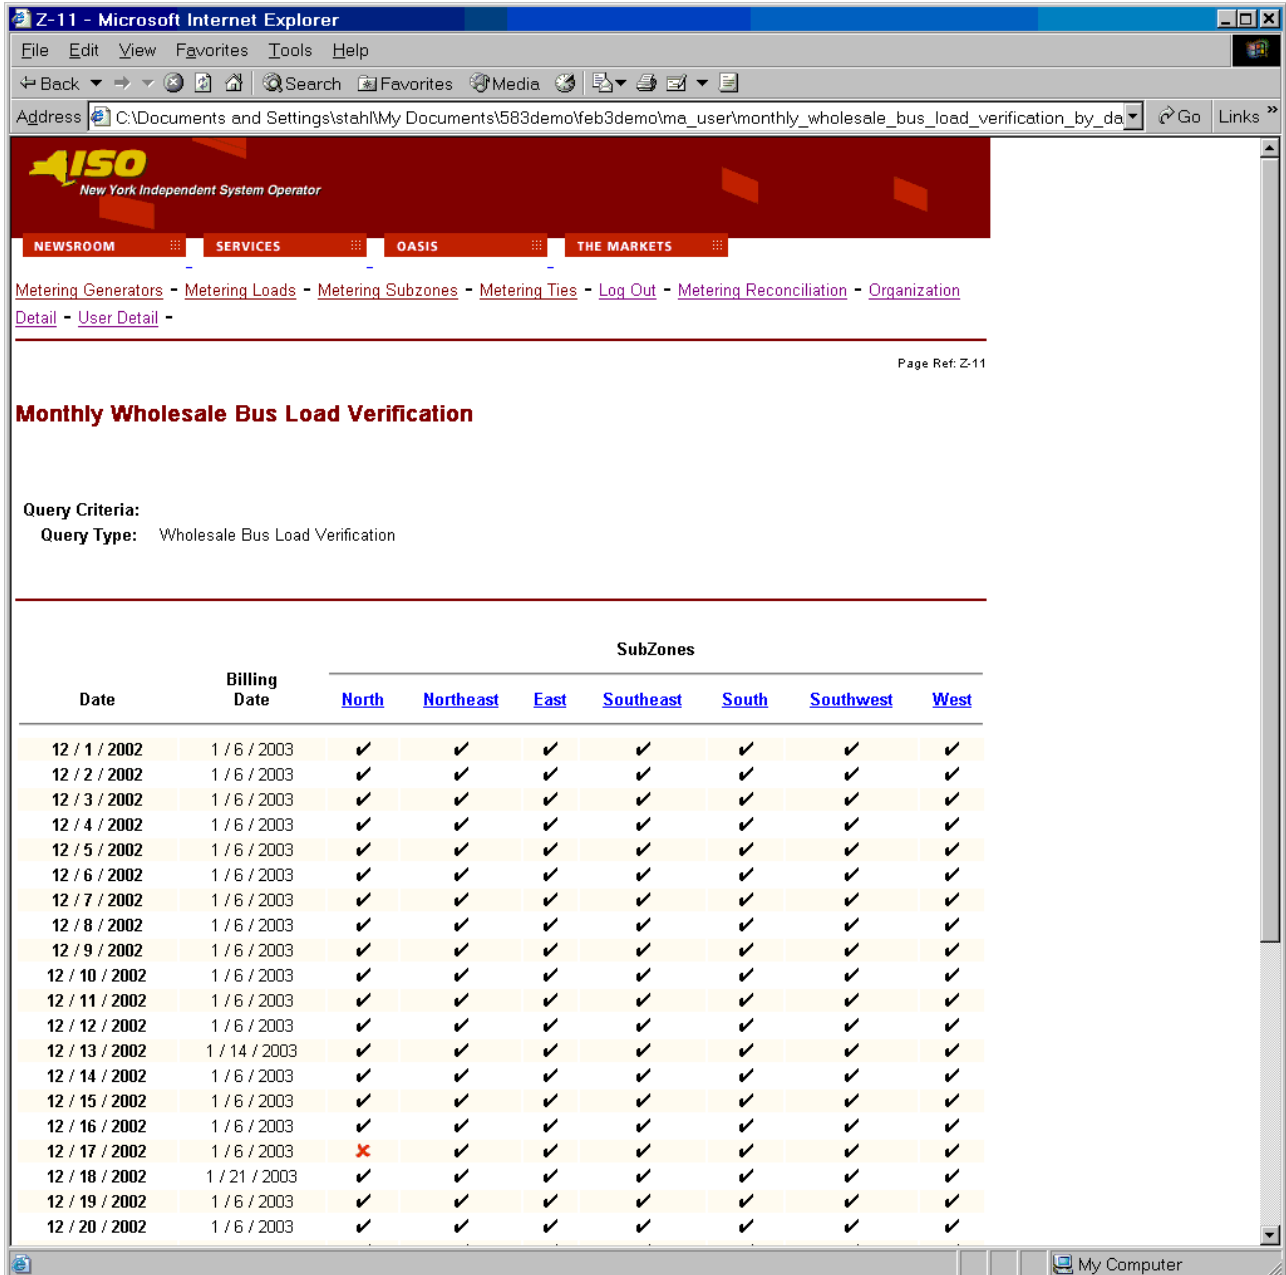

Figure 2-13

User Detail Information

A user may review information pertaining to the privileges assigned to the user via the *User Detail* (Figure 2-14) page.

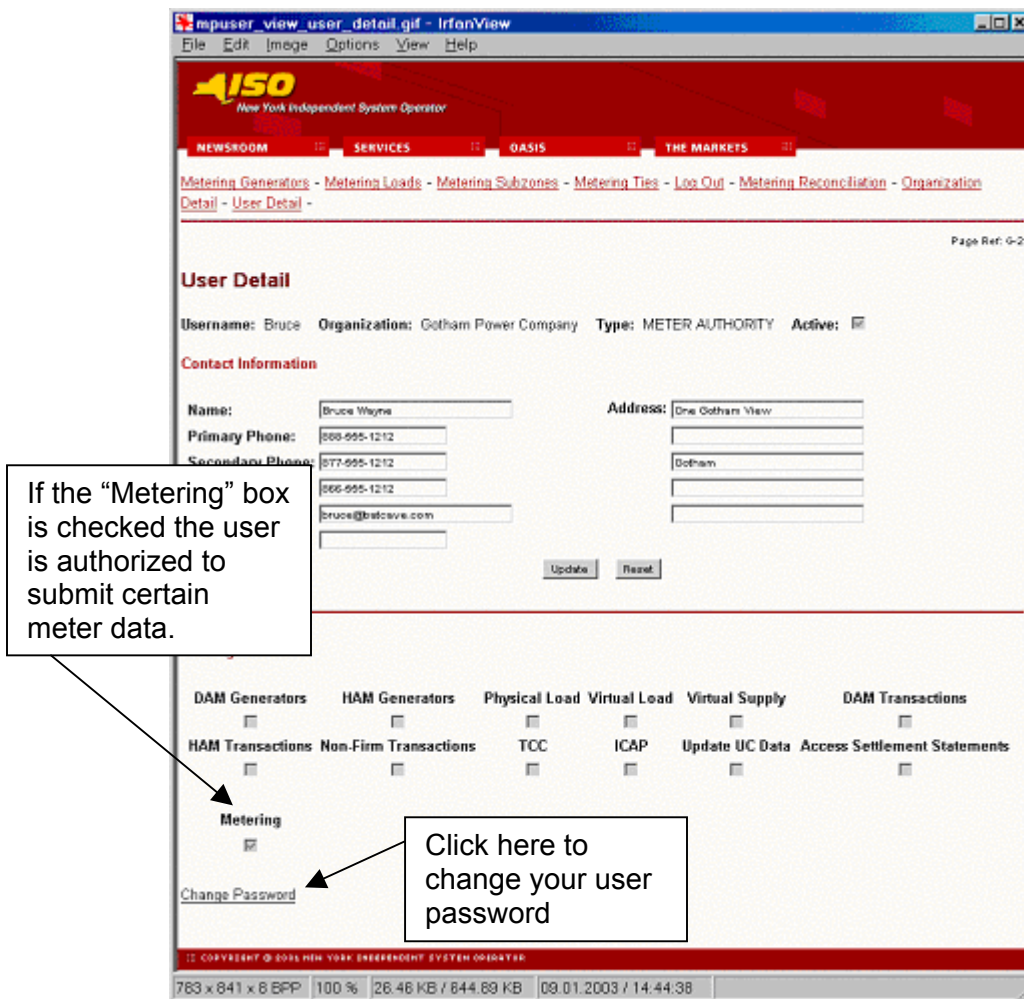

Figure 2-14

Links at the top of the *User Detail* page provide access to additional displays that define the specific loads, ties, subzones, and generators (Figure 2-15) that the individual user is authorized to view, as well as AM information about the organization (Figure 2-16).

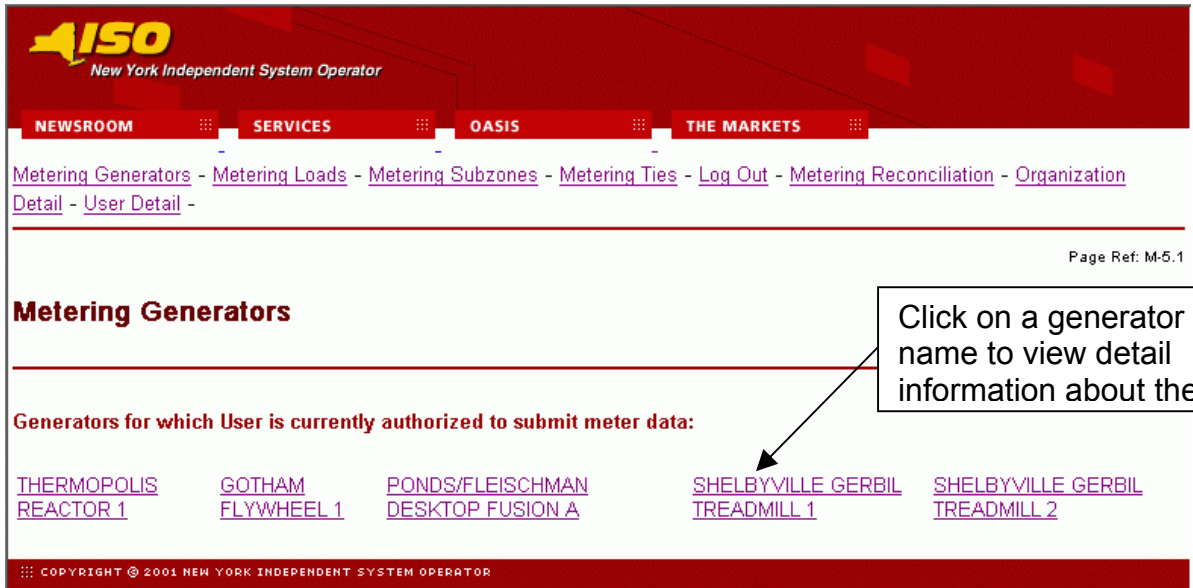

Figure 2-15

The *Metering Generators* page (Figure 2-15) displays the generators for which the user is authorized to view metering data. Similar pages display the same information with respect to loads, subzones, and ties. An *Organization Detail* page (Figure 2-16) displays information about the organization.

Section 3 - Market Participant Administrator Web Pages

The Market Participant Administrator web pages enable the meter authority's system administrator to assign and control access to the web based reconciliation functions. Through the use of these administrator web pages the system administrator can permit or deny access to select bus, load and subzone information, and readily alter the assigned permissions. For additional information about administrative tasks please refer to Section 6 of the NYISO Market Participant User's Guide.

To access the Market Participant Administrator web pages login via the Administrator login page from the NYISO MIS home page. Select "Organization Users" from the Administrator Menu frame, and then select the desired organization and click on "Display" to view the users associated with that organization. Select the desired user to access the *User Detail* page (Figure 3-1) for that user.

Figure 3-1

To assign meter data submission privileges to an individual user click on the "Metering" checkbox on the lower left of the *User Detail* page.

The *User Detail* page includes hyperlinks to additional administrative web pages that enable the system administrator to grant permissions to an individual user to view metering data for specific generators, loads, ties and subzones.

Metering Generators permissions page

This page is accessed via the hyperlink located at the bottom of the *User Detail* page (Figure 3-1). The *Metering Generators* page (Figure 3-2) enables the system administrator to view the generators that the selected user is authorized to submit metering data for, and provides the mechanism to change the authorizations.
