

Special BAWG Meeting
September 8, 2006

Proposed Con Ed amendment to the Shorten the NYISO Settlement Cycle
Motion being proposed for approval at the September 13 BIC Meeting.

We would propose to amend the motion to include the following Implementation Requirement:

- The NYISO must develop and implement other performance improvements by Dec. 2007 including a new Web Based Reconciliation system that provides for the files to be loaded to NYISO in one file with 'echo back' to verify successful and complete upload. We suggest that the NYISO include implementation of these improvements as part of its 2007 Corporate Goals Objectives.
