Rate Formula Template Utilizing FERC Form 1 Data

LS Power Grid New York Corporation I

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)

References to data from FERC Form 1 are indicated as: #.v.x (page, line, column)

Note Letter

С

Balances exclude Asset Retirement Costs.

- No Acquisition Adjustment will be recovered until a filing requesting recovery is submitted to and approved by FERC under FPA Section 205.
- The balances in Accounts 190, 281, 282 and 283 are allocated to transmission plant included in ISO rates based on company accounting records. Accumulated deferred income tax amounts associated with asset or liability accounts excluded from rate base do not affect rate base, such as ADIT related to asset retirement obligations and certain tax-related regulatory assets or liabilities. To the extent that the normalization requirements apply to ADIT activity in the projected net revenue requirement calculation or the true-up adjustment calculation, the ADIT amounts are computed in accordance with the proration formula of Treasury regulation Section 1.167(I)-1(h)(6) with averaging in accordance with IRC Section 168(i)(9)(B). The remaining ADIT activity are averaged. Work papers supporting the ADIT calculations will be posted with each projected net revenue requirement and/or Annual True-Up and included in the annual Informational Filing submitted to the Commission.
- Investment tax credit (ITC) is recorded in accordance with the deferral method of accounting and any normalization requirements that relate to the eligibility to claim the credit or the recapture of the credit. The revenue requirement impact of any ITC amortization permitted to reduce income tax expense is determined as the amount of the Amortized Investment Tax Credit (266.8.f) multiplied by the applicable tax gross-up factor.
- E The composite income tax rate (T) applicable to each Rate Year (including both Annual Projections and True-Up Adjustments) is based on the Federal income tax rate (FIT), the State income tax rate (SIT) and the percentage of federal income tax deductible for state income tax purposes (P). If the utility is taxed in more than one state, it must attach a work paper showing the name of each state and how the blended or composite SIT was computed.

Inputs Required: Federal income tax rate (FIT) = 21.00%

Composite state income tax rate (SIT) = 6.50% (Attachment 3)

Percent of federal income tax deductible for state purposes (P) = -

For each Rate Year (including both Annual Projections and True-Up Adjustments) the statutory income tax rates utilized in the Formula Rate shall reflect the weighted average rates actually in effect during the Rate Year. For example, if the statutory tax rate is 10% from January 1 through June 30, and 5% from July 1 through December 31, such rates would be weighted 181/365 and 184/365 respectively. For a non-leap year.

- Upon enactment of changes in tax law, ADIT balances are re-measured and adjusted in the Company's books of account, resulting in excess or deficient accumulated deferred income tax assets and liabilities. Such excess or deficient ADIT attributable to assets or liabilities reflected in ISO rates and subsequent recoverable or refundable amortization will be based upon tax records and be calculated and recorded in accordance with ASC 740 and any applicable normalization requirements of the taxing jurisdiction. For each re-measurement of deferred taxes, the amounts entered as Adjustments to Rate Base or a component of Income Taxes will be supported by work papers providing the balance for each taxing jurisdiction at the beginning and end of the year, amortization for the year and any other information required to support compliance with any applicable normalization requirements.
- G In the event that transmission assets or right of ways involve a lumpsum upfront payment under a lease that qualifies as a capital lease, it will be amortized over the life of the lease to Account 567 and the unamortized balance will be included here. In the event such a lease involves monthly or annual payments, the payments will be booked to Account 567.
- H Unfunded Reserves are customer contributed capital authorized by a regulatory agency. Balances, if any, will be supported by a workpaper.
 - No amounts shall be credited to accounts 228.1 through 228.4 unless authorized by a regulatory authority or authorities to be collected in a utility's rates.
- I Recovery of Regulatory Assets must be authorized by the Commission.
- J Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of Abandoned Plant.
- K Cash Working Capital assigned to transmission is transmission-allocated O&M minus the amortization of any Regulatory Asset, divided by eight.
 - Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form 1.
- L Line 45 removes EPRI Annual Membership Dues listed in Form 1 at 353.f, any EPRI Lobbying expenses included in line 42 of the template and all Regulatory Commission Expenses itemized at 351.h. Line 45 removes all advertising included in Account 930.1, except safety, education or out-reach related advertising.
 - Line 45 removes all EEI and EPRI research, development and demonstration expenses.
 - Line 46 reflects all Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h
 - Line 42 or Line 44 and thus Line 48 shall include any NYISO charges other than penalties, including but not limited to administrative costs.
- M Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.
- N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation
 - step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up
 - facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- O ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC under FPA Section 205 or 206.
- P A hypothetical capital structure of 47% debt and 53% equity will be used until the entire Marcy to New Scotland 345 kV Upgrade Project is placed in-service. After the Marcy to New Scotland 345 kV Upgrade Project is placed in-service, the lesser of a 53% equity ratio or the actual equity ratio will be used.
- Q Non-incentive investments are investments without ROE incentives and incentive investments are investments with ROE incentives

All unfunded reserves will be listed above, specifically including (but not limited to) all subaccounts for FERC Account Nos. 228.1 through 228.4. "Unfunded reserve" is defined as an accrued balance (1) created and increased by debiting an expense which is included in this formula rate (column (e), using the same allocator in column (g) as used in the formula to allocate the amounts in the corresponding expense account) (2) in advance of an anticipated expenditure related to that expense (3) that is not deposited in a restricted account (e.g., set aside in an escrow account, see column (d)) with the earnings thereon retained within that account. Where a given reserve is only partially funded through accruals collected from customers, only the balance funded by customer collections shall serve as a rate base credit, see column (f). The source of monthly balance data is company records.

LS Power Grid New York Corporation I Project Worksheet Attachment 4

Allocator

Attachment 4 For the 12 months ended 127.
Utilizing Appendix A Data

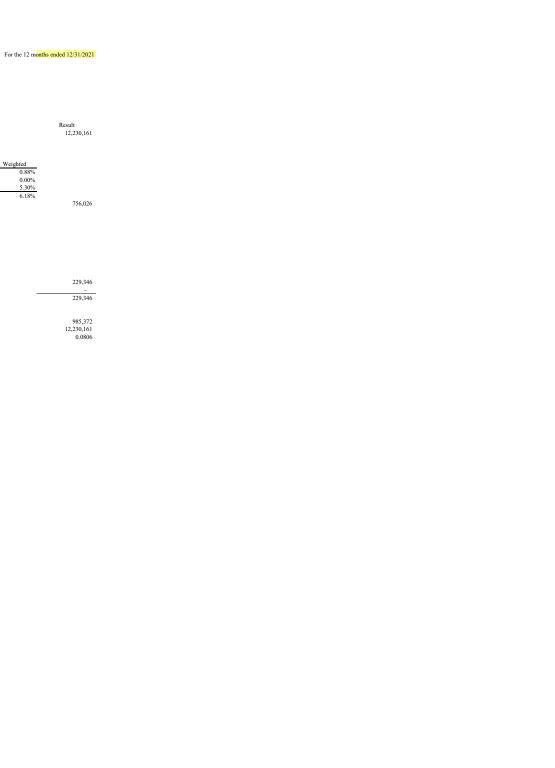

The calculations below calculate that additional revenue requirement for 100 basis points of ROE and 1 percent change in the equity component of the capital structure.

These amounts are then used to valuate the actual increase in revenue in the table below (starting on line 66) associated with the actual incentive authorized by the Commission

The use of the 100 basis point calculations do not presume any particular incentive (i.e., 100 basis points) being granted by the Commission.

68 Check Sum Appendix A Line 3 69 Difference (must be equal to zero)

- Note:

 Column (b), Net Investment includes the Net Plant In Service, unamortized regulatory assets, and unamortized abandoned plant.

 Column (l), Gross Plant in Service excludes Regulatory Assets, CWIP, and Abandoned Plant.

 Competitive Bid Concession, if any, will reflect outcome of competitive developer selection process and will be computed on a workpaper that will be provided as supporting documentation for each Annual Update and will be zero or a reduction to the revenue requirement. The amount in Column (p) above equals the amount by which the annual revenue requirement is reduced from the ceiling rate.

 Column (e), for each project with an incentive in column (e), note the docket No. in which FERC granted the incentive>

2d			-	-	-	-	-
			-	-	-	-	-

- Notes
 1. From Attachment 4, Column (q) for the period being trued-up
 2. The "revenue received" is the total amount of revenue distributed in the True-Up Year. The amounts do not include any true-ups or prior period adjustments and reflects any Competitive Bid Concessions
 3. Then Monthly Interest Rate shall be equal to the interest rate set forth below on line 13 and be applied to the amount in Column E for a period of 24 months
 4. The True-Up Adjustment is applied to each project prorata based its contribution to the Revenue Requirement shown in Attachment 4

7	Test period days after rates become effective	365

26

Note 1 - The computations on this workpaper average the projected annual activity of accumulated deferred income taxes. To the extent that the ADIT is subject to the normalization requirements, the proration rules of Treasury Regulation Sec. 1.167(I)-1(h)(6) and the consistency rules of IRC Section 168(i)(9)(B) are applied. Activity related to the portions of the account balances not subject to the proration requirement are averaged instead of prorated.

9 Note 2 - The components of the accumulated deferred income tax balances are detailed on Attachment 6b.

10	Account 190 - Accumulated Deferred Income Taxes		Amount

-		-	-		-
-		-	-		-
-		-	-		-
-	-	-	-	-	-
	-	-	-	-	-

Note 7 - Column J is the difference between actual monthly and projected monthly activity (Column I minus Column C). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (i.e., the amount of projected activity that did not occur) and a positive in Column J represents under-projection (i.e., the excess of actual activity over projected activity), if projected and actual active are both negative, a negative in Column J represents under-projection (i.e., the excess of actual activity over projected activity) and a positive in Column J represents over-projection (i.e., the amount of projected activity) that did not occur).

Note 8 - Column K preserves the effects of ADIT proration from the projected revenue requirement when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J indicates that ADIT activity was over-projected, enter Column G x (Column I) Column C]. If Column J indicates that ADIT activity was under-projected, enter the amount from Column G and complete Column L). In other situations, enter zero. 143

144 Note 9 - Column L applies when (1) Column J indicates that ADIT activity was under-projected AND (2) actual monthly and projected monthly activity are either both increases or both decreases. Enter 50 percent of the amount from Column J. In other situations, enter zero. The ADIT activity in column L is multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly ADIT activity.

Note 10 - Column M applies when (1) projected monthly activity was an increase while actual monthly activity was a decrease OR (2) projected monthly activity was a decrease while actual monthly activity was an increase. Enter 50 percent of the amount of actual monthly activity (Col I). In other situations enter zero. The ADIT activity in column M is a multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly ADIT activity.

Note 11 - Column N is computed by adding the prorated monthly ADIT activity, if any, from Column K to the portion of monthly ADIT activity, if any, from Column L or M to the balance at the end of the prior month.

18	303.1	Contributions in Aid of Construction	Note C

Notes

- A * Taken directly from affiliate Cross Texas Transmission, LLC as approved by the Public Utility Commission of Texas in Docket No. 43950.
 - ** Based on a proxy depreciation rate as supported in Section 205 filing.
- B These depreciation rates will not change absent the appropriate filing at FERC.
- In the event a Contribution in Aid of Construction (CIAC) is made for a transmission facility, the transmission depreciation rates above will be weighted based on the relative amount of underlying plant booked to the accounts shown in lines 1-9 above and the weighted average depreciation rate will be used to amortize the CIAC. The life of a facility subject to a CIAC will be equivalent to the depreciation rate calculated above, i.e., 100% ÷ deprecation rate = life in years. The estimated life of the facility or rights associated with the facility will not change over the life of a CIAC without prior FERC approval.

LS Power Grid New York, LLC heet - Annual Excess or Deficient Accumulated Deferred Income Taxes Worksheet Annual Transmission Revenue Requirement For the 12 months ended 12/31/2021

٠		٠.	
	in		

Purpose of worksheet

The purpose of this portion of the worksheet are to:
-describe legislation resulting in remeasurement of ADIT accounts,
-explain how any ADIT accounts were re-measured,
-explain the excess or deficient ADIT contained therein,

-explain the excess or deficient ADIT contained therein,
-explain the accounting for any excess or deficient amounts in Accounts 182.3 (Other Regulatory Assets) and 254 (Other Regulatory Linbilities),
-reconcile the amounts of excess or deficient amounts in Accounts 182.3 (Other Regulatory Assets) and 254 (Other Regulatory Linbilities),
-reconcile the amounts of excess or deficient ADIT determined as a result of each specific change in tax law (i.e., unrecovered regulatory assets and unrefunded regulatory linbilities comprising the Rate
Base Adjustment Mechanism) as of the beginning and end of the current test period,
-indicate whether each excess or deficient ADIT amount is protected (i.e., subject to the normalization rules) or unprotected (i.e., not subject to the normalization rules),
-indicate the amount of amornization of the excess or deficient ADIT are amortized,
-indicate the amount of amornization of the excess or deficient ADIT are amortized,
-indicate the amortization period of the excess or deficient ADIT being returned or recovered through rates, and
-describe the nethod of amornization each excess or deficient ADIT amount.

Description of changes in tax law

Description of changes in ax now

Note 1a - The Tax Cuts and Jobs Act (Public Law No. 115-97) was enacted on December 22, 2017. The TCJA reduced the federal corporate income tax rate from 35 percent to 21 percent, effective January 1, 2018. The composite tax rates used for the remeasurement of ADIT balances are:

6		Historical	New
7	Federal income tax rate	35%	21%
8	State income tax rate	6.5%	6.5%
9	nposite federal/state income tax rate	39.23%	26.14%
10	Tax gross-up factor	1.64541	1.35382

Note 1b - LS Power Grid New York, LLC had not begun providing electric transmission service prior to the 2017 federal change in tax law and, thus, the resulting remeasurements of ADIT recorded in 2017 did not affect rate base or result in refundable excess ADIT amounts or recoverable deficient ADIT amounts.

Summary of re-measurement of ADIT resulting from the 2017 decrease in federal income tax rate 12

Note 2 - Explanation of how ADIT accounts are re-measured upon a change in income tax law

Deferred tax assets and liabilities are adjusted (re-measured) for the effect of the changes in tax law (including tax rates) in the period that the change is enacted. Adjustments are recorded in the
appropriate deferred tax balance sheet accounts (Accounts 190, 281, 282 and 283) based on the nature of the temporary difference and the related classification requirements of the accounts. If as a
result of action or expected action by a regulator, it is probable that the future increase or decrease in taxes payable due to the change in its at we rates will be recovered from or returned to estimate
through future rates, a regulatory acst or liability is recognized in Account 182.3 (Other Regulatory Asset), or Account 294 (Other Regulatory Liabilities), as appropriate, for that probable future
revenue or reduction in future revenue. Re-measurements of deferred as balances abete accounts may also result in re-measurements of tax-reasurements of t

Rate Base Adjustment Mechanism - Summary

25		Projected Revenue Requirement	Actual Revenue Requirement (True-up)
26	Account	Amount	Amount
27	182.3 (debit or <credit>)</credit>		
28	254 (debit or <credit>)</credit>		
29	Total Excess / Deficient ADIT	-

Note 3 - A change in tax law did not occur with respect to the service period.

Note 4 - The amortization of the excess and/or deficient ADIT recorded in Account 254 (Other Regulatory Liabilities) and/or Account 182.3 (Other Regulatory Assets) is recorded with offsetting entries to Account 410.1 (Provision for Deferred Income Taxes, Utility Operating Income) or Account 411.1 (Provision for Deferred Income Taxes - Credit, Utility Operating Income), as appropriate. In addition, the deferred tax asset related to Account 254 or the deferred tax liability related to Account 182.3 is adjusted, as appropriate. This activity is summarized in the table "Income Tax Allowance Mechanism -Projected." The annual amortization in the tables above reflects tax gross-up and is stated at the revenue requirement level.

Note 5 - Re-estimates of the effects of a prior change in tax law did not occur during the period.

62 Note 6a - Certain excess deferred taxes pertaining to the Tax Cuts and Jobs Act are subject to (protected by) the normalization requirements of Act Section 13001(d).

Note 8 - The amortization of the excess and/or deficient ADIT recorded in Account 254 (Other Regulatory Liabilities) and/or Account 18.2.3 (Other Regulatory Assets) is recorded with offsetting entries to Account 410.1 (Provision for Deferred Income Taxes, Utility Operating Income) or Account 411.1 (Provision for Deferred Income Taxes—Credit, Utility Operating Income), as appropriate. In addition, the deferred tax assert entailed to Account 24.0 the deferred tax faultility related to Account 82.3 is adjusted, as appropriate. This activity is summarized in the table "Income Tax Allowance Mechanism - Projected." The annual amortization in the tables above reflects tax gross-up and is stated at the revenue requirement level.

Note 9 - Re-estimates of the effects of a prior change in tax law did not occur during the period.

Note 10a - Certain excess deferred taxes pertaining to the Tax Cuts and Jobs Act are subject to (protected by) the normalization requirements of Act Section 13001(d).

LS Power Grid New York, LLC Workpaper 1 Listing of Permanent Book/Tax Differences

The book/tax differences reflected in recoverable income tax expense are differences between revenues and expenses reflected in the revenue requirement and revenue and deductions reflected in taxable income. As such, non-operating (below-the-line) expenses and income are not included (e.g., accrual of AFUDC-equity). Book depreciation of capitalized AFUDC-equity is reflected in ratemaking, but not for income tax purposes, and, thus, is a permanent book/tax difference in this context. Similarly, amortization of the regulatory asset for pre-commercial carrying charges accrued at an after-tax equity rate of return is permanent difference between recoverable expenses and tax deductions.

Permanent differences per tax return	Amount per Formula Rate
Depreciation of AFUDC-equity Amortization of carrying charge-equity	4,067
Total permanent book/tax differences	4,067
Tax rate	26.14%
Tax effect of permanent book/tax differences	1,063 To Att 3, line 207
Tax gross-up factor	1.3538212
Permanent Differences Tax Adjustment	1,439

LS Power Grid New York, LLC Workpaper 2 Weighted Average Cost of Capital

Weighted Average Cost of Capital										
Financing	Year	LIBOR	Spread Cost		Capital Structure	WACC				
Debt	2021	0.13%	1.75%	1.876%	47%	0.88%				
Equity	2021			10.00%	53%	5.30%				
WACC	2021					6.18%				

1/LIBOR is the projected monthly average rate for 2021.
