

NYISO Management Committee Meeting

Special Meeting

May 14, 2003

Teleconference

Draft MINUTES OF THE MEETING

1. Introduction and Meeting Objectives

Garry Brown, Chairman, called the meeting to order at 3:04 AM and welcomed the members of the Management Committee ("MC").

Mr. Brown explained the process for determining the need for a Special Meeting and that this special meeting was scheduled at request of ISO staff and National Grid. He had agreed that by having the special meeting, the TCC Revenue Shortfall Proposal could be brought before the Board a month earlier.

2. NYISO TCC Revenue Shortfall Proposal

Art Desell gave a presentation on the 'NYISO TCC Revenue Shortfall Proposal'. This proposal covers the same ground as the National Grid proposal in addition to providing clarification on several points.

Mayer Sasson, of Consolidated Edison, requested that an impact analysis be performed by the ISO and Mr. Desell responded that the analysis of the Spring '03 auction would be released by the end of next week.

Mr. Brown then clarified that the target date for implementation is November 1, but will be implemented earlier if possible and Mr. Desell added that the capability period auction would start in August. Allocation of revenues from that auction doesn't occur until approximately November 1st.

Mr. Sasson stated that implementation should be in time for a winter strip auction. To implement mid-season would be unfair.

Stuart Nachmias, of Consolidated Edison, stated that the BIC had determined that work to address the shortfall for implementation by the Fall 2003 auction remains. Mr. Nachmias questioned David Patton's presentation to the FERC that didn't show the congestion shortfalls in 2001 and 2002. Mr. King explained that David Patton's presentation assessed

only congestion collected in Real Time, and did not include the Day-Ahead where the shortfalls occurred.

Ray Kinney, NYSEG, stated that the NYISO proposal consists of both the presentation and the white paper presented today.

Elaine Robinson responded to a question of how implementing this project would affect SMD 2.0 stating that the PPT would be meeting on May 22nd and discuss the SMD 2.0 schedule. Garry Brown will report back on open issues after the next PPT meeting.

Motion #1:

The Management Committee approves the NYISO Proposal, as presented on May 14, 2003, for addressing several issues related to the settlement process for TCCs, consisting of:

1. A method for determining charges for decreases in congestion rent and auction revenue collections attributable to transmission facility outages that are modeled in the DAM, TCC reconfiguration auctions, or TCC capability period auctions;
2. A method for determining payments for increases in congestion rent and auction revenue collections attributable to transmission facilities placed back, or modeled back in-service in the DAM or the TCC reconfiguration auctions;
3. A flow-based method for allocating residual auction revenues to the TOs;
4. A modified method for allocating the residual congestion rents from the DAM settlements to the TOs; and
5. BIC recommends that the Management Committee approve this proposal and request that the Board approve it for a Section 205 filing in lieu of the proposal to reallocate congestion rent shortfalls and surpluses and TCC auction revenues approved by the Management Committee at its February 20th, 2003 meeting.
6. Implementation of this allocation methodology to the Day Ahead and TCC Reconfiguration auctions shall take place for the same month. The NYISO shall implement these changes as soon as possible but, in any event, shall be applied retroactively to the Winter 2003-2004 Capability Period TCC Auction, Reconfiguration Auctions and DAM.
7. The Management Committee requests that the NYISO staff work in conjunction with the Market Structure Working Group and/or Congestion Reduction Task Force to develop tariff language for approval by the chairs and vice-chairs of the Business Issues and Management Committees.

(Motion passed with 88.45 % affirmative votes)

3. New Business

Mr. King reported that a draft white paper on virtual regional dispatch (VRD) will be posted early next week. An email notification will be sent out.

4. Adjourn

The meeting adjourned at approximately 4:30PM.
