

All CSR-related edits are in **red text**. All other edits are DER-related.

2.1 Definitions - A

Availability: A measure of time that a Generator, Aggregation, transmission line, interconnection or other facility is or was capable of providing service, whether or not it actually is or was in-service.

2.9 Definitions - I

Intermittent Power Resource: A device for the production of electricity that is characterized by an energy source that: (1) is renewable; (2) cannot be stored by the ~~facility owner or operator~~ producing device; and (3) has variability that is beyond the control of the facility owner or operator. In New York, resources that depend upon wind, solar energy or landfill gas for their fuel have been classified as Intermittent Power Resources. Each Intermittent Power Resource that depends on wind as its fuel shall include all turbines metered at a single scheduling point identifier (PTID).

2.15 Definitions - O

Out-of-Merit: The designation of Resources committed and/or dispatched by the ISO at specified output limits for specified time periods to meet Load and/or reliability requirements that differ from or supplement the ISO's security constrained economic commitment and/or dispatch. The NYISO may also use Out-of-Merit to set CSR Scheduling Limits for specified time periods to meet Load and/or reliability requirements that differ from or supplement the ISO's security constrained economic commitment and/or dispatch.
